Bartos, Paul Wehr, 2002-07-15 Human conflict from family feuds to labor strikes to national warfare is an ever present and universal social problem and the methods to manage it a challenge for everyone from average citizens to policymakers and social theorists Using Conflict Theory will educate students about how under what conditions and why conflict erupts and how it can be managed It is a unique classroom book blending theory and practical application and the first to bridge for students the science of social theory and the art of practice *Applying Theory to Generalist Social Work Practice* Carol L. Langer, Cynthia Lietz, 2014-11-25 The social worker's guide to integrating theory and practice Applying Theory to Generalist Social Work Practice teaches aspiring social workers how to apply theory in real world practice Fully aligned with the Council on Social Work Education's 2015 Educational Policy and Accreditation Standards the book links theory to practice with clear concise instruction including a discussion of evidence based practice Twelve commonly used theories are thoroughly explained with discussion of the strengths and limitations of each and applied to real work with individuals groups families communities and organizations The book includes case studies and first person contributions from practicing social workers to illustrate the real world scenarios in which different concepts apply Critical thinking questions help students strengthen their understanding of the ideas presented Tools including a test bank PowerPoint slides and an instructor's manual are available to facilitate classroom use providing a single volume guide to the entire helping process from engagement to termination Practice is a core foundational course for future social workers but many practice texts focus on skills while neglecting the theoretical basis for social work Applying Theory to Generalist Social Work Practice fills that gap by covering both skills and theory in a single text Examines the applications of prevailing social theories Covers the most common theories used in micro mezzo and macro practice Helps readers understand well established approaches like strengths perspective humanistic and client centered task centered and solution focused brief therapy Shows how to apply major theories including ecological system cognitive behavioral conflict empowerment narrative crisis critical and feminist An effective social worker recognizes the link between theory and practice and how the two inform each other to culminate in the most effective intervention and most positive outcome for the client Applying Theory to Generalist Social Work Practice provides students with a roadmap to the full integration of philosophy and application in social work

Conflict in the Miracle Stories Evert-Jan Vledder, 1997-10-01 Matthew's Gospel is a witness to conflicting interests The leaders of Israel are part of the so called retainer class who pursue their own interests by promoting the interests of the Roman rulers Jesus and the Matthaean community on the contrary acts on behalf of the marginalized in society Jesus challenges the underlying values of the leaders who contrary to what is expected do not forgive and act mercifully The leaders try to resolve the conflict negatively by labelling Jesus as possessed by the devil At the same time the conflict spirals onward the Matthaean community is called to act in the interests of the marginalized It is Vledder's special

contribution to Matthaean study that he brings to light the underlying dynamics of this conflict in a stimulating sociological study

Management and Regional Science for Economic Development Manas Chatterji, 1982-11-30 The greatest challenge facing mankind today is the immense disparity in the levels of income among people in different parts of the globe The growth rate of income of the poor countries is consistently far below the rate of the advanced industrialized nations Due to low income and a high propensity to consume there is very little left in these countries for investment A major portion of the resources available is devoted to military expenditures This continual decline in the standard of living coupled with poverty and unemployment will lead to social and political upheaval in these countries which affects developed countries Because of high capacity and low population growth the market of the developed countries is already saturated To maintain the high standard of living in the developed countries it is necessary to have a strong and stable developing world It is gratifying to see that both groups of countries see the need for peaceful economic growth however the amount of cooperation between countries and the material help from the developed countries are far from satisfactory The economic and social scientists have investigated the best way to achieve the transformation from a poverty ridden condition to a decent existence Their studies have proceeded in two different directions One is a more descriptive historical analysis and the other is theoretical model building Although these studies have achieved a relatively high level of perfection one significant factor is sometimes missing
