The Anthropology of Eastern Religions Murray J. Leaf, 2014-05-21. The world's great religions depend on traditions of serious scholarship dedicated to preserving their key texts but also to understanding them and therefore to debating what understanding itself is and how best to do it. They also have important public missions of many kinds and their ideas and organizations influence many other important institutions including government, law, education, and kinship. Anthropology of Eastern Religions: Ideas, Organizations, and Constituencies is a comparative survey of the world's major religious traditions as professional enterprises and often as social movements. Documenting the principle ideas behind eastern religious traditions from an anthropological perspective, Murray J. Leaf demonstrates how these ideas have been used in building internal organizations that mobilize or fail to mobilize external support.

Philosophical Meta-Reflections on Literary Studies Jibu Mathew George, 2019-11-29. Philosophical Meta-Reflections on Literary Studies takes up key meta-questions in the humanities with focus on contemporary literary studies. Philosophically examines the nature of knowledge therein as well as the implications of certain popular critical approaches and addresses the effervescent question of relevance. In contrast to usual works on literary theory or on philosophy of literature for that matter, this book presents an integrated meta-reasoning on the foundational questions of literary studies from an interdisciplinary perspective in a manner of intertextual informality. It endeavours to articulate a rationale for the humanities in general and literary studies in particular. It philosophically examines the implications of and assumptions behind three popular tendencies in contemporary literary criticism: textual deconstruction, ideological criticism, and constructivism. It also introduces the reader to possibilities of non-reductive reasoning with regard to the relation between the aesthetic and the political. With his multidisciplinary background, doctoral degree, and an encyclopedic author, James Joyce, and past engagements with vital issues in the humanities, literature, Jibu George is in a position to deal with foundational questions therein.

With Knowledge and Virtue Themis H. Demas PhD, 2017-11-20. Technology continues to advance and so do our problems. Two of our biggest threats are global warming and nuclear war, and we must eliminate these threats. Fortunately, cost-effective technology exists to reduce global warming, but we must be smart enough to use it. The author offers a detailed proposal for combating climate change: building a more robust economy by creating jobs, eliminating oil imports, stabilizing energy prices, and cutting back on pollution and its detrimental effects on society, all by using clean renewable energy. He also tackles reducing the threat of nuclear war, which will require us to tame the savageness of man. This must be done via international institutions, cooperation, and a commitment to shared values. Tackle two of the world's greatest problems: global warming and the threat of nuclear war, and consider how

Three Centuries of Greek Culture under the Roman Empire. Homo Romanus Graeca Oratione (eBook) Francesca Mestre,Pilar Gómez,2014-05-15 The underlying theme of Three Centuries of Greek Culture under the Roman Empire is the idea that under Roman rule Greek culture was still alive and dynamic and continued to exert a degree of cultural domination either real or apparent So we hope to analyse the meanings of concepts such as Greek or Greece in the Empire Are we right to assume that there was a clear opposition between Greek and Roman Or would it be more accurate to speak of a Graeco Roman world It would certainly be possible to make a list of elements of identity on both sides Greek and Roman but in this case where should the borders between identity and community be placed Three Centuries of Greek Culture under the Roman Empire presents several approaches to the period between the second and fourth centuries AD from a variety of angles perspectives and disciplines Until now this time has usually been considered to be the junction of the decline between the classical world and the emergence of the medieval world however this book establishes a basis for considering the Imperial period as a specific stage in cultural historical and social development with a distinct personality of its own
