Transport Design A Travel History:

Transport Design, 2007 *Transport Design* Gregory Votolato, 2007-08-15 From limousines to canoes to the Apollo spacecraft Gregory Votolato chronicles the ever evolving design of vehicles nautical crafts and other objects of transportation and in particular explores the relationship between mass transportation and the travel experience **Mobilities: New Perspectives on Transport and Society** Professor John Urry, Professor Margaret Grieco, 2012-11-28 Bringing together the leading authors currently working at the intersection of social science and transport science this volume provides a companion to the well established and extensive international Transport and Society series Each chapter and the volume as a whole offers closer and richer consideration of the issues practices and structures of multiple mobilities which shape the current world but which have typically been overlooked or minimised What this approach seeks to do is not only draw attention to many new areas of research and investigation relating to mobile lives but also to point to new theories and methods by which such lives have to be researched and examined Such new theories and methods are relevant both to rethinking transport studies as such but are also recasting societal studies as transport so that it comes out of the ghetto and enters mainstream social science *Urban Mobility Design* Selby Coxon, Robbie Napper, Mark Richardson, 2018-11-29 Focusing from the perspective of the user Urban Mobility Design investigates how designed mobility and design processes can respond to and drive the emerging social and technological disruptions in the passenger transport sector Profound technological advances are changing the mobility expectations of city populations around the world Transportation design is an under represented research area of urban transportation planning Urban Mobility Design addresses this gap providing research based analysis on current and future needs of urban transportation passengers The book examines mobility from a uniquely multidisciplinary perspective involving a variety of innovative design and transportation planning approaches Examines urban mobility from a new perspective Coherently combines current research and practice in transport design technology mobility user behaviour experience and cultural analysis Utilizes hands on experiences with transportation manufacturers transit operators and engineers to bring a practical view on today's mobility challenges Shows how design approaches to problem solving can influence travel behaviour and improve passenger experience *Mobilities Design* Ole B. Jensen, Ditte Bendix Lannig, 2016-10-04 Contemporary society is marked and defined by the ways in which mobile goods bodies vehicles objects and data are organized moved and staged Against the background of the mobilities turn this book articulates a new and emerging research field namely that of mobilities design The book revolves around the following research question How are design decisions and interventions staging mobilities It builds upon the Staging Mobilities model Jensen 2013 in an exploratory inquiry into the problems and potentials of the design of mobilities The exchange value between mobilities and design research is twofold To mobilities research this means getting closer to the material and to engage in the creative exploratory and experimental approaches of the design world which offer new potential for innovative

research Design research on the other hand might enter into a fruitful relationship with mobilities research offering a relational and mobile design thinking and a valuable basis for design reflections around the ubiquitous structures spaces and systems of mobilities

Ship Gregory Votolato, 2012-01-01 From oar powered quinqueremes to steam powered freighters to luxury ocean liners such as the Titanic to aircraft carriers like the Abraham Lincoln ships have played an integral role in trade transportation and war throughout history Today ships remain the largest and most expensive moving objects on the planet engineers and designers constantly push the limits of design creating vessels that continue to rival newer technologies such as airplanes and cars But unlike other more common modes of transportation the great ships of the world travel in the deep oceans out of sight and out of mind until that is something goes wrong In Ship Gregory Votolato explores the fiction and the reality of modern ships the technology that creates them and the events that can lead to disasters such as the Exxon Valdez or Amoco Cadiz Here Votolato delves into the world of the ship describing the unpredictable and often hostile environment of weather at sea the resurgent threats posed by pirates and the responsibilities of captains and crews onboard Ship sbroad overview of technology and design also offers unique insights into this extraordinary result of human creativity Votolato s book will appeal to readers interested in the general design history of ships as well as their social political and technological impact on our modern world

The Routledge Handbook of Mobilities Peter Adey, David Bissell, Kevin Hannam, Peter Merriman, Mimi Sheller, 2014-01-10 The 21st century seems to be on the move perhaps even more so than the last With cheap travel and more than two billion cars projected worldwide for 2030 And yet all this mobility is happening incredibly unevenly at different paces and intensities with varying impacts and consequences to the extent that life on the move might be actually quite difficult to sustain environmentally socially and ethically As a result mobility has become a keyword of the social sciences delineating a new domain of concepts approaches methodologies and techniques which seek to understand the character and quality of these trends This Handbook explores and critically evaluates the debates approaches controversies and methodologies inherent to this rapidly expanding discipline It brings together leading specialists from range of backgrounds and geographical regions to provide an authoritative and comprehensive overview of this field conveying cutting edge research in an accessible way whilst giving detailed grounding in the evolution of past debates on mobilities It illustrates disciplinary trends and pathways from migration studies and transport history to communications research featuring methodological innovations and developments and conceptual histories from feminist theory to tourist studies It explores the dominant figures of mobility from children to soldiers and the mobility impaired the disparate materialities of mobility such as flows of water and waste to the vectors of viruses key infrastructures such as logistics systems to the informal services of megacity slums and the important mobility events around which our world turns from going on vacation to the commute to the catastrophic disruption of mobility systems The text is forward thinking projecting the future of mobilities as they might be lived transformed and studied and possibly brought to an end

International in focus the book transcends disciplinary and national boundaries to explore mobilities as they are understood from different perspectives different fields countries and standpoints This is an invaluable resource for all those with an interest in mobility across disciplinary boundaries and areas of study *Hotel Lobbies and Lounges* Tom Avermaete, Anne Massey, 2013 This series investigates the historical theoretical and practical aspects of interiors The volumes in the Interior Architecture series can be used as handbooks for the practitioner and as a critical introduction to the history of material culture and architecture Hotels occupy a particular place in popular imagination As a place of exclusive sociability and bohemian misery a site of crime and murder and as a hiding place for illicit liaison the hotel has embodied the dynamism of the metropolis since the eighteenth century This book explores the architectural significance of hotels throughout history and how their material construction has reflected and facilitated the social and cultural practices for which they are renowned Contemporary developments in the planning and design of hotels are addressed through a series of interviews and case studies Illustrated throughout this book is an innovative and important contribution to architectural and interior design theory literature **Advancing a Design Approach to Enriching Public Mobility** Selby Coxon, Robbie Napper, 2021-03-17 This book examines research at the intersection of design and public mobility from both an academic and practice perspective An eclectic collection of projects and topics not normally found in the mainstream literature on transportation from implementing gender sensitive design to examining how to reconceptualize future public interactions with mobility The book brings together leading thinkers in design and mobility from around the world and from different modal perspectives sharing insights into how we navigate the emerging public mobility landscape This collection is valuable for transport operators and practitioners seeking to better understand the impact design can have on public mobility and innovate in a rapidly changing operational environment **British Design** Christopher Breward, Fiona Fisher, Ghislaine Wood, 2015-10-22 British Design brings together leading international scholars designers and journalists to provide new perspectives on British design in the last sixty years and how it at once looked back to the past with the continuation of traditions that spoke to Britain's design heritage and looked forwards with the embrace of modernist and postmodernist style The book responds to and develops new ways of understanding the recent history of design in Britain with case studies on designed spaces and objects including domestic interiors retail spaces schools and university buildings and transport The contributors address significant moments and phenomena in the historical and social history of British design from the rise and fall of the English Country House style and the Brutalist architectural boom of the 1960s to the modern shopping space and consider the work of key contemporary designers ranging from Tommy Roberts to Thomas Heatherwick British Design provides new criticism and analysis on how design from the immediate post war period to the present day has developed and changed how we live and how we interact with the spaces in which we live British Design is split into 13 chapters and is richly illustrated with 65 images 16 of which are in full colour **Mobility, Migration and Transport** Colin G.

Pooley,2017-05-19 This book provides an innovative perspective on migration mobility and transport Using concepts drawn from migration history mobilities studies and transport history it makes the case for greater integration of these disciplines The approach is historical demonstrating how past processes of travel and population movement have evolved examining the continuities and changes that have occurred and arguing that many of the concepts used in mobilities studies today are equally relevant to the past The three central chapters view past population movements through respectively the lenses of migration history mobilities studies and transport Two further chapters demonstrate the diversity of mobility experiences and the opportunities and difficulties of applying this approach in teaching and research Extensive case study material from around the world is used including personal diaries which vividly recreate the everyday experiences of past mobilities Population movement has never been of more importance globally this book demonstrates how knowledge of past mobility experiences can inform our understanding of the present A Cultural History of Furniture in the Modern Age Claire I. R. O'Mahony,2022-02-24 Furniture is a unique witness to the transformations of private and public experience amidst the upheavals of the 20th century how we work rest and play are determined by the embodied encounter with furniture defining and projecting a sense of identity and status responding to and exemplifying contrasting social conditions political and economic motivations aesthetic predilections and debates Assessing physical and archival evidence drawn from a spectrum of iconic and under represented case studies an international team of design historians collaborate in this volume to explore key methodological questions about how the production consumption and mediation of furniture reveal shifting cultural habits and histories across diverse contexts amidst modernity Drawing upon a wealth of visual and textual sources this volume of A Cultural History of Furniture presents essays that examine key characteristics of the furniture of the modern period on the themes of design and motifs makers making and materials types and uses the domestic setting the public setting exhibition and display furniture and architecture visual representations and verbal representations *Understanding and Managing Tourism Impacts* Colin Michael Hall,Alan A. Lew,2009 This book discusses the complexity of understanding how tourism impacts the world and how the world impacts tourism from the global scale to the local and individual scale *Car* Gregory Votolato,2015-06-15 Whether you drool over their horsepower or decry their emissions the car is an important and ubiquitous part of nearly all of our lives And the history of their design and the innovations of their technologies can tell us a lot about how our values and attitudes have changed In this book Gregory Votolato shows us how and why the automobile has become since its rise in the late nineteenth century at once an object of unparalleled popular desire and a hugely problematic emblem of the modern world Votolato explores the ways that our love hate relationship with the car has been intimately connected with car design He tells the story of the rise of the private passenger car and all the psychological social and economic functions it has come to serve beyond mere transportation Introducing readers to the automotive design process he traces the lifecycle of the car from the drawing board to the scrapyard offering insights from key figures in the

industry as well as a careful evaluation of the car's enormous environmental impact. At the same time he looks at the many cultures tied into the automobile from drag racing and customizing to the luxury coachcraft of the classic era. Along the way he takes us for a ride in some of the most famous cars ever to have had their tires inflated from the Model T to the Tesla. The result is a top-down thrilling burn through the history of one of our most beloved and lamented inventions.

Smart Cities Houbing Song, Ravi Srinivasan, Tamim Sookoor, Sabina Jeschke, 2017-07-12 Provides the foundations and principles needed for addressing the various challenges of developing smart cities. Smart cities are emerging as a priority for research and development across the world. They open up significant opportunities in several areas such as economic growth, health, wellness, energy efficiency, and transportation to promote the sustainable development of cities. This book provides the basics of smart cities and it examines the possible future trends of this technology. **Smart Cities Foundations Principles and Applications** provides a systems science perspective in presenting the foundations and principles that span multiple disciplines for the development of smart cities. Divided into three parts: foundations, principles, and applications. **Smart Cities** addresses the various challenges and opportunities of creating smart cities and all that they have to offer. It also covers smart city theory, modeling, and simulation and examines case studies of existing smart cities from all around the world. In addition, the book addresses how to develop a smart city and how to present the state of the art and practice of them all over the world. Focuses on the foundations and principles needed for advancing the science, engineering, and technology of smart cities including system design, system verification, real-time control, and adaptation. Internet of Things and test beds. Covers applications of smart cities as they relate to smart transportation, connected vehicle (CV) and Intelligent Transportation Systems (ITS) for improved mobility, safety, and environmental protection. **Smart Cities Foundations Principles and Applications** is a welcome reference for the many researchers and professionals working on the development of smart cities and smart city related industries.

Communications and Mobility David Morley, 2017-04-26 Communications and Mobility is a unique interdisciplinary look at mobility, territory, communication, and transport in the 21st century with extended case studies of three icons of this era: the mobile phone, the migrant, and the container box. Urges scholars in media and communication to return to broader conceptions of the field that include mobility of all kinds: information, people, and commodities. Embraces perspectives from media studies, science, and technology studies, sociology, media anthropology, and cultural geography. Discusses ideas of virtual and embodied mobility, network geographies, de-territorialization, sedentarism, nomadology, connectivity, containment, and exclusion. Integrates the often neglected transport studies into contemporary communication studies and theories of globalization.

Drive Iain Borden, 2013-02-15 The open road: it's a phrase that calls to mind a sense of freedom, adventure, and new possibilities that make driving one of our most liberating activities. In **Drive** Iain Borden explores the way driving allows us to encounter landscapes and cities around the world. He takes particular notice of how driving is portrayed in film from America to Europe to Asia and from Hollywood to the avant-garde, covering over a century of

history and referencing hundreds of movies From the dusty landscapes of *The Grapes of Wrath* to the city streets of *The Italian Job* from the aesthetic delights of *Rain Man* and *Traffic* to the existential musings of *Thelma and Louise* and *Vanishing Point* from the freeway pleasures of *Radio On* and *London Orbital* to the high speed dangers of *Crash* *Bullitt* and *C tait un Rendezvous* this book shows how driving with different speeds cars roads and cities provides experiences and challenges beyond compare Borden concludes that as an integral part of modern life car driving is something to be celebrated and even encouraged making *Drive* a timely riposte to anti car attitudes and those blind to the richness of life behind the wheel

Colour Futures Ao Jiang, Stephen Westland, 2024-12-02 This book delves into the nuanced interplay of colour in human perception and its applications across diverse fields highlighting the transformative impact on art design digital media and technology The book introduces an innovative approach by integrating scientific research with practical applications making it a pivotal resource for designers psychologists and technologists Its scope ranges from foundational aspects of colour vision to futuristic applications in virtual reality and artificial intelligence offering fresh insights and forecasting emerging trends This comprehensive exploration is essential for anyone interested in the strategic use of colour to enhance user experience and cultural expressions

Indoor America Andrea Vesentini, 2018-11-27 Cars single family houses fallout shelters air conditioned malls these are only some of the many interiors making up the landscape of American suburbia *Indoor America* explores the history of suburbanization through the emergence of such spaces in the postwar years examining their design use and representation By drawing on a wealth of examples ranging from the built environment to popular culture and film Andrea Vesentini shows how suburban interiors were devised as a continuous cultural landscape of interconnected and self sufficient escape capsules The relocation of most everyday practices into indoor spaces has often been overlooked by suburban historiography *Indoor America* uncovers this latent history and contrasts it with the dominant reading of suburbanization as pursuit of open space Americans did not just flee the city by getting out of it they did so also by getting inside Vesentini chronicles this inner directed flight by describing three separate stages The encapsulation of the automobile fostered the nuclear segregation of the family from the social fabric and served as a blueprint for all other interiors Introverted design increasingly turned the focus of the house inward Finally through interiorization the exterior was incorporated into the all encompassing interior landscape of enclosed malls and projects for indoor cities In a journey that features tailfin cars and World s Fair model homes Richard Neutra s glass walls and sitcom picture windows Victor Gruen s Southdale Center and the Minnesota Experimental City *Indoor America* takes the reader into the heart and viscera of America s urban sprawl

Railway Photographic Advertising in Britain, 1900-1939 Alexander Medcalf, 2018-03-06 This book explores the phenomenal resources dedicated to understanding and encouraging passengers to consume travel from 1900 to 1939 analysing how place and travel were presented for sale Using the Great Western Railway as a chief case study as well as a range of its competitors both on and off the rails Alexander Medcalf unravels the complex and ever changing processes

behind corporate sales communications This volume analyses exactly how the company pictured passengers in the countryside at the seaside in the urban landscape and in the company s vehicles This thematic approach brings transport and business history thoroughly in line with tourism and leisure history as well as studies in visual culture
