self-adaptive systems of systems Wätzoldt, Sebastian,Giese, Holger,2015-04-30 An increasing demand on functionality and flexibility leads to an integration of beforehand isolated system solutions building a so called System of Systems SoS Furthermore the overall SoS should be adaptive to react on changing requirements and environmental conditions Due SoS are composed of different independent systems that may join or leave the overall SoS at arbitrary point in times the SoS structure varies during the systems lifetime and the overall SoS behavior emerges from the capabilities of the contained subsystems In such complex system ensembles new demands of understanding the interaction among subsystems the coupling of shared system knowledge and the influence of local adaptation strategies to the overall resulting system behavior

arise In this report we formulate research questions with the focus of modeling interactions between system parts inside a SoS Furthermore we define our notion of important system types and terms by retrieving the current state of the art from literature Having a common understanding of SoS we discuss a set of typical SoS characteristics and derive general requirements for a collaboration modeling language Additionally we retrieve a broad spectrum of real scenarios and frameworks from literature and discuss how these scenarios cope with different characteristics of SoS Finally we discuss the state of the art for existing modeling languages that cope with collaborations for different system types such as SoS

MEDINFO 2021: One World, One Health — Global Partnership for Digital Innovation Paula Otero, Philip Scott, Susan Z. Martin, 2022-08-15 The World Health Organization defines health as a state of complete physical mental and social well being and not merely the absence of disease or infirmity and its constitution also asserts that health for all people is dependent on the fullest co operation of individuals and States The ongoing pandemic has highlighted the power of both healthy and unhealthy information so while healthcare and public health services have depended upon timely and accurate data and continually updated knowledge social media has shown how unhealthy misinformation can be spread and amplified reinforcing existing prejudices conspiracy theories and political biases This book presents the proceedings of MedInfo 2021 the 18th World Congress of Medical and Health Informatics held as a virtual event from 2 4 October 2021 with pre recorded presentations for all accepted submissions The theme of the conference was One World One Health Global Partnership for Digital Innovation and submissions were requested under 5 themes information and knowledge management quality safety and outcomes health data science human organizational and social aspects and global health informatics The Programme Committee received 352 submissions from 41 countries across all IMIA regions and 147 full papers 60 student papers and 79 posters were accepted for presentation after review and are included in these proceedings Providing an overview of current work in the field over a wide range of disciplines the book will be of interest to all those whose work involves some aspect of medical or health informatics **Model and Data Engineering** El Hassan Abdelwahed, Ladjel Bellatreche, Mattéo Golfarelli, Dominique Méry, Carlos Ordonez, 2018-10-19 This book constitutes the refereed proceedings of the 8th International Conference on Model and Data Engineering MEDI 2018 held in Marrakesh Morocco in October 2018 The 23 full papers and 4 short papers presented together with 2 invited talks were carefully reviewed and selected from 86 submissions The papers covered the recent and relevant topics in the areas of databases ontology and model driven engineering data fusion classification and learning communication and information technologies safety and security algorithms and text processing and specification verification and validation Fundamentals of Software Engineering Mehdi Dastani, Marjan Sirjani, 2015-09-24 This book constitutes the thoroughly refereed post conference proceedings of the 6th IPM International Conference on Fundamentals of Software Engineering FSEN 2015 held in Tehran Iran in April 2015 The 21 full papers presented in this volume were carefully reviewed and selected from 64 submissions The topics of interest in FSEN span over

all aspects of formal methods especially those related to advancing the application of formal methods in software industry and promoting their integration with practical engineering techniques
