The Strange Case Of Dr Mabuse:

The Strange Case of Dr. Mabuse David Kalat, 2015-09-16 The Mabuse phenomenon is recognized as an icon of horror in Germany as Frankenstein and Dracula are in the United States A study of the 12 motion pictures and five books and some secondary films that make up the eight decades of adventures of master criminal Mabuse created by author Norbert Jacques in the best selling 1922 German novel and brought to the screen by master filmmaker Fritz Lang in the same year Both on screen and off the story of Dr Mabuse is a story of love triangles and revenge of murder suicides and suspicious deaths of betrayals and paranoia of fascism and tyranny deceptions and conspiracies mistaken identities and transformation This work featuring much information never before published in English provides an understanding of a modern mythology whose influence has pervaded popular culture even while the name Mabuse remains relatively unknown in the United States

The Death of Classical Cinema Joe McElhaney, 2012-02-01 The Death of Classical Cinema uncovers the extremely rich yet insufficiently explored dialogue between classical and modernist cinema examining the work of three classical filmmakers Alfred Hitchcock Fritz Lang and Vincente Minnelli and the films they made during the decline of the traditional Hollywood studio system Faced with the significant challenges posed by alternative art cinema and modernist filmmaking practices in the early 1960s these directors responded with films that were self conscious attempts at keeping pace with the developments in film modernism These films Lang s The Thousand Eyes of Dr Mabuse Hitchcock s Marnie and Minnelli s Two Weeks in Another Town were widely regarded as failures at the time and bolstered critics claims concerning the irrelevance of their directors in relation to contemporary filmmaking However author Joe McElhaney sheds new light on these films by situating them in relation to such acclaimed modernist works of the period as Godard s Contempt Fellini s La dolce vita Antonioni s Red Desert and Resnais s Last Year at Marienbad He finds that these modernist films rather than being diametrically opposed in form to the work of Hitchcock Lang and Minnelli are in fact profoundly linked to them The

Italian Horror Films of the 1960s Lawrence McCallum,2024-10-14 Until I vampiri The Vampires in 1956 Italian filmmakers generally eschewed horror in favor of fantasy films and big screen spectacles In the 1960s the subjects became as varied as the filmmakers ranging from the comic strip flavor of *The Wild Wild Planet* 1966 to the surrealistic mixture of horror and social commentary of Fellini's *Toby Dammit* segment of *Spirits of the Dead* 1969 Arranged by English title each entry includes Italian title studio running time year of release work the film is based on when appropriate and cast and credits These data are followed by a lengthy essay blending a plot synopsis with critical commentary and behind the scenes information *The Films of Edgar G.
