template it's not a list of tasks to do. It's our insider's guide to starting a company and running it successfully in those critical early months. Between us, we've started over a dozen high-tech software companies and raised over 500 million in investment capital. We've acquired over thirty-five companies; had three of our startups go public; sold six of them; and we made billions of dollars for shareholders. We've also invested in over eighty startups, advised and mentored over two hundred companies, and actively worked with venture capitalists, VCs, incubators, and accelerators to help launch many other new startups. We've had plenty of failures too. And we've probably learned more from those than from the successes. We share those lessons as well. The Startup Playbook is full of our advice, guidance, do's and don'ts from our years of experience as founders many times. We want to share our hard-earned knowledge with you to make success easier for you to achieve. This book is extraordinarily fresh and exciting. In an accessible, straight-talk fashion, this book is a manual and an inspiration. The Startup Playbook is smart and avoids the 'I am so smart over writing' endemic to the genre. Read this as it is presented. You'll be doing yourself a tremendous favor. Amazon Reviewer
