Participatory Practices in Adult Education Pat Campbell, Barbara Burnaby, 2005-05-18 Although there has been a great deal of rhetoric about learner empowerment in educational and community development circles this book is the first to offer detailed examples of successful participatory practices in adult education spanning a wide range of program settings such as schools institutions communities and the workplace The editors join with practitioner colleagues in the United States and

Canada to document successes to network about ideas from active projects past and present that have had a participatory component to share experience new knowledge lessons learned and reflections The focus is on projects initiated with the intention that greater participation would benefit individuals and groups previously excluded from positions of control The aim is to provide concrete models and suggestions to practitioners who want to develop the participatory nature of their own activities from initiation to organization goal setting and ongoing leadership of adult education programs Some chapters give detailed descriptions of the triumphs and challenges in individual projects while others center more on theoretical analysis and reflection on years of experience All however are rooted in particular experiences and give concrete examples from action Participatory Practices in Adult Education is a vital resource for both new and experienced practitioners including basic educators workplace educators administrators policymakers trainers human resource managers and community development workers who want to learn from the practical experiences of their counterparts and is highly appropriate as a text for courses in adult education and community development

Too Scared To Learn Jenny Horsman,2013-01-11 Too Scared to Learn explores the impact of women s experiences of violence on their learning and proposes radical changes to educational programs through connecting therapeutic and educational discourses Little attention has previously been paid to the impact of violence on learning A large percentage of women who come to adult literacy programs have experienced or are currently experiencing violence in their lives This experience of violence negatively affects their ability to improve their literacy skills Literacy programs and other educational programs have not integrated this reality into their work This book builds on extensive research that revealed the wide range of impacts violence has on adult literacy learning Interviews with counselors and therapists literacy learners and educators working in different situations and a wide range of theoretical and experiential literature form the basis of the analysis Educators are offered information to support reconceptualizing programs and practices and making concrete changes that will enable women to learn more effectively The book makes clear that without an acknowledgment of the impact of violence on learning women rather than getting a chance to succeed and improve their literacy skills get only a chance to fail confirming to themselves that they really cannot learn Essential reading for literacy and adult education practitioners teachers of English as a second language and education theorists Too Scared to Learn explores the intersection among trauma psychological theory and pedagogy The book is filled with a wealth of practical ideas possibilities and thoughts about what practitioners might do differently in classrooms and educational institutions if we begin to think differently about violence
