**The Tales of a Stroke Patient** Joyce Hoffman, 2012-09-26 I was up all night reading I laughed cried and my heart was touched My friend recently began to ignore me and doesn't want me to visit Your blog really made me see what a survivor sees and feel what they feel Because of your willingness to share I now know that I'm doing the right thing by hanging in there Jada Thompson a Reader Oh Joyce Really touched my heart There are no happy words to make this better But you are facing it head on win or lose and that says so much about your character Anna Bofill IT Professional Takes my breath away Powerful beyond words Really a gem Judy Freeman Retired Teacher You have expanded my knowledge greatly Keep up the good research and writing Laurel Nichols Cardinal Hill Rehabilitation Hospital I was a reporter and I won an AP award for an editorial in 99 I'm damaged goods and words fail me sort of a blank slate I keep plugging away nose in the dictionary and thesaurus hunting out words I'm unsinkable Mickie Roller Stroke Survivor [The Story of Stroke](#) Louis R. Caplan, Aishwarya Aggarwal, 2022-12-15 This book tells the full story of stroke through the experiences of many who were eye witnesses to this long process **Tales From The Gurney - The 7-Minute Medic** J W, **The Tale of the Dueling Neurosurgeons** Sam Kean, 2014-05-06 The author of the bestseller The Disappearing Spoon reveals the secret inner workings of the brain through strange but true stories Early studies of the human brain used a simple method wait for misfortune to strike strokes seizures infectious diseases horrendous accidents and see how victims coped In many cases their survival was miraculous if puzzling Observers were amazed by the transformations that took place when different parts of the brain were destroyed altering victims personalities Parents suddenly couldn't recognize their own children Pillars of the community became pathological liars Some people couldn't speak but could still sing In The Tale of the Dueling Neurosurgeons Sam Kean travels through time with stories of neurological curiosities phantom limbs Siamese twin brains viruses that eat patients memories blind people who see through their tongues He weaves these narratives together with prose that makes the pages fly by to create a story of discovery that reaches back to the 1500s and the high profile jousting accident that inspired this book's title With the lucid masterful explanations and razor sharp wit his fans have come to expect Kean explores the brain's secret passageways and recounts the forgotten tales of the ordinary people whose struggles resilience and deep humanity made neuroscience possible [Making Chaplaincy Work](#) Laurel A Burton, 2014-07-10 With compassion and commitment practicing chaplains draw on a wide range of professional experiences and discuss principles themes and guidelines that have enhanced their ministries These practical and successful approaches are aimed at helping others face the daily professional challenges of health care chaplaincy The issues and responsibilities of chaplaincy work with a variety of patient populations AIDS sufferers long term care patients stroke victims and the terminally ill are thoroughly explored Contributors provide creative and innovative methods of meeting the needs of hospital patients and their families as well as health care personnel such as implementing a volunteer clergy program and establishing a surgical reporting plan **Dead Man's Tale** David

Campbell,2016-09-27 Who killed Arnold Gibbs is no great mystery Or is it Dallas homicide detective Reese Barrett strives to solve a riddle which involved a suspect that has an alibi at the assumed time of death But more puzzling is why the dying man was kidnapped from a coma ward in a major hospital when doctors projected he had only weeks to live And who is the victim now occupying his bed forced into an irreversible coma and bearing Arnold Gibbs identification After his partner is hospitalized Barrett finds hes alone in search of a solution to the puzzling conspiracy of murder which has a lot more questions than answers His first solo case is complicated further by the reappearance of a ghost from his past an attractive young woman whose search for justice for her murdered husband was blocked by Reeses incompetence as a rookie Reese follows the threads of what is almost certainly a conspiracy well aware that the eyes of a woman he is growing to love had witnessed his failure three years earlier This time he does not have the aid of his senior partner and will be totally responsible for the outcome

**tPA for Stroke**

Justin A. Zivin M.D., Ph.D.,John Galbraith Simmons,2010-12-01 Without warning stroke can paralyze blind or kill Some victims recover but many do not and may even suffer another disabling or fatal attack The drug known as tPA can drastically reduce the long term disability associated with stroke but despite its near miraculous capabilities and the growing support of most neurologists it has been slow to win acceptance as the standard of care in emergency departments nationwide tPA for Stroke chronicles how this remarkable drug came to be tested in stroke victims its early years in development by the pharmaceutical giant Genentech and its eventual marginalization due to a convergence of unfavorable political fiscal and medical circumstances For instance initially many stroke specialists were unconvinced that the drug s benefits outweigh its risks tPA was originally developed and is still used for cardiac patients Moreover neurologists called upon to assess stroke patients have not typically been trained to make decisions in emergency settings and tPA must be given within a scant few hours after stroke These and other factors have continued to delay the drug s universal acceptance as the most effective treatment available and to hamper the general public s awareness that such a treatment exists a troubling state of affairs that Zivin and Simmons argue

must be rectified Instilling the knowledge that anyone at any time is susceptible to stroke from the old and infirm to the young and healthy tPA for Stroke is a clarion call to awareness in a rapidly changing healthcare environment in which stroke long a disease in thrall to resignation and pessimism must be neglected no longer What is Humanism and Why Does it Matter? Anthony B. Pinn, 2016-06-16 We live in a world of social political economic and religious rupture Ideologies polarise to fuel confrontation within communities nations and regions of the world At this point in the twenty first century humanism s focus on reason ethics and justice offers the potential to rethink and re engage in new ways What Is Humanism and Why Does It Matter brings together leading humanist thinkers and activists to examine humanism and how it can work in the world Humanism is often misunderstood The movement includes both atheists and agnostics who seek to make ethical sense of the world based on shared human values and a concern for human welfare happiness and fulfillment What Is Humanism and Why Does It Matter presents an overview and exploration of the meaning and nature of humanism both as a philosophy and as a way of engaging with the challenges of the world **Survivor to Thrive** April Ingro Wortman, 2014-08-07 April Wortman is a stroke brain injury survivor She details seven years of her experiences with recovery and rehabilitation in a heart warming and real fashion She discusses family repercussions insight for survivors and a patient s viewpoint for the medical community You will find her book a refreshingly humorous and inspirational yet poignant portrayal of the reality of recovering from a life threatening event **Becoming a Reflective Practitioner** Christopher Johns, 2025-11-10 Fully updated edition of a seminal text in the field providing an in depth guide to reflection and its real life application The Seventh Edition of Becoming a Reflective Practitioner offers an in depth exploration of reflective practice bringing the process of guided reflection to life The book emphasises the importance of person centred practice aligned with the latest developments in holistic healthcare and features a variety of case studies and real life scenarios that illustrate the application of reflective practice in clinical settings The book is structured into five parts moving from the concept of reflection and its application in clinical practice to its integration into formal education narrative representation and performance The new edition includes significant updates and expansions on topics such as the development of guidance in reflective practice as well as the inclusion of new chapters that highlight the reflexive process of guiding practitioners over the course of a year Becoming a Reflective Practitioner Seventh Edition includes information on The Six Dialogical Movements and their assimilation within the Model for Structured Reflection MSR Experience vision knowing in practice the prerequisites for reflection the reality wall and the movement of reflective learning through understanding empowerment and transformation The nature of guidance and the dynamic process of guidance Narratives of guiding practitioners within the clinical setting constructed through guided reflection dialogue Leadership development through establishing a clinical learning culture based on the learning organisation and clinical supervision Becoming a Reflective Practitioner continues to be an essential resource for students educators and practitioners aiming to enhance their reflective practice and achieve their visions of person centred

care     *A Christian from Egypt: Life Story of a Neurosurgeon Pursuing the Dreams for Quintuple Certifications* RAMSIS F. GHALY MD FACS, 2015-01-23 This book is my life story as a Coptic Christian raised in Egypt Where no one from my family has ever moved away for thousands of years through the rise and falls of ancient pharaohs and deep roots of ancient Christianity It is also the story of my parents raising 10 children since 1953 in an environment of extreme poverty where resources and opportunities were limited with unrelenting prejudice towards Christian minorities So I came to the United States the land of opportunity and became a prominent American neurosurgeon among the only 4000 active nationwide and the only one nationally and internationally to achieve five board certifications in five acknowledged medical disciplines I continue to practice and serve the mission set before me My home land was once prosperous and rich in history Over the centuries it joined the downfall of the majority of the developing countries of the world through its economic crises and injustices to many It was the land for the fathers of early Christians and the foundation for worldwide Christians Now the Coptic Christians are considered a minority constituting a mere 10% of the population and are joining the exodus of ancient Christians from their native African continent This book chronicles my journey from the land of history the land of my birth to the land of opportunity America It outlines the socioeconomic and political changes that Egypt has seen over the last century It is my hope that others may find inspiration and understanding of my culture through reading this book I owe it all to Christ the Lord my cherished parents my family and friends my teachers my mentors and especially my beloved patients     Recent Advances in Attempts to Improve Medication Adherence – from basic research to clinical practice, volume II Przemyslaw Kardas, Tamas Agh, Ines Potočnjak, Cristina Mihaela Ghiciuc, Maria Teresa Herdeiro, 2024-12-04 This exciting Research Topic is the second volume of Recent Advances in Attempts to Improve Medication Adherence from basic research to clinical practice which you can explore here Adequate implementation of evidence based long term therapies is an issue of utmost importance It has a direct impact on both individual and public health as well as on the sustainability of healthcare systems Unfortunately despite more than half a century of extensive research and practical and awareness raising activities medication adherence remains far from perfect Many reasons are responsible for non adherence and the issue is complicated by the rapid aging of the global society the rising tide of non communicable chronic diseases multimorbidity and associated polypharmacy This might be further exacerbated by certain conditions such as the Covid 19 pandemic However one thing is perfectly clear medication non adherence is no longer merely perceived as a patient problem In fact medication adherence depends on many non patient related factors and thus is an important indicator of the quality of care Therefore instead of blaming patients need to be supported in their therapeutic journeys Thus all the stakeholders need to collectively create adherence enabling environments and support patients in the execution of their therapies     *Technology, health, and the patient consumer in the twentieth century* Rachel Elder, Thomas Schlich, 2025-02-18 Technology and consumerism are two characteristic phenomena in the history medicine and healthcare yet the connections between them are rarely explored by

scholars In this edited volume the authors address this disconnect noting the ways in which a variety of technologies have shaped patients roles as consumers since the early twentieth century Chapters examine key issues such as the changing nature of patient information and choice patients assessment of risk and reward and matters of patient role and of patient demand as they relate to new and changing technologies They simultaneously investigate how differences in access to care and in outcomes across various patient groups have been influenced by the advent of new technologies and consumer based approaches to health The volume spans the twentieth and twenty first centuries spotlights an array of medical technologies and health products and draws on examples from across the United States and United Kingdom     **Stroke For Dummies**

John R. Marler,2005-09-09 Features tons of advice for recovery and rehabilitation Get the latest on the symptoms diagnosis and treatment of stroke Have questions and concerns about strokes This reassuring guide provides invaluable information for stroke victims and their loved ones from what a stroke is and what it feels like to proven treatments and therapies You ll see how to implement a plan for preventing stroke treat the lingering effects of stroke and maximize home caregiver effectiveness while minimizing fatigue Discover how to Understand what causes different types of stroke Recognize warning signs Get the most out of doctors and hospitals Speed recovery with the best treatments Help prevent future strokes Decide the best living arrangements after stroke     *And a Time to Die* Sharon Kaufman,2005-04-19 A reassuring and illuminating examination on our conflicting wishes about the end of life how the politics and routines of the American hospital have formed our understanding and experience of death and ultimately why what we consider a good death is so hard to attain In a penetrating and revelatory study medical anthropologist Dr Sharon Kaufman uses two years of intensive observations and interviews with scores of patients family members physicians nurses social workers and other staff at several community hospitals in California to explore the heart of a science driven yet fractured and often irrational world of health care delivery where empathetic yet frustrated hard working yet constrained professionals both respond to and create the anxieties and often inchoate expectations of patients and families who must make decisions they are ill prepared to make She sought out the critically ill the dying and their friends and relatives She followed patients from admission to death days weeks or sometimes months later through what is often for them and their families a Kafka esque journey She asked hospital staff what they were doing and why and stood beside doctors and nurses observing their work cynicism compassion and frustration And she paid close attention to the most important player of all the hospital beauracracy and how it impacts the manner and timing of patient death Her investigative research links together the emotional experiences of patients and families the dedicated work of hospital staff and the ramifications of institutional bureaucracy to show the invisible power of the hospital system itself its rules mandates and daily activity in organizing death and individual experience of it The book is the story of real patients and their families an account of what drives the American hospital today and a report on the complex sources and implications of doing something about death     *Ericksonian Methods* Jeffrey K.
