World Development Report 1997 The State In A Changing World:

World Development Report 1997 ,1997 This is the twentieth in the annual series assessing major development issues The report is devoted to the role and effectiveness of the state what it should do how it should do it and how it can improve in a rapidly changing world Governments with both centrally planned and mixed economies are shrinking their market role because of failed state interventions This report takes an opposite stance that state s role in the institutional environment underlying the economy that is its ability to enforce a rule of law to underpin transactions is vital to making government contribute more effectively to development It argues against reducing government to a minimalist state explaining that development requires an effective state that plays a facilitator role in encouraging and complementing the activities of private businesses and individuals The report presents a state reform framework strategy First focus the state s activities to match its capabilities and second look for ways to improve the state s capability by re invigorating public institutions Successful and unsuccessful examples of states and state reform provide illustrations

Tangri, 1999 This is a survey of the influence of political factors on economic performance throughout Africa with case studies drawn from Ghana Zambia and Uganda It is a comparative study of the difficulties in developing a private enterprise economy *International Assistance and State-University Relations* Jo Bastiaens, 2011-01-13 This book explores the goals efforts and outcomes of international assistance to higher education over the past three decades and investigates how these have impacted changing State university relations Focusing on the case study of Indonesia Bastiaens demonstrates how international aid facilitated and at times actively encouraged changing patterns of state university relations from state control towards greater institutional autonomy Through the use of various case studies from throughout the country and critical analysis of the relationships between international donors and domestic reformers Bastiaens shows how the educational system of Indonesia was able to diversify resources generate income and become increasingly autonomous from government *The Politics of Public Sector Performance* Michael Roll, 2014-01-10 It is widely believed that the state in developing countries is weak The public sector in particular is often regarded as corrupt and dysfunctional This book provides an urgently needed corrective to such overgeneralized notions of bad governance in the developing world It examines the variation in state capacity by looking at a particularly paradoxical and frequently overlooked phenomenon effective public organizations or pockets of effectiveness in developing countries Why do these pockets exist How do they emerge and survive in hostile environments And do they have the potential to trigger more comprehensive reforms and state building This book provides surprising answers to these questions based on detailed case studies of exceptional public organizations and state owned enterprises in Africa Asia the Caribbean Latin America and the Middle East The case studies are guided by a common analytical framework that is process oriented and sensitive to the role of politics The concluding comparative analysis develops a novel explanation for why some public organizations in the developing world beat the odds and turn into pockets of public sector performance and service delivery while most do not This book will be of strong interest to students and scholars of political science sociology development organizations public administration public policy and management **World Development Report 2006** Francisco H. G. Impasse in Bolivia Benjamin Kohl,Linda C. Farthing,2013-07-04 Bolivia has experienced two decades of unprecedented popular resistance to the consequences of neoliberal policies resulting in the resignation and flight of its president in October 2003 This unusual book uncovers the reasons and processes behind the rising opposition mirrored in country after country in Latin America to this currently fashionable internationally prescribed approach to economic development It explores the problems faced by governments in reproducing global strategies at the national level the tensions between markets and democracy state restructuring citizenship and property rights It points to the problems inherent in retaining neoliberalism as the dominant paradigm in Latin America for the foreseeable future and the unlikely prospect of it putting down real roots of approval and legitimacy Neo-Liberalism, State Power and Global Governance Simon Lee,Stephen McBride,2007-09-09

This book explores the relationship between neo liberalism state power and global governance exploring national differences in the exercise of state power in a variety of industrialized and developing economies Among the strengths of this volume are its detailed global scope its range of case studies in diverse policy areas its analysis and critique of neo liberalism in theory and practice and its impact upon state power and global governance **International Organization** John J.

Kirton,2017-05-15 For well over a century international organizations have been central to the study and practice of international relations and global governance But how much and how do they help hinder or otherwise alter the behaviour of the actors who utilize them and provide public goals for the global community as a whole By assembling the leading works that have defined the scholarly field of international organization from realist liberal institutionalists constructivists and

political economy traditions this work examines the many organizations which have formed in ever expanding numbers and fields over the years the degree to which they have succeeded and their future potential It looks at the changing international arena particularly with the expansion of civil society and how that affects the role of such organizations Has a formula for an effective and successful international organization developed or will one have to wait for the next generation of organizations institutions and regimes

Recharacterizing Restructuring Kerry Rittich,2002-10-16 In the last decade market centered economic reforms have been implemented in a wide range of developing and transitional countries under the auspices of the international financial institutions Whether or not they deliver the promised prosperity they appear to be associated with widening economic inequality as well as disadvantage for particular social groups among them women and workers Recharacterizing Restructuring argues that such effects are neither temporary nor accidental Instead efforts to promote growth through greater efficiency inevitably engage distributive concerns Change in the status of different groups is connected to the process of legal and institutional reform Part I analyzes the place of law and institutional reform in current economic restructuring policies Through post realist legal analysis and institutional economics it discusses the role of background legal rules in the allocation of resources and power among different groups Part II traces how disadvantage might result for women in the course of economic reform through an analysis of the World Bank s proposals for states in transition from plan to market economies It considers such foundational issues as the place of unpaid work in economic activity as well as the gendered nature of proposals to re organize productive activity and the role of the state From Pinochet to the 'Third Way' Marcus Taylor,2006-06-20 This is a comprehensive analysis of three decades of neoliberal policies in Chile from the Pinochet dictatorship until today Chile is often described as a model of neoliberal development policy Marcus Taylor questions this description Examining the contradictions of neoliberalism he demonstrates how it has created a society that is deeply ridden with inequalities Taylor shows how the tensions that arose from this social inequality led to the emergence of a Third Way neoliberalism in the post dictatorship period Taylor argues that this new development paradigm has failed This is a result of the inability of Third Way neoliberalism to transform social relationships and institutions The nature of this failure affects the direction of popular movements for social change in Latin America during a time of renewed social and political upheaval

Good Governance in Nigeria Portia Roelofs,2023-04-20 Drawing on original fieldwork in Nigeria Portia Roelofs reconsiders what good governance means focusing on accountability and transparency *The Korean Developmental State* Iain Pirie,2007-09-12 The Korean Developmental State is a comprehensive and up to date analysis of processes of state and economic restructuring in South Korea since the 1997 crisis The book distinguishes itself from previous studies by consistently arguing that structural changes in the global political economy have played a crucial role in reshaping the Korean state s own economic project More precisely Iain Pirie seeks to demonstrate how the Korean state increasingly adopted neo liberal policies from the 1980s onwards as a rational response to the

evolution of global economic structures an evolution which has been driven by the continuous attempts of major global firms and leading capitalist states to overcome the chronic profitability problems that have dogged the core capitalist area since the late 1960s The radical restructuring programme the Korean state initiated after the 1997 crisis must be understood as a logical conclusion to these earlier more incremental processes of reform it initiated almost two decades earlier This book seeks to establish the neo liberal character of the Korean state through a close analysis of key institutional and policy reforms and serious engagement with more theoretical debates concerning the nature of the neo liberal state itself The Korean Developmental State offers a new perspective on the economic experience of Korea as a development model one that emphasizes global trends and contradictions for Korea s economic crisis and resulting transformation and as such will be of significant interest to scholars of Korean studies and the Asian economy

Asia after the Developmental State Toby Carroll, Darryl S. L. Jarvis, 2017-10-12 Asia after the Developmental State presents cutting edge analyses of state society transformation in Asia under globalisation The volume incorporates a variety of political economy and public policy oriented positions and collectively explores the uneven evolution of new public management and neoliberal agendas aimed at reordering state and society around market rationality Taken together the contributions explore the emergence of marketisation across Asia including China Japan South Korea Indonesia Malaysia and Vietnam what is now often described as the world s most economically dynamic region and the degree to which marketisation has taken root in what forms and how this is impacting state society and market relationships

Globalisation and the Environment Perspectives from OECD and Dynamic Non-Member Economies OECD, 1998-03-25 Globalisation is changing the context of environmental management at national regional and global levels and is creating new challenges to and opportunities for the public and private sectors in the transition to sustainable development This volume presents papers on these subjects

Political Economy of Transition Jozef M. van Brabant, 2012-11-12 This book addresses the policy questions surrounding the challenge of transforming eastern European economies from their planned administrative past to vibrant market based entities Jozef van Brabant considers in turn the wider set of challenges facing these economies stabilization privatization liberalization institution building and developing and maintaining the sociopolitical consensus before examining the evolving role of the state Using concrete examples from the eastern European countries throughout including the Czech Republic and Bulgaria this work systematically examines in a society wide context the initial conditions of transformation the policy tasks ahead and the manner in which policies have been pursued
