The Swedish Country House:

The Swedish Country House Susanna Scherman, 2010-10-26 Swedish country houses are one of Europe's best kept secrets. Little known outside Sweden and rarely published, they survive in surprisingly large numbers, often with their original furniture and decoration. Twenty of these remarkable and timeless houses are examined here in detail, ranging from royal palaces to farmhouses, all dating from the fifteenth century to the end of the nineteenth century. In spite of being far from the centers of power and artistic influence, these houses reflect the talents of important architects and designers who together forged a distinctive national style. Sweden has been fortunate in its history; while the Hundred Years War reduced much of Europe to ruins, Sweden grew rich and during the subsequent centuries has enjoyed almost continuous peace. The story of Swedish country houses is thus a mirror of Swedish social history: its hierarchy of classes, its absorption of European styles and movements, and above all, its enduring culture. The Swedish Country House is both an important contribution to design history and a highly seductive glimpse into a secret Nordic world. Art historian Susanna Scherman has included examples from every level, drawing special attention to the qualities that make them unique. She and noted photographer Ke Eson Lindman explored the houses together, and together they bring them to life for the reader. **Swedish Country**

Reinberger, Elizabeth McLean, 2015-10-21 Cedar Grove, The Cliffs, Grumblethorpe, Mount Airy, Bartram's House, and Garden: Accommodation of the Vernacular. *Comfortable Everyday* *Life at the Swedish Eighteenth-Century Näs Manor* Carolina Brown, 2025-10-01 During the eighteenth century, comfortable everyday life becomes a new ideal. The good life was no longer about grand representation or the manifestation of material opulence. The new luxury was instead the comfortably arranged life at home. This book is about the traces of this change, its approach and consequences, and its anchoring in the material and social life of the Swedish manor. The comfort revolution of the eighteenth century was clearly associated with both new types of furniture and new ways of furnishing. An important aspect of the development of comfort was the new mobility and flexibility in form and function that the home and its interior now showed. Through the home of the Wadenstierna family on the country estate of Näs, north of Stockholm, the comfortable everyday life is set by their various tables: writing desks, sewing tables, dressing tables, coffee tables, and games tables.

The Comforts of Home in Western Europe, 1700-1900 Jon Stobart, 2020-02-20 Comfort, both physical and affective, is a key aspect in our conceptualization of the home as a place of emotional attachment, yet its study remains underdeveloped.

in the context of the European house In this volume Jon Stobart has assembled an international cast of contributors to discuss the ways in which architectural and spatial innovations coupled with the emotional assemblage of objects to create comfortable homes in early modern Europe The book features a two section structure focusing on the historiography of architectural and spatial innovations and material culture in the early modern home It also includes 10 case studies which draw on specific examples from water closets in Georgian Dublin to wallpapers in 19th century Cambridge to illustrate how people made use of and responded to the technological improvements and the emotional assemblage of objects which made the home comfortable In addition it explores the role of memory and memorialisation in the domestic space and the extent to which home comforts could be carried about by travellers or reproduced in places far removed from the home The Comforts of Home in Western Europe 1700 1900 offers a fresh contribution to the study of comfort in the early modern home and will be vital reading for academics and students interested in early modern history material culture and the history of interior architecture

Comfort in the Eighteenth-Century Country House Jon Stobart, 2021-09-21 Country houses were grand statements of power and status but they were also places where people lived This book traces the changes in layout the new technologies and the innovations in furniture that made them more convenient and comfortable It argues that these material changes were just one aspect of comfort in the country house feeling comfortable was just as important as being comfortable Achieving this involved the comfort and solace to be found in daily routines religious faith and above all relationships with family and friends Such emotional comforts and the attachment to things and places that embodied and memorialized them made country houses into homes

social and cultural context of scientific activity we have witnessed a reappraisal of the role of the universities in the construction and development of early modern science In essence the following conclusions have been reached 1 the attitudes regarding scientific progress or novelty differed from country to country and follow different trajectories in the course of the early modern period 2 institutions of higher learning were the main centers of education for most scientists 3 although the universities were sometimes slow to assimilate new scientific knowledge when they did so it helped not only to remove the suspicion that the new science was intellectually subversive but also to make science a respectable and even prestigious activity 4 the universities gave the scientific movement considerable material support in the form of research facilities such as anatomical theaters botanical gardens and expensive instruments 5 the universities provided professional employment and a means of support to many scientists and 6 although the relations among the universities and the academies or scientific societies were sometimes antagonistic the two types of institutions often worked together in harmony performing complementary rather than competing functions moreover individuals moved from one institution to another as did knowledge methods and scientific practices
