

Laboratory: Human Population Growth

Mrs. Côté

Answer Key

Enviro. Science 120

Pre Lab Work:

Before beginning this laboratory, answer the following questions on your own piece of paper in your notebook:

- Define the following terms:
 - growth rate – describes how fast a population is increasing or decreasing and is dependent upon the birth rate and death rate
 - birthrate – is the number of infants born in a given year/1000 people in the population
 - death rate – is the number of people who die in a given year/1000 individuals in the population
 - zero population growth – when the population is in equilibrium or the number of births and deaths are equal
 - developed country – countries that highly developed economy and advanced technology
 - developing country – countries that are considered to have low standard of living, and undeveloped industrially
 - demographic transition – refers to the transition from high birth and death rates to low birth and death rates
- What is a population explosion? How quickly is our population growing each year? What about each day?
A population explosion is when a population lacks limited resources so is able to grow out of control. The human population is grows about 80 million a year and 219, 178 each day.
- How is the growth rate of the human population calculated?
 $\text{Growth rate} = \text{birth rate} - \text{death rate}$
- What causes a negative population growth? What causes a positive population growth?
Negative population growth occurs when the birth rate is less than the death rate
Positive population growth occurs when the birth rate exceeds the death rate
- Why do the two graphs appear to have a different shape?
The population growth rate was much slower in the earlier years. The J-curve shows exponential population growth and the graphs are not drawn to the same scale.
- Using a piece of paper, create the following charts:

Country	Birthrate (%)	Death rate (%)	Population Growth 2005	Population Growth 2050	Demographic Transition	Relative Place in Transition	Sketch graph showing Blue & Pink Line
USA	2.06	0.51	0.92	-0.06	1.55	5

The New Global Possible Ani Dasgupta, 2025-09-09 A compelling and hopeful reminder that change is not only within our grasp it is already happening Jane Goodall A must read for anyone looking for hope and optimism at a critical point in history John Kerry Global environmental leader Ani Dasgupta takes an honest look at lagging climate action and maps out what can be done to rebuild hope for the future In 2015 world leaders came together in Paris and signed an agreement to save the planet Ten years later we have made little progress on the ground and the climate crisis is worse than ever We've mostly figured out what we need to do but not how to get it done and time is running out In this groundbreaking new book World Resources Institute President and CEO Ani Dasgupta explores how to orchestrate change at speed and scale How do we get countries to keep working together on climate action when multilateralism is declining How do we harness technological innovation to protect nature rather than destroy it How do we dismantle entrenched power structures and rapidly transition to a clean resilient economy Based on conversations with more than one hundred leaders around the world *The New Global Possible* weaves together stories of unusual partnerships collaborative leadership and lessons learned from failure Mining the rich history of the climate movement Dasgupta defines the narrow path to a hopeful future one requiring all of our collective focus and determination and offers a radical new practice for orchestrating change for good

World Social Report 2020 Department of Economic and Social Affairs, 2020-02-24 This report examines the links between inequality and other major global trends or megatrends with a focus on technological change climate change urbanization and international migration The analysis pays particular attention to poverty and labour market trends as they mediate the distributional impacts of the major trends selected It also provides policy recommendations to manage these megatrends in an equitable manner and considers the policy implications so as to reduce inequalities and support their implementation

Earth for All Sandrine Dixson-DeCleve, Owen Gaffney, Jayati Ghosh, Jorgen Randers, Johan Rockstrom, Per Espen Stoknes, 2022-09-20 The economic operating system keeps crashing It's time to upgrade to a new one Five decades ago *The Limits to Growth* shocked the world by showing that population and industrial growth were pushing humanity towards a cliff Today the world recognizes that we are now at the cliff edge Earth has crossed multiple planetary boundaries while widespread inequality is causing deep instabilities in societies There seems to be no way out Earth For All is both an antidote to despair and a road map to a better future Using powerful state of the art computer modeling to explore policies likely to deliver the most good for the majority of people a leading group of scientists and economists from around the world present five extraordinary turnarounds to achieve prosperity for all within planetary limits in a single generation Coverage includes Results of new global modeling that indicates falling well being and rising social tensions heighten risk of regional societal collapses Two alternative scenarios Too Little Too Late vs The Giant Leap and what they mean for our collective future Five system shifting steps that can upend poverty and inequality lift up marginalized people and transform our food and energy systems by 2050

A clear pathway to reboot our global economic system so it works for all people and the planet Written in an open accessible and inspirational style using clear language and high impact visuals Earth For All is a profound vision for uncertain times and a map to a better future This survival guide for humanity is required reading for everyone concerned about living well on a fragile planet BOOK AWARDS FINALIST 2022 Foreword INDIES Ecology Environment
