CED News, 1997 Technology and the Diva Karen Henson, 2016-09-12 In *Technology and the Diva* Karen Henson brings together an interdisciplinary group of scholars to explore the neglected subject of opera and technology Their essays focus on the operatic soprano and her relationships with technology from the heyday of Romanticism in the 1820s and 1830s to the twenty-first century digital age The authors pay particular attention to the soprano in her larger than life form as the diva and they consider how her voice and allure have been created by technologies and media including stagecraft and theatrical lighting journalism the telephone sound recording and visual media from the painted portrait to the high definition simulcast In doing so the authors experiment with new approaches to the female singer to opera in the modern and post modern eras and to the often controversial subject of opera's involvement with technology and technological innovation **A passion for excellence** Tom Peters, Nancy Austin, 1985 2017 7 2017-07-01 LIMA OISTAT 1997 30 g0v 4 A Field on Fire Mark D. Hersey, Ted Steinberg, 2019-01-29 A frank and engaging exploration of the burgeoning academic field of environmental history Inspired by the pioneering work of preeminent environmental historian Donald Worster the contributors to *A Field on Fire: The Future of Environmental History* reflect on the past and future of this discipline Featuring wide ranging essays by leading environmental historians from the United States Europe and China the collection challenges scholars to rethink some of their orthodoxies inviting them to approach familiar stories from new angles to integrate new methodologies and to think creatively about the questions this field is well positioned to answer Worster's groundbreaking research serves as the organizational framework for the collection Editors Mark D Hersey and Ted Steinberg have arranged the book into three sections corresponding to the primary concerns of Worster's influential scholarship the problem of natural limits the transnational nature of environmental issues and the question of method Under the heading *Facing Limits* five essays explore the inherent tensions between democracy technology capitalism and the environment The *Crossing Borders* section underscores the ways in which environmental history moves easily across national and disciplinary boundaries Finally *Doing Environmental History* invokes Worster's work as an essayist by offering self-conscious reflections

about the practice and purpose of environmental history The essays aim to provoke a discussion on the future of the field pointing to untapped and underdeveloped avenues ripe for further exploration A forward thinker like Worster presents bold challenges to a new generation of environmental historians on everything from capitalism and the Anthropocene to war and wilderness This engaging volume includes a very special afterword by one of Worster's oldest friends the eminent intellectual historian Daniel Rodgers who has known Worster for close to fifty years **The Bookman** ,1924 The Apple Book Rosie Sanders,2019-09-03 Rosie Sanders often described as the best painter of the world's most famous fruit has devoted years to researching this book and submitting the apples to hour upon hour of meticulous observation In 144 beautifully detailed watercolours she depicts the unrivalled range of form colour and texture which characterize such varieties as Beauty of Bath Peasgood Nonsuch Cox's Orange Pippin and Egremont Russet Painted with their blossom twig and leaf Rosie offers detailed descriptions of each apple's aroma flavour and season as well as something of the history of each variety The book is enhanced by a practical essay on apple growing by Harry Baker fruit officer for many years at the Royal Horticultural Society and one of Britain's foremost authorities on apple growing
