Petroleum Abstracts. Literature and Patents ,1990 **Travel and Modernist Literature** Alexandra Peat,2012-03-28 Through close readings of works from Henry James to W E B Du Bois and from Virginia Woolf to Jean Rhys this book discusses how fictional travelers negotiate and adapt various tropes of travel such as quest expatriation displacement and exile as models for their own journeys Specifically Peat considers the ethical dimensions of modernist travel from two distinct vantages The first focuses on the relationship between the secular and the sacred in modernist travel literature arguing that the recurrent narrative of secular travel is haunted by a desire for spiritual transcendence The second posits modernist travel fiction as a potentially positive example of transcultural relations consciously arguing against the received notion that travel during an imperial era is always by nature itself imperialist Throughout particular attention is paid to the transnational nature of modernism and the various global flows traced by modernist literature

Relativistic effects, or light-time shifts? Mammadov, Jabbar Manaf oglu ,2015-01-01 Any unchangeable property of nature can be changed by declaring any of the variables in the formulas describing it to be constant For example one can postulate the constancy of 0 and then and 0 will be variables That is everything depends on the convention In physics wherever the value appears the well known Lorentz coefficient immediately appears nearby In STR keeping the speed of light constant and in GTR its trajectory

constant Einstein obtained an absolutely rectilinear and motionless Reference System In order to obtain the correct result he adapts the surrounding world to it instead in STR changing the length and in GTR the trajectory of the space time continuum Extending Galilean symmetry only to wave equations with the constant Einstein left all other fundamental equations of physics non invariant from the point of view of Galilean symmetry which gave rise to asynchronicities and many unsolved problems in physics This book argues that many known relativistic effects are merely light time shifts and that by replacing t in Galilean transformations with $t + \frac{v}{c^2}x$ to account for signal delays many natural phenomena can be explained within the framework of classical physics
