Transcultural Realities Interdisciplinary Perspectives On Crosscultural Relations:

Transcultural Realities Virginia H. Milhouse, Molefi Kete Asante, Peter O. Nwosu, 2001-07-24 This text challenges the quantitative social science perspective on intercultural communication by examining critical issues from diverse perspectives. Key topics include historical and religious perspectives, racial and ethnic issues, cross-cultural adaptation, and methods of researching other cultures. The book takes a more critical cultural worldview of intercultural communication, including some of the major thinkers of the contemporary times including Molefi Kete Asante, Ama Mazama, Anthony Monteiro, and Ali Mazrui. It is constructed so that professors and students of any cultural group might use it.

Transcultural Realities Virginia H. Milhouse, Molefi Kete Asante, Peter O. Nwosu, 2001-07-24 *Transcultural Realities* is an important collection of essays written by an outstanding cast of critical scholars who discuss the importance of transculture in interdisciplinary contexts. The primary goal of the contributors is to help the reader to understand that a state of community or harmony cannot be achieved in the world until we are all ready to accept different cultural forms, norms, and orientations. In this book, transculture is defined as a form of culture created not from within separate spheres but in the holistic forms of diverse cultures. It is based on the principle that a single culture in and of itself is incomplete and requires interaction and dialogue with other cultures. *Transcultural Realities* is divided into five parts: Transcultural issues in international and cross-cultural contexts; Historical and religious struggles within and between nations; Socially constructed racial identities and their consequences for transculturalism in the United States; The transformative effects of sojourning in diverse cultural environments; The fundamentals of transcultural research. Editors Virginia H. Milhouse, Molefi Kete Asante, and Peter O. Nwosu set out to meet three specific needs. First, that the book's interdisciplinary approach to theory and practice in cross-cultural relations will make it an important book for several fields of study including intercultural and interpersonal communication, international relations, human relations, psychology, anthropology, philosophy, and sociology. Second, that the book will be a reference tool for scholars of transcultural research, providing up-to-date information on cross-cultural relations that are transcultural in nature. And finally, through the use of research, is critical to a fuller understanding of cross-cultural relations in a transcultural world.

Transcultural English Studies Frank Schulze-Engler, Sissy Helff, 2009 What is most strikingly new about the transcultural is its sudden ubiquity. Following in the wake of previous concepts in cultural and literary studies such as creolization, hybridity, and syncretism, and signalling a family relationship to terms such as transnationality, translocality, and transmigration, transcultural terminology has unobtrusively but powerfully edged its way into contemporary theoretical and critical discourse. The four sections of this volume denote major areas where transcultural questions and problematics have come to the fore: theories of culture and literature that have sought to account for the complexity of culture in a world increasingly characterized by globalization, transnationalization, and interdependence; realities of individual and collective life worlds shaped by the ubiquity of phenomena and experiences relating to transnational connections and the blurring of

cultural boundaries fictions in literature and other media that explore these realities negotiate the fuzzy edges of ethnic or national cultures and participate in the creation of transnational public spheres as well as transcultural imaginations and memories and finally pedagogy and didactics where earlier models of teaching other cultures are faced with the challenge of coming to terms with cultural complexity both in what is being taught and in the people it is taught to and where target cultures have become elusive The idea of locating culture and literature exclusively in the context of ethnicities or nations is rapidly losing plausibility throughout an English speaking world that has long since been multi rather than monolingual Exploring the prospects and contours of Transcultural English Studies thus reflects a set of common challenges and predicaments that in recent years have increasingly moved centre stage not only in the New Literatures in English but also in British and American studies

Implementing Cross-Culture Pedagogies Pham Thi Hong Thanh,2013-11-27 During the last two decades Confucian heritage culture countries have widely promoted teaching and learning reforms to advance their educational systems To skip the painfully long research stage Confucian heritage culture educators have borrowed Western philosophies and practices

with the assumption that what has been done successfully in the West will produce similar outcomes in the East. The wide importation of cooperative learning practices to Confucian heritage culture classrooms recently is an example. However, cooperative learning has been documented in many studies not to work effectively in Confucian heritage culture classrooms. The reason is that the educators often impose this instructional method on the students without a careful consideration of its appropriateness in the socio-cultural context of Confucian heritage culture countries. This procedure is not effective and professional because learning does not stand alone. Rather, it is shaped and influenced by other factors including teaching methods, learning tasks, assessment demands, workload, and the learning culture of students in the local context. For cooperative learning to work effectively in Confucian heritage culture classrooms, reformers need to consider the importation of this approach in line with a careful examination of all supports and constraints that affect those factors that are associated with learning. The volume provides an applied theoretical framework and culturally appropriate and practical instructions that could assist Confucian heritage culture educators and teachers to address various factors at multiple levels in order to optimize success in importing cooperative learning to their classrooms. Overall, it provides strategies to assist Confucian heritage culture teachers to change their teaching practices, redesign lessons, plans, design assessment methods, and organize learning activities in a manner that can influence Confucian heritage culture students to shift from employing teacher-centered learning approaches to cooperative learning.

A Transdisciplinary Approach to International Teaching Assistants
Stephen Daniel Looney, Shereen Bhalla, 2019-09-26

North American universities depend on international teaching assistants (ITAs) as a substantial part of the teaching labor force, which has led to the idea of an ITA problem: a deficiency model which is framed as a divergence between ITAs' linguistic competence and undergraduates and their parents' expectations. This outdated positioning of ITAs as deficient diminishes the invaluable role they play within the academy. This book argues instead for an approach to ITA which recognizes them as multilingual skilled migrant professionals who participate in and are discursively constructed through various participant frameworks, modalities, and activities. The chapters in this volume offer state-of-the-art research into ITA using a variety of methods and approaches and as such constitute a transdisciplinary perspective which argues for the importance of dialogue between research and practice.

Boundary Spanners of Humanity
R. S. Zaharna, 2022

Written by a leading scholar of public diplomacy, *Boundary Spanners of Humanity* introduces a pan-human vision of communication that can revolutionize how we collaborate to solve global problems. Never before has humanity enjoyed better technological capabilities for interconnection than today. Ironically, rather than benefiting from the global pool of human resources and intellectual wealth to solve shared problems, nations are experiencing public discord and global divisions. *Boundary Spanners of Humanity* tackles the challenge of how to enhance global collaboration by introducing three pan-human logics of human communication and public diplomacy that can transform how we view diversity in an interconnected world. R. S. Zaharna begins by asking why the very tools needed for global collaboration, communication, and

public diplomacy are undermining our efforts to work together Her research reveals how contemporary communication is based on a nineteenth century mindset of separateness that divided people into mutually exclusive cultural and national categories That mindset reinforces human divisions and erodes global collaboration In a radical break from conventional models Zaharna introduces a vision of humanity centered public diplomacy featuring three complementary logics of communication Zaharna s innovative approach stems from decade long interdisciplinary research that spans from ancient cosmologies to emerging neurobiology She draws on a rich array of global examples from ancient and indigenous precolonial diplomacies to spontaneous online communication during the Covid 19 pandemic to provide insights into overlooked aspects of emotion empathy spirituality and synchrony in how nations and people communicate in the global arena Ambitiously conceived this book will bring a new global understanding of how to conduct public diplomacy for the world s boundary spanners those who would find commonality among our many divisions and collaborate on humanity s shared global problems
