Transnational Migration And Human Security Transnational Migration And Human Security:

Transnational Migration and Human Security Thanh-Dam Truong, Des Gasper, 2011-06-07 The volume places the migration development security nexus in the field of transnational studies Rather than treating these three categories as self evident the essays excavate aspects of power and privilege built into their governing frameworks and conflicting rationales apparent in practices of control Bringing together diverse experiences and case studies the volume highlights the problematic nature of maintaining distinct and disconnected frameworks of governance It argues for a new approach that demonstrates the significance and usefulness of comparative ethics in conceptualising migration from a human centered and gendered perspective in order to address the multi faceted and multi dimensional nature and meanings of security

Migration, Gender and Social Justice Thanh-Dam Truong, Des Gasper, Jeff Handmaker, Sylvia I. Bergh, 2013-09-06 This book is the product of a collaborative effort involving partners from Africa Asia Europe and Latin America who were funded by the International Development Research Centre Programme on Women and Migration 2006 2011 The International Institute of Social Studies at Erasmus University Rotterdam spearheaded a project intended to distill and refine the research findings connecting them to broader literatures and interdisciplinary themes The book examines commonalities and differences in the operation of various structures of power gender class race ethnicity generation and their interactions within the institutional domains of intra national and especially inter national migration that produce context specific forms of social injustice Additional contributions have been included so as to cover issues of legal liminality and how the social construction of not only femininity but also masculinity affects all migrants and all women The resulting set of 19 detailed interconnected case studies makes a valuable contribution to reorienting our perceptions and values in the discussions and decision making concerning migration and to raising awareness of key issues in migrants rights All chapters were anonymously peer reviewed This book resulted from a series of projects funded by the International Development Research Centre IDRC Canada

Irregular Migration and Human Security in East Asia Jiyoung Song, Alistair D. B. Cook, 2014-08-13 Across East Asia intra regional migration is more prevalent than inter regional movements and the region s diverse histories geopolitics economic development ethnic communities and natural environments make it an excellent case study for examining the relationship between irregular migration and human security Irregular migration can be broadly defined as people s mobility that is unauthorised or forced and this book expands on the existing migration security nexus by moving away from the traditional state security lens and instead shifting the focus to human security With in depth empirical country case studies from the region including China Japan North Korea the Philippines Burma Myanmar Cambodia Thailand and Singapore the contributors to this book develop a human security approach to the study of irregular migration In cases of irregular migration such as undocumented labour migrants asylum seekers internally displaced people trafficked persons and smuggled people human security is the cause and or effect of migration in both sending and receiving countries By

adopting a human security lens the chapters provide striking insights into the motivations vulnerabilities and insecurities of migrants the risks dangers and illegality they are exposed to during their journeys as well as the potential or imagined threats they pose to the new host countries This multidisciplinary book is based on extensive fieldwork and interviews with migrants aid workers NGO activists and immigration officers As such it will appeal to students and scholars of Asian politics and security as well as those with interests in international relations social policy law geography and migration

Human Security, Changing States and Global Responses Sangmin Bae, Makoto Maruyama, 2014-12-05 This book critically assesses the human security challenges faced by states focusing on how and to what extent the state is influenced by global structures and operations Having grown rapidly since the 1990s the field of human security has spawned a wide variety of academic research This research has helped to reconceptualize the notion of security both broadening and deepening it and it has created a space where unconventional and multidimensional forms of security inform international policy practices However while various issues and cases of human security have received growing academic attention and policy interest many of the existing books on human security focus primarily on non state actors This leaves a key question unanswered why do sovereign states take on leadership roles in promoting human security To answer the question of why and how national governments influence international human security policy this volume examines the domestic political factors and structures that mediate the range of policy choices Important domestic variables include the cultural match e g Does the country often favor multilateralism and promote a rule bound international society the nature of the political interests and realities that are present e g Does the country see the promotion of human security as a strategic choice and the occurrence of important historical events such as wars revolutions or natural disasters e g Does the country during the crisis help to foster a new way of managing enduring security threats Using this line of analysis the book illuminates the role of the state in handling critical human security issues and its rationale for doing so This book will be of much interest to students of human security peace studies global governance development studies and IR in general

Human Security and Human Rights under International Law Dorothy Estrada-Tanck, 2016-12-01 Human security provides one of the most important protections a person centred axis of freedom from fear from want and to live with dignity It is surprising given its centrality to the human experience that its connection with human rights has not yet been explored in a truly systematic way This important new book addresses that gap in the literature by analysing whether human security might provide the tools for an expansive and integrated interpretation of international human rights The examination takes a two part approach Firstly it evaluates convergences between human security and all human rights civil political economic social and cultural and constructs an investigative framework focused on the human security human rights synergy It then goes on to explore its practical application in the thematic cores of violence against women and undocumented migrants in the law and case law of UN European Inter American and African human rights bodies It takes both a legal and interdisciplinary approach recognising that human

security and its relationship with human rights cuts across disciplinary boundaries Innovative and rigorous this is an important contribution to human rights scholarship **Human Security and Migration in Europe's Southern Borders** Susana Ferreira, 2018-12-13 This book examines the management of migratory flows in the Mediterranean within an international security perspective The intense migratory flows registered during the year 2015 and the tragedies in the Mediterranean Sea have tested the mechanisms of the Union's immigration and asylum policies and its ability to respond to humanitarian crises Moreover these flows of varying intensities and geographies represent a threat to the internal security of the EU and its member states By using Spain and Italy as case studies the author theorizes that the EU given its inability to adopt and implement a common policy to effectively manage migratory flows on its Southern border uses a deterrence strategy based on minimum common denominators

Routledge Handbook of Human Security Mary Martin, Taylor Owen, 2013-11-07 This Handbook will serve as a standard reference guide to the subject of human security which has grown greatly in importance over the past twenty years Human security has been part of academic and policy discourses since it was first promoted by the UNDP in its 1994 Human Development Report Filling a clear gap in the current literature this volume brings together some of the key scholars and policy makers who have contributed to its emergence as a mainstream concept including Nobel prize winner Amartya Sen and Sadako Ogata who jointly chaired the 2001 Commission on Human Security Drawing upon a range of theoretical and empirical analyses the Handbook provides examples of the use of human security in policies as diverse as disaster management arms control and counter terrorism and in different geographic and institutional settings from Asia to Africa and the UN It also raises important questions about how the concept might be adapted and operationalised in future Over the course of the book the authors draw on three key aspects of human security thinking Theoretical issues to do with defining human security as a specific discourse Human security from a policy and institutional perspective and how it is operationalised in different policy and geographic contexts Case studies and empirical work Featuring some of the leading scholars in the field the Routledge Handbook of Human Security will be essential reading for all students of human security critical security conflict and development peace and conflict studies and of great interest to students of international security and IR in general

Handbook of Security Science Anthony J. Masys, 2022-09-27 This handbook offers insights into how science physical natural and social and technology can support new developments to manage the complexity resident within the threat and risk landscape The security landscape can be described as dynamic and complex stemming from the emerging threats and risks that are both persistent and transborder Globalization climate change terrorism transnational crime can have significant societal impact and forces one to re evaluate what national security means Recent global events such as mass migration terrorist acts pandemics and cyber threats highlight the inherent vulnerabilities in our current security posture As an interdisciplinary body of work the Handbook of Security Science captures concepts theories and security science applications thereby providing a survey of current and emerging

trends in security Through an evidence based approach the collection of chapters in the book delivers insightful and comprehensive articulation of the problem and solution space associated with the complex security landscape In so doing the Handbook of Security Science introduces scientific tools and methodologies to inform security management risk and resilience decision support systems insights supporting design of security solutions approaches to threat risk and vulnerability analysis articulation of advanced cyber security solutions and current developments with respect to integrated computational and analytical solutions that increase our understanding of security physical social economic and technological interrelationships and problem space Haven: The Mediterranean Crisis and Human Security John

Morrissey,2020-10-30 The Mediterranean refugee crisis presents states across Europe with a common security challenge how to intervene responsibly in mitigation and support This book seeks to advance the UN concept of human security in showing how a human security approach to the crisis can effectively conceptualize and respond to the intricacies of the challenges faced It argues for a politics of solidarity in proffering integrated solutions that call out the failure of top down statist security measures Leading international authors from a range of disciplines document key dimensions of the crisis including the legal mechanisms enabling or blocking asylum the biopolitical systems for managing displaced peoples and the multiple overlapping historical precedents of today s challenges Handbook on Climate Change and Human Security

Michael R Redclift,Marco Grasso,2013-10-31 The Handbook is international in scope and provides an assessment that will be of value to academics students and policy professionals alike NGOs and policy institutes which need a grasp of the specificity and range of the issues and problems will all **Sustainability, Capabilities and Human Security** Andrew

Crabtree,2020-02-28 Amartya Sen and Martha Nussbaum have made major contributions to development studies and social philosophy yet sustainability issues have largely remained outside their domain despite sustainability s significance and complex relation to their central value of freedom This volume explores sustainability from a capabilities perspective with the motif of human security inviting a lively discussion within the human development family After introducing the two approaches authors conceptualize relationships between capabilities and the environment examine the scientific and normative validity of environmental indicators and analyse intergenerational justice Climate change is used to exemplify that a human security approach can add an explanatory ontology to the ethical criticisms of contemporary ways of life that champion consumerism That ontology recognizes shared life experiences problems and life challenges a community of fate The volume ends with a discussion of how the approaches can inform and sometimes critique the Sustainable Development Goals **Third World Approaches to International Law** Usha Natarajan,John Reynolds,Amar Bhatia,Sujith

Xavier,2019-07-23 This book addresses the themes of praxis and the role of international lawyers as intellectuals and political actors engaging with questions of justice for Third World peoples The book brings together 12 contributions from a total of 15 scholars working in the TWAIL Third World Approaches to International Law network or tradition It includes chapters

from some of the pioneering Third World jurists who have led this field since the time of decolonization as well as prominent emerging scholars in the field Broadly the TWAIL orientation understands praxis as the relationship between what we say as scholars and what we do as the inextricability of theory from lived experience Understood in this way praxis is central to TWAIL as TWAIL scholars strive to reconcile international law's promise of justice with the proliferation of injustice in the world it purports to govern Reconciliation occurs in the realm of praxis and TWAIL scholars engage in a variety of struggles including those for greater self awareness disciplinary upheaval and institutional resistance and transformation The rich diversity of contributions in the book engage these themes and questions through the various prisms of international institutional engagement world trade and investment law critical comparative law Palestine solidarity and decolonization judicial education revolutionary struggle against imperial sovereignty Muslim Marxism Third World intellectual traditions Global South constitutionalism and migration This book was originally published as a special issue of Third World Quarterly

Global Pandemic and Human Security Rajib Shaw, Anjula Gurtoo, 2022-03-01 This book highlights how the human security aspect has been affected by the global pandemic based on the specific case study field data and evidence COVID 19 has exemplified that the pandemic is global but its responses are local The responses depend on national governance and policy framework use of technology and innovation and people's perceptions and behavior among many others There are many differences in how the pandemic has affected the rich and the poor urban and rural sectors development and fiscal sectors and developed and developing nations and communities Echoing human security principles the 2030 Agenda emphasized a world free of poverty hunger disease and want free of fear and violence with equitable and universal access to quality education health care and social protection to safe drinking water and sanitation where food is sufficient safe affordable and nutritious where habitats are safe resilient and sustainable and where there is universal access to affordable reliable and sustainable energy These basic human security PA1 principles and development agenda are highly affected by the global pandemic worldwide irrespective of its development and economic status Thus the book highlights the nexus between human security and development issues It has two major pillars one is the development and the other is technology issues These two inter dependent topics are discussed in the perspective of the global pandemic making this the most important feature of this book While the world is still in the middle of a pandemic and possibly other natural and biological hazards may affect people's lives and livelihoods in the future this book provides some key learning which can be used to cope with future uncertainties including climate risks Thus the book is timely and relevant to wider readers Immigration Control in a Warming World Johannes Graf Keyserlingk, 2018-08-07 In the course of the twenty first century climate change is projected to significantly increase the already weighty immigration pressures that rich countries in Europe and North America face Estimates vary greatly from 50 to 500 million further migrants until 2050 most of them from developing countries that have contributed little to global warming Meanwhile the willingness of citizens in destination countries to let

further foreigners immigrate is unlikely to keep pace with that increase In fact the concern with climate migration is a blurry intricate and pressing one that will turn out to challenge current political and philosophical frameworks It is a blurry one because it will often be impossible to tell whether or to what extent it really was the changing climate that triggered a particular migratory flow rather than say economic social or demographic factors that often interact with the climatic trigger It is an intricate one because although it appears that heavily emitting countries have a particularly strong responsibility toward climate migrants there is little doubt that in times of rising anti immigrant sentiment that moral responsibility cannot be addressed by simply calling for more open borders And it is a pressing one because this latter insight neither absolves us from our obligations toward climate migrants nor will it keep them from moving Immigration Control in a Warming World aims to address these concerns and discusses potential future solutions to the issue of climate migration That such morally appropriate solutions are hardly in sight in today s practice of international politics is a poignant realization and it serves as a starting point for this book s trenchant critique of political inaction and of some philosophical commentators more idealistic perspectives on migration in the 21st Century *Research Handbook on International Law and Human Security*

Oberleitner, Gerd, 2022-10-14 This comprehensive Research Handbook considers the place of human security both in practice and as a concept within international law examining the preconditions for and consequences of applying human security to international legal thinking and practice It also proposes a future international law in which human security is central to the law s purpose This title contains one or more Open Access chapters **Narratives of Precarious Migrancy in the Global South**

Gigi Adair, Carly McLaughlin, 2025-02-14 This volume sets out to challenge and expand Anglophone literary migration studies in the global North with a two fold approach It proposes precarious migrancy as a conceptual framework to capture hitherto neglected aspects of subaltern displacement and it turns to the global South as a site of knowledge production about migration The chapters discuss literary narratives originally written in Chinese Kurdish and Italian as well as English and covering a wide geographical range to ask what experiences and understandings of migration emerge from Southern perspectives Across the volume precarious migrancy emerges as a key concept for understanding contemporary globalization in general and migration in the global South in particular The chapters offer significant reconceptualizations of precarity and migrancy by reading Southern literatures of migration as a mode of theorization of the contemporary world contributing to the ongoing shift in framings of migration in Anglophone and postcolonial literary studies This volume will be of significant interest to scholars in literary migration studies global South studies and postcolonial studies It offers readings of rarely studied literary texts as well as new concepts for scholars interested in understanding the nexus of literature and migration today **WOMEN SECURITY & GOVERNANCE**

Civic Multiculturalism in Singapore Terri-Anne Teo, 2019-06-05 This book is about multiculturalism broadly defined as the recognition respect and accommodation of cultural differences Teo proposes a framework of multicultural denizenship that includes group specific rights and intercultural dialogue by problematising three issues a the unacknowledged misrecognition of non citizens within the scholarship of multiculturalism b uncritical treatment of citizens and non citizens as binary categories and c problematic parcelling of group specific rights with citizenship rights Drawing on the case of Singapore as an illustrative example where temporary labour migrants are culturally stereotyped socioeconomically disenfranchised and denied access to rights accorded only to citizens Teo argues that understandings of multiculturalism need to be expanded and adjusted to include a fluidity of identities spectrum of rights and shared experiences of marginalisation among citizens and non citizens Civic Multiculturalism in Singapore will be of interest to students and scholars of multiculturalism critical citizenship studies migration studies political theory and postcolonial studies

Social Quality Theory Ka Lin, Peter Herrmann, 2015-07-01 Social quality thinking emerged from a critique of one sided policies by breaking through the limitations previously set by purely economic paradigms By tracing its expansion and presenting different aspects of social quality theory this volume provides an overview of a more nuanced approach which assesses societal progress and introduces proposals that are relevant for policy making Crucially important components emerge with research by scholars from Asia particularly China

eastern Europe and other regions beyond western Europe the theory's place of origin As this volume shows this rich diversity of approaches and their cross national comparisons reveal the increasingly important role of social quality theory for informing political debates on development and sustainability

A New Perspective on Human Mobility in the South Rudolf Anich, Jonathan Crush, Susanne Melde, John O. Oucho, 2014-07-22 This book offers innovative insights on South South human mobility It features a collection of papers that highlight often overlooked mobility patterns among and within regions in the global South as well as address critical realities faced by South South migrants This publication thoroughly investigates key issues of the migration debate spanning from the terminological and contextual meaning of migration and development It also critically examines some of the key features that human mobility in the global South is characterized by including the prevalence of intra regional and labor mobility the role of diasporas communities in developing countries South South remittances patterns the influence of environmental factors on the decision to migrate and the rising number of child migrants By carefully moving the lens from the frequently examined South North and North North movements to human mobility within the Southern regions of the world this book questions the traditional conception of the migration paradigm It offers knowledge and insights that will help to expand the debate as well as stimulate further research on this important topic and hopefully promote future activities aimed at the protection of migrants and their families living in the South As a result it is an ideal resource for migration scholars policy makers and development practitioners
