A Literary Semiotics Approach to the Semantic Universe of George Orwell's Nineteen Eighty-Four Murat Kalelioğlu, 2019-01-03 Semiotics can be considered as a well organized signification journey taken among the pages of the work of art It requires background knowledge related to the field and its analysis tools as well as careful reading practices in the text to reach the projected destination after stopping over in certain stations These stations represent meaning intersections where the meaningful formations are articulated to contribute to the generation of the semantic universe of the text The presentation of such a fictional universe can be complicated because of the nature of the literary work and the language used With regards to Orwell's Nineteen Eighty Four what makes its fiction precious is the masterful acts of the author in both paradigmatic and syntagmatic dimensions This book conducts a semiotic analysis in order to unfold the enigmatic semantic organization of Orwell's Nineteen Eighty Four narrative by penetrating the formative structures at various meaning levels of the text

Materiality and Subject in Marxism, (Post-)Structuralism, and Material Semiotics Johannes Beetz, 2016-08-20 In recent decades what is known as the subject has been problematized by various old and new materialisms and today appears as decentered in and by language split by the unconscious deformed by social forces governed by ideology and is either seen to have succumbed to the postmodern condition or to never have existed in the first place Every materialist theory of the subject depends on a conception of materiality which can delineate the character of what the material reality which de-centers or constitutes the subject consists of

Semiotics in Mathematics Education, 2008-01-01 Current interest in semiotics is undoubtedly related to our increasing awareness that our manners of thinking and acting in our world are deeply indebted to a variety of signs and sign systems language included that surround us Since mathematics is something that we accomplish through written oral bodily and other signs semiotics appears well suited to furthering our understanding of the mathematical processes of thinking symbolizing and communicating Resorting to different semiotic perspectives e.g. Peirce's Vygotsky's Saussure's the authors of this book deal with questions about the teaching and learning of mathematics as well as the history and epistemology of the discipline Mathematics discourse and thinking and the technologically mediated self of mathematical cultural practices are examined through key concepts such as metaphor intentionality gestures interaction sign use and meaning The cover picture comes from Jacob Leupold's 1727 *Theatrum Arithmetico Geometrico* It conveys the cultural historical and embodied aspects of mathematical thinking variously emphasized by the contributors of this book

Boundaries constitute a key concept in Romanticism their transgression their elimination but also their reconstruction By analyzing the triad of sign subject and space this study provides a comprehensive analysis of boundaries in German English and American Romanticism Its trans epochal approach reveals a shared dynamic of a multiplicity of heterogeneous boundary phenomena ranging from the late 18th century to postmodern Romantic texts and constructs a model for the examination of limits a theory of a limitation The known concept of the transgressive Romantic subject is integrated into this triadic model whose primordial site of a limitation however is the semiotics of Romanticism With a creative theoretical design that allows the reader to survey readings of individual texts as well as broader theoretical frameworks *Liminal Semiotics* offers a new perspective on a variety of literary texts and theories ranging from Novalis and Coleridge to Melville and finally to Deleuze and Guattari The thesis was awarded the Ernst Reuter
