Redbooks,2013-04-26 In this IBM Redbooks publication we give an overview of different data management topics related to a
typical SAP data center The intrinsic functionality of SAP is not designed to completely handle all the tasks of a data center
by itself but the SAP system offers several interface possibilities to attach external tools to it to accomplish this task We
explain SAP basic concepts and the issues with SAP data management We introduce Tivoli Storage Manager and all of its
products that are related to SAP data management We provide some comparison between database backup and recovery
tools Finally we discuss data archiving using IBM DB2 CommonStore for SAP and discuss high availability requirements and
disaster recovery considerations The second part of this book discusses a practical implementation of SAP backup and
recovery with Tivoli Storage Manager We implement this setup on two separate SAP systems one running DB2 and the other
running Oracle database We also implement LAN free backup and FlashCopy scenarios In the sample implementation section
we show many different tasks such as backup and restore database recovery backup monitoring and tuning We also cover
some advanced backup availability considerations such as split mirror backup and standby databases This book helps
individuals that operate an SAP environment to devise a strategy for a sound and comprehensive data backup solution using
