The Technology of Bread-Making, Including the Chemistry and Analytical and Practical Testing of Wheat Flour, and Other Materials Employed in Bread-Making and Confectionery (Classic Reprint) William Jago,2015-06-30 Excerpt from The Technology of Bread Making Including the Chemistry and Analytical and Practical Testing of Wheat Flour and Other Materials Employed in Bread Making and Confectionery The Intervention of war conditions has sadly interfered with the developments of this book which the Authors had hoped to incorporate in a new edition In order to meet the insistent demands on the part of both bakers and millers for its reappearance it has been decided to issue a slightly abridged reprint of the previous edition with certain corrections and additions rendered necessary by advances in knowledge during the past few years This has been rendered possible by the action of The Bakers Helper Company which has thrown itself into the breach at a time when the publication of a technical work is fraught with great difficulties and considerable risk To that company in America and The Northern Publishing Company Limited of Liverpool well known as the proprietors of Milling the Authors are indebted for the promise of every effort as publishers to bring the book to the notice of the milling and baking trades The Authors wish to make every acknowledgment with their most sincere thanks of the valuable help they have received from Miss Morris of the staff of The Bakers Helper Company who has read the proofs and checked the passage of

the book through the press in a most efficient manner The volume now offered to the reader must be regarded as a development of the writers former works on the same subject which appeared in 1886 and 1895 The general mode of treatment is therefore to some extent governed by that of its predecessors It should be remembered that the requirements of the student of the technology of bread making whether miller or baker have been the first consideration and accordingly the arrangement is that which seems most likely to be of service and assistance to him About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books Find more at www.forgottenbooks.com This book is a reproduction of an important historical work Forgotten Books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy In rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition We do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works
