Monkeyshines on Mexico - Land of Legends Phyllis B Goldman, 1995 **K'Oben** Amber M. O'Connor, Eugene N. Anderson, 2016-12-14 K'Oben traces the Maya kitchen and its associated hardware ingredients and cooking styles from the earliest times for which we have archaeological evidence through today's culinary tourism in the area It focuses not only on what was eaten and how it was cooked but the people involved who grew or sourced the foods who cooked them who ate them Additionally the authors examine how Maya foodways and the people involved fit into the social system particularly in how food is incorporated into culture economy and society The authors provide a detailed literature review of hard to find sources including out of print centuries old cookbooks archaeological field notes ethnographies and ethnohistories out of circulation and not available in English thesis documents only available in Spanish and in university archives as well as current field research on the Maya The more recent Maya foodways can be studied from cookbooks ethnographies and ethnohistorical documentation Between the two of us we have assembled a small but representative collection of cookbooks some self published and rare that were available in Merida and elsewhere in Mexico during the late 20th century Some are quite old and all reflect local traditional foodways Geographically the book concentrates on Yucatan Tabasco and Chiapas in

Mexico but will include Pre Classic and Classic evidence from Guatemala and El Salvador whose foodways are influenced by Maya traditions

To Be Like Gods Matthew G. Looper, 2010-01-01 Winner Association for Latin American Art Book Award 2010 The Maya of Mexico and Central America have performed ritual dances for more than two millennia Dance is still an essential component of religious experience today serving as a medium for communication with the supernatural During the Late Classic period AD 600-900 dance assumed additional importance in Maya royal courts through an association with feasting and gift exchange These performances allowed rulers to forge political alliances and demonstrate their control of trade in luxury goods The aesthetic values embodied in these performances were closely tied to Maya social structure expressing notions of gender rank and status Dance was thus not simply entertainment but was fundamental to ancient Maya notions of social religious and political identity Using an innovative interdisciplinary approach Matthew Looper examines several types of data relevant to ancient Maya dance including hieroglyphic texts pictorial images in diverse media and architecture A series of case studies illustrates the application of various analytical methodologies and offers interpretations of the form meaning and

social significance of dance performance Although the nuances of movement in Maya dances are impossible to recover Looper demonstrates that a wealth of other data survives which allows a detailed consideration of many aspects of performance To Be Like Gods thus provides the first comprehensive interpretation of the role of dance in ancient Maya society and also serves as a model for comparative research in the archaeology of performance Foodscares, Foodfields, and Identities in the Yucatán Steffan Igor Ayora-Díaz, 2012-01-01 The state of Yucatán has its own distinct culinary tradition and local people are constantly thinking and talking about food They use it as a vehicle for social relations but also to distinguish themselves from Mexicans This book examines the politics surrounding regional cuisine as the author argues that Yucatecan gastronomy has been created and promoted in an effort to affirm the identity of a regional people and to oppose the hegemonic force of central Mexican cultural icons and forms In particular Yucatecan gastronomy counters the homogenizing drive of a national cuisine based on dominant central Mexican appetencies and defies the image of Mexican national cuisine as rooted in indigenous traditions Drawing on post structural and postcolonial theory the author proposes that Yucatecan gastronomy having successfully gained a reputation as distinct and distant from Mexican cuisine is a bifurcation from regional culinary practices However the author warns this leads to a double paradoxical situation that divides the nation while a national cuisine attempts to silence regional cultural diversity the fissures in the project of a homogeneous regional identity are revealed Language Planning and Policy in Latin America Richard B. Baldauf, Robert B. Kaplan, 2007 This volume covers the language situation in Ecuador Mexico and Paraguay explaining the linguistic diversity the historical and political contexts and the current language situation including language in education planning the role of the media the role of religion and the roles of indigenous and non indigenous languages The authors are indigenous and or have been participants in the language planning context This volume contains monographs on Ecuador Mexico and Paraguay countries which are not well represented in the recent international language policy and planning literature and draws together the existing published research in this field The purpose of the area volumes in this series is to present up to date information on politics particularly those that are not well known to researchers in the field thereby providing descriptions of language planning and policy in countries around the world Complete Atlas of the World, 2nd Edition DK, 2012-04-16 DK's highly regarded eye catching and comprehensive cartography is presented in classic form in this fully updated geographic tome the second edition of Complete Atlas of the World All maps enjoy a full double page spread maximizing the space for geographic information The continents are broken down into 330 carefully selected map areas reflecting a meaningful division of the modern world A section on thought provoking global topics and an index of 100 000 placenames support the core atlas This atlas is has been structured into four sections The first section is a world overview containing a stimulating series of global thematic maps which explore Earth's place in the universe its physical forms and processes the living world and the human condition The second section comprises the main atlas examined in a series of 330 maps including more than
