

An aerial photograph of a suburban neighborhood with houses, streets, and green spaces. A white line graphic is overlaid on the image, starting from the top left, curving down, then running horizontally with a small circle in the middle, then curving down again to the right, and finally curving down to the bottom left. The line ends in small circles at the top right and bottom left, and has a larger circle in the middle of the horizontal segment.

Transport For Suburbia Beyond The Automobile Age:

Transport for Suburbia Paul Mees, 2009-12 The need for effective public transport is greater than ever in the 21st century With countries like China and India moving towards mass automobility we face the prospects of an environmental and urban health disaster unless alternatives are found It is time to move beyond the automobile age But while public transport has worked well in the dense cores of some big cities the problem is that most residents of developed countries now live in dispersed suburbs and smaller cities and towns These places usually have little or no public transport and most transport commentators have given up on the task of changing this it all seems too hard This book argues that the secret of European style public transport lies in a generalizable model of network planning that has worked in places as diverse as rural Switzerland the Brazilian city of Curitiba and the Canadian cities of Toronto and Vancouver It shows how this model can be adapted to suburban exurban and even rural areas to provide a genuine alternative to the car and outlines the governance funding and service planning policies that underpin the success of the world's best public transport systems Back cover

Governance and Sustainable Urban Transport in the Americas Jean Mercier, Fanny Tremblay-Racicot, Mario Carrier, Fábio Duarte, 2018-09-29 This volume explores the governance patterns of three cities of the Americas Seattle Montreal and Curitiba which all present different but interesting cases in dealing with sustainable urban transport challenges The authors study empirical data from these three cities to analyze how specific governmental and policy instruments planning consultation and market mechanisms for example were implemented in each case Through concepts coming from policy studies and sociology for example such as path dependency institutional culture and transaction costs the three cities are also looked at in a broader perspective in order to better understand how they deal differently with their common challenges

Public City Beau B Beza, Brendan Gleeson, 2014-11-25 Paul Mees urban ideal counted on watchful confident and well informed citizenry to work collectively in a quest for fair and just cities As such The Public City is largely a critique of neo liberalism and its arguably negative influence on urban prospects As Mees explained it neo liberal urbanism was much more than a political aberration it was a threat that imposed many costly failures in an age overshadowed by grave ecological challenges Fifteen of Australia and New Zealand s leading urban scholars including Professor Emeritus Jean Hillier and Professor Brendan Gleeson have contributed to this collection The Public City includes a foreword by the late Professor Sir Peter Hall a world leader in urban planning from Britain Kenneth Davidson one of Australia s top economic columnists has also contributed a chapter The collective works in this book extend beyond an analysis of urban patterns to provide a blueprint for the improvement of civic and institutional purpose in the creation of the public city

Planning and Design for Sustainable Urban Mobility Un-Habitat, 2013-10-30 Urban transport systems worldwide are faced by a multitude of challenges Among the most visible of these are the traffic gridlocks experienced on city roads and highways all over the world The prescribed solution to transport problems in most cities has thus been to build more infrastructures for cars with a limited number of cities improving public transport systems in a sustainable manner However a number of challenges faced by urban transport systems such as greenhouse gas emissions noise and air pollution and road traffic accidents do not necessarily get solved by the construction of new infrastructure Planning and Design for Sustainable Urban Mobility argues that the development of sustainable urban transport systems requires a conceptual leap The purpose of transportation and mobility is to gain access to destinations activities services and goods Thus access is the ultimate objective of transportation As a result urban planning and design should focus on how to bring people and places together by creating cities that focus on accessibility rather than simply increasing the length of urban transport infrastructure or increasing the movement of people or goods Urban form and the functionality of the city are therefore a major focus of this report which highlights the importance of integrated land use and transport planning This new report of the United Nations

Human Settlements Programme UN Habitat the world's leading authority on urban issues provides some thought provoking insights and policy recommendations on how to plan and design sustainable urban mobility systems The Global Report on Human Settlements is the most authoritative and up to date global assessment of human settlements conditions and trends Preceding issues of the report have addressed such topics as Cities in a Globalizing World The Challenge of Slums Financing Urban Shelter Enhancing Urban Safety and Security Planning Sustainable Cities and Cities and Climate Change *The Routledge Handbook of Urban Design Research Methods* Hesam Kamalipour, Patricia Aelbrecht, Nastaran Peimani, 2023-08-24 As an evolving and contested field urban design has been made unmade and remade at the intersections of multiple disciplines and professions It is now a decisive moment for urban design to reflect on its rigour and relevance This handbook is an attempt to seize this moment for urban design to further develop its theoretical and methodological knowledge base and engage with the question of what urban design can be with a primary focus on its research This handbook includes contributions from both established and emerging scholars across the global North and global South to provide a more field specific entry point by introducing a range of topics and lines of inquiry and discussing how they can be explored with a focus on the related research designs and methods The specific aim scope and structure of this handbook are appealing to a range of audiences interested and or involved in shaping places and public spaces What makes this book quite distinctive from conventional handbooks on research methods is the way it has been structured in relation to some key research topics and questions in the field of urban design regarding the issues of agency affordance place informality and performance In addition to the introduction chapter this handbook includes 80 contributors and 52 chapters organised into five parts The commissioned chapters showcase a wide range of topics research designs and methods with references to relevant scholarly works on the related topics and methods *Human Transit, Revised Edition* Jarrett Walker, 2024-02-06 The first edition of Human Transit published in 2011 has become a classic for professionals advocates and interested citizens Walker has updated and expanded the book to deepen its explanations New topics include the problem with specialization the role of flexible or demand response services how to know when to redesign your network and responding to tech industry claims that transit will soon be obsolete Finally he has also added a major new section exploring the idea of access to opportunity as a core measure of transit's success No other book explains the basic principles of public transit in such lively and accessible prose all based on a respect for your right to form your own opinion Walker's goal is not to make you share his values but to give you the tools to clarify and advocate for yours *Bicycle Justice and Urban Transformation* Aaron Golub, Melody Hoffmann, Adonia Lugo, Gerardo Sandoval, 2016-07-15 As bicycle commuting grows in the United States the profile of the white middle class cyclist has emerged This stereotype evolves just as investments in cycling play an increasingly important role in neighborhood transformations However despite stereotypes the cycling public is actually quite diverse with the greatest share falling into the lowest income categories *Bicycle Justice and Urban Transformation*

demonstrates that for those with privilege bicycling can be liberatory a lifestyle choice whereas for those surviving at the margins cycling is not a choice but an often oppressive necessity Ignoring these invisible cyclists skews bicycle improvements towards those with choices This book argues that it is vital to contextualize bicycling within a broader social justice framework if investments are to serve all street users equitably Bicycle justice is an inclusionary social movement based on furthering material equity and the recognition that qualitative differences matter This book illustrates equitable bicycle advocacy policy and planning In synthesizing the projects of critical cultural studies transportation justice and planning the book reveals the relevance of social justice to public and community driven investments in cycling This book will interest professionals advocates academics and students in the fields of transportation planning urban planning community development urban geography sociology and policy

Planning Australia Susan Thompson, Paul Maginn, 2012-02-17 Planning Australia provides a comprehensive introduction to the major issues and activities that constitute urban and regional planning in Australia today Incorporating contemporary theory and practice it contextualises planning in terms of its theoretical ideological and professional foundations The book adopts an interdisciplinary approach to the subject underpinned by the principles of sustainability and social equity It canvasses the history of the discipline its relationship to broader governance structures and its legislative framework Fully revised and updated this edition features new chapters on healthy planning and transport planning Written in an accessible style and richly illustrated with instructive case study examples Planning Australia is an indispensable resource for students practitioners and decision makers as well as anyone interested in the history and future of planning in Australia

Cycling Futures Jennifer Bonham, Marilyn Johnson, 2015-12-04 The focus of

the first half of the book is largely on the current engagement with cycling challenges faced by existing and would be cyclists and the issues cycling might address The second half of the book is concerned with strategies and processes of change Contributors working from different ontological positions reflect on changing socio spatial relations to enable the broadest possible participation in cycling Transporting Moments: Mobility, Australian Railways and the Trained Society Colin Symes,2015-04-06 Sociologists have suggested that being on the move entails a complex choreography comprised of passenger comportment signage announcements and posters Employing insights from mobility theory *Transporting moments* provides an account of railway culture from a passenger s perspective The book uses the context of commuting in Sydney at a time when elements of its intra urban rail network were being upgraded as its principal case study This upgrade covers its rolling stock infrastructure and linguistic landscape It is argued that understanding the rationale behind these changes requires an understanding of the historical and policy context in which the railways of Sydney s New South Wales and Australia are embedded This is also the case with the nation s long distance trains whose operators have fought hard to stave off competition from airliners and cars *Transporting moments* therefore presents strong case for preserving public transport as a more equitable and sustainable form of mobility Governments Australian or otherwise can use these insights for productive investment in their rail networks and public transportation service in general and for reducing the nation s addiction to the automobile With its invaluable insights into travelling on trains *Transporting moments* is a fascinating addition to the growing corpus of literature on day to day mobility Changing Asian Urban Geographies Fulong Wu,Roger Keil,2023-06-06 This book investigates changing geographies of fast growing Asian metropolitan regions in particular their peripheral areas Through examining the intersection of global suburbanisation and Asian urbanism the book depicts a complex sub urban world in Asia It explains how the forces of globalisation the logic of capital accumulation and the history of rural urban divide and interaction path dependent local institutions and government policies work together to reshape the geographies of Asian urbanism Touching on social environmental governance and planning aspects of contemporary urban Asia the chapters in this volume provide grounded studies of residential relocation and changing rural settlements property development by a congregation of developers political ecologies of water provision middle class consumers and local state agencies transit oriented development and infrastructure finance in peri urban areas It demonstrates an assemblage of actors and coexistence of multiple urban governance regimes with everyday negotiations *Changing Asian Urban Geographies* will be interesting not only to those who wish to know more about Asian urban geographies but also to scholars and students wishing to see Asian metropolises in a comparative perspective of sub urban dynamics The chapters in this book were originally published in *Urban Geography* Improving Urban Access Elliott Sclar,Måns Lönnroth,Christian Wolmar,2016-03-31 By 2050 two thirds of the world s population will live in cities To thrive they will need efficient and sustainable forms of transport but to achieve this the financial incentives guiding urban transport operation must change and

change rapidly Urban transport plays a critical role in determining the social environmental and economic shape of cities Improving Urban Access New Approaches to Funding Transport Investment provide innovative ideas on how we might reorganize transport finance to ensure that it is suited to serving the social environmental and economic principles that must guide future urban living Continuing the work begun by its predecessor Urban Access for the 21st Century the authors assess the complexity of implementing new finance approaches and suggest ways to make positive and radical changes Although the range of revenue raising options remain limited to users indirect beneficiaries and the general public these can be recast to transform the way transport is paid for and therefore how its services are delivered New finance models only succeed when they are intrinsically linked to the economic social cultural and political forces that create urban life Together these volumes provide a starting point for the deeper research and policy design needed to successfully create urban transport finance systems that can address the challenges that 21st century cities present **Mobility, Sociability and**

Well-being of Urban Living Donggen Wang, Shenjing He, 2015-12-16 This book investigates critical urban issues related to socio spatial segregation housing daily travel mobility of the elderly etc from the perspective of wellbeing This is a collection of the latest research works by frontline researchers working in the fields of geography urban studies transport and sociology Drawing on theoretical and empirical explorations collected chapters in this book connect mobility and wellbeing bridge geography and health and analyze the implications of mobility disadvantages on urban marginal groups wellbeing Research findings presented in the book are also highly relevant for practitioners and policy makers in the pursuit of improving urban livability since wellbeing or quality of life is increasingly considered as an important criteria alternative to income growth to evaluate economic social and urban development *The Routledge Handbook of Australian Urban and Regional Planning*

Neil Sipe, Karen Vella, 2017-08-25 Where is planning in twenty first century Australia What are the key challenges that confront planning What does planning scholarship reveal about the state of planning practice in meeting the needs of urban and regional Australians The Routledge Handbook of Australian Urban and Regional Planning includes 27 chapters that answer these and many other questions that confront planners working in urban and regional areas in twenty first century Australia It provides a single source for cutting edge thinking and research across a broad range of the most important topics in urban and regional planning Divided into six parts this handbook explores contexts of urban and regional planning in Australia critical debates in Australian planning planning policy climate change disaster risk and environmental management engaging and taking planning action planning education and research This handbook is a valuable resource for advanced undergraduate and postgraduate students in urban planning built environment urban studies and public policy as well as academics and practitioners across Australia and internationally Planning for Rural Resilience Wayne J.

Caldwell, 2015-05-15 Climate change and an evolving non renewable energy sector threaten the future viability and sustainability of communities across the country While rural communities have a special place in the national fabric they

often lack the resources to tackle these important and evolving threats Planning for Rural Resilience Coping with Climate Change and Energy Futures makes clear that communities and municipalities have opportunities to make informed and constructive decisions in the face of uncertainty many of these decisions are win win in the sense that they benefit the community in the short term while also building resilience for the future Case studies include a town rebuilding itself after a tornado and an individual farmer s commitment to creating a resilient farm They provide examples of innovative successful and practical on the ground actions and strategies Planning for Rural Resilience asks central questions about the nature of change and the ability to adapt in rural regions While change is often feared communities have capacity that can be rallied harnessed and turned towards planning policy and action that responds to threats to the future This important work will assist municipal decision makers planners and community members as well as anyone who has a passion for the future and betterment of rural life

Planning Melbourne Robin Goodman,Michael Buxton,Susie Moloney,2016-07 For more than a decade Melbourne has had the fastest growing population of any Australian capital city It is expanding outward while also growing upward through vast new high rise developments in the inner suburbs With an estimated 1.6 million additional homes needed by 2050 planners and policymakers need to address current and emerging issues of amenity function productive capacity and social cohesion today Planning Melbourne reflects on planning since the post war era but focuses in particular on the past two decades and the ways that key government policies and influential individuals and groups have shaped the city during this time The book examines past debates and policies the choices planners have faced and the mistakes and sound decisions that have been made Current issues are also addressed including housing affordability transport choices protection of green areas and heritage and urban consolidation If Melbourne s identity is to be shaped as a prospering socially integrated and environmentally sustainable city a new approach to governance and spatial planning is needed and this book provides a call to action

Streetcars and the Shifting Geographies of Toronto Brian Doucet,Michael Doucet,2022-03-01 When looking at old pictures of Toronto it is clear that the city s urban economic and social geography has changed dramatically over the generations Historic photos of Toronto s streetcar network offer a unique opportunity to examine how the city has been transformed from a provincial industrial city into one of North America s largest and most diverse regions Streetcars and the Shifting Geographies of Toronto studies the city s urban transformations through an analysis of photographs taken by streetcar enthusiasts beginning in the 1960s These photographers did not intend to record the urban form function or social geographies of Toronto they were accidental archivists whose main goal was to photograph the streetcars themselves But today their images render visible the ordinary day to day life in the city in a way that no others did These historic photographs show a Toronto before gentrification globalization and deindustrialization Each image has been re photographed to provide fresh insights into a city that is in a constant state of flux With gorgeous illustrations this unique book offers an understanding of how Toronto has changed and

the reasons behind these urban shifts The visual exploration of historic and contemporary images from different parts of the city helps to explain how the major forces shaping the city affect its form functions neighbourhoods and public spaces
