DESCRIPTION AND OPERATION

DESCRIPTION

The K-Series Carburetors are of the single barrel updraft design with single venturi, twin floats and concentric fuel bowl. These carburetors are of the "sealed" and "balanced" type since all air for fuel bowl ventilation and idle operation must enter through the air intake. An automatic economizer system is provided to save fuel when vehicle is operated at part load. The fuel supply system includes the fuel inlet fitting, filter screen, fuel valve (needle and seat), float assembly and float chamber. The idle system consists of the idle discharge port.
