This book also includes assessment measures to use when evaluating an adolescent who has attempted suicide. Includes an outline form of an assessment battery for adolescents who have attempted suicide. Analyzes and discusses treatment and case studies. Presents detailed descriptions of specific therapy techniques useful with adolescents who attempt suicide. Includes succinct reviews of the literature, ways to measure relevant factors related to suicidal behavior, tips for clinicians, and reviews of pertinent assessment measures.

Rufino, 2021-09-26 This book highlights the current epidemiology of suicide among children and adolescents as well as identifying important risk factors and evidence-based treatment options. To accomplish this, this book is organized into two major sections: 1. contributing factors to the emergence of child and adolescent suicide and 2. evidence-based treatment of child and adolescent suicide. Across studies, researchers discuss risk factors of anxiety, sleep problems, child sexual abuse, and violence perpetration and conclude with treatment considerations including the Collaborative Assessment and Management of Suicidality (CAMS) and safety planning. From this body of work, it is clear that there is an urgent need to better understand and effectively treat child and adolescent suicide.
