What Makes Women Sick What Makes Women Sick:

What Makes Women Sick Lesley Doyal,1995 What makes women sick To an Ecuadorean woman it s nervios from constant worry about her children s illnesses To a woman working in a New Mexico electronics factory it s the solvents that leave her with a form of dementia To a Ugandan woman it s HIV from her husband s sleeping with the widow of an AIDS patient To a Bangladeshi woman it s a fatal infection following an IUD insertion What they all share is a recognition that their sickness is somehow caused by situations they face every day at home and at work **What Makes Women Sick?** Susan Starr Sered,2000 An eye opening look at Israeli women s life expectancy and health **What Makes Women Sick** Lesley Doyal,1995-06-19 Lesley Doyal draws on a wide range of disciplines to highlight the limitations of medical models in understanding global patterns of health and disease in women Examining in detail the impact of sexuality fertility control reproduction domestic labour and waged work on women s well being she shows how gender divisions in economic and social life affect their experiences of illness disability and mortality A concluding chapter illustrates the multiplicity of ways in which women around the world are challenging the threats to their health The Sociology and Politics of Health Michael Purdy,David Banks,2001 The Sociology and Politics of Health is a collection of key readings through which to explore the sociological and political dimensions of health illness and health care Classic and Contemporary Readings in Sociology Ian Marsh,Rosie Campbell,Mike Keating,2014-05-12 Classic and Contemporary Readings in Sociology introduces the reader to sociological issues theories and debates providing extracts of primary source material from both classical and contemporary theorists Theorists are examined within their historical and sociological framework and the text provides an analysis of developments in sociological thought and research The text is divided into four main sections Part One Origins and Concepts surveys the history of the discipline of sociology and examines key themes which have influenced sociological theorising and investigation in particular social control culture and socialisation Parts Two and Four Sociological Theories and Sociological Research include a number of readings from the founding theorists and investigators including Auguste Comte Emile Durkheim Karl Marx Max Weber and Charles Booth and also include more recent theoretical writing and research approaches The focus on theory and research is extended by a selection of readings centred around the theme of Differences and Inequalities Part Three these readings provide students with examples of work from an area where sociological theorising and research has been widely applied *Under the Medical Gaze* Susan Greenhalgh,2001-05-03 This compelling account of the author s experience with a chronic pain disorder and subsequent interaction with the American health care system goes to the heart of the workings of power and culture in the biomedical domain It is a medical whodunit full of mysterious misdiagnosis subtle power plays and shrewd detective work Setting a new standard for the practice of autoethnography Susan Greenhalgh presents a case study of her intense encounter with an enthusiastic young specialist who through creative interpretation of the diagnostic criteria for a newly emerging chronic disease became convinced she had a

painful essentially untreatable lifelong muscle condition called fibromyalgia Greenhalgh traces the ruinous effects of this diagnosis on her inner world bodily health and overall well being Under the Medical Gaze serves as a powerful illustration of medicine s power to create and inflict suffering to define disease and the self and to manage relationships and lives Greenhalgh ultimately learns that she had been misdiagnosed and begins the long process of undoing the physical and emotional damage brought about by her nearly catastrophic treatment In considering how things could go so awry she embarks on a cogent and powerful analysis of the sociopolitical sources of pain through feminist cultural and political understandings of the nature of medical discourse and practice in the United States She develops fresh arguments about the power of medicine to medicalize our selves and lives the seductions of medical science and the deep psychologically rooted difficulties women patients face in interactions with male physicians In the end Under the Medical Gaze goes beyond the critique of biomedicine to probe the social roots of chronic pain and therapeutic alternatives that rely on neither the body cure of conventional medicine nor the mind cure of some alternative medicines but rather a broader set of strategies that address the sociopolitical sources of pain

Sweated Work, Weak Bodies Daniel E. Bender, 2004 In the early 1900s thousands of immigrants labored in New Yorks Lower East Side sweatshops enduring work environments that came to be seen as among the worst examples of Progressive Era American industrialization Although reformers agreed that these unsafe workplaces must be abolished their reasons have seldom been fully examined Sweated Work Weak Bodies is the first book on the origins of sweatshops exploring how they came to represent the dangers of industrialization and the perils of immigration It is an innovative study of the language used to define the sweatshop how these definitions shaped the first anti sweatshop campaign and how they continue to influence our current understanding of the sweatshop

Reid, Jane Dennehy, 2018-10-15 This book explores the connections between women s experiences of and contributions to sport as a profession product and pastime This collection brings together insights and experiences from academics activists players and practitioners to critically reflect upon contemporary women s sport **The Mother Code** Ruthie Ackerman, 2025-05-06 In

this propulsive memoir an award winning journalist blends history science and cultural criticism to uncover whether motherhood outside of society s rigid rules and expectations is possible and whether she fits the mold for what a mother should be This tender generous book does the hard work of redefining motherhood and family so that they honor all aspects of a woman s life Christie Tate author of the New York Times bestseller Group Ruthie Ackerman had long believed that the decision to not have children was a radical act She d grown up being told that she came from a long line of women who had abandoned their kids and feared she would pass on her half brother s rare genetic disorder So when she marries a man who doesn t want children she hopes she can be happy without any But a voice in her head keeps returning to the question What if mothering can be a radical act too When her marriage veers off course she goes searching through the twists and turns of her DNA to decide once and for all whether she should become a mother By the time Ruthie finally determines that she

desperately wants a child she learns that motherhood won't happen the way she thought it would. Now she must enter the hall of mirrors where biology, genetics, and philosophy collide as she wonders what it means to both create and nurture a life. What does inheritance really entail? What does it mean to be a good mother? When it comes down to it, how important is nature versus nurture? And where are the models for what a good life can look like for women both with and without children?

Synthesizing reportage and memoir, *The Mother Code* unravels how we've come to understand the institution of motherhood. What emerges is a groundbreaking new vision for what it means to parent: a mother code that goes beyond our bloodlines and genetics and instead urges us to embrace inheritance as the legacy we want to leave behind for those we love. *Global Perspectives on Prostitution and Sex Trafficking* Rochelle L. Dalla, Lynda M. Baker, John Defrain, Celia Williamson, 2011-04-08

This book is part of a two-volume set that examines prostitution and sex trafficking on a global scale, with each chapter devoted to a particular country in one of seven geo-cultural areas of the world. The 18 chapters in this volume, Volume I, are devoted to examination of the commercial sex industry (CSI) in countries within Africa, Asia, Middle East, and Oceania, while the 16 chapters that comprise Volume II focus exclusively on Europe, Latin America, and North America. Volume II also includes a global section which includes chapters that are globally relevant rather than those devoted to a particular country or geographic location. The content of each volume, as well as each chapter, reflects great diversity in focus, writing style, and personal position regarding the commercial sex industry. Diversity extends to the contributors who are comprised of international scholars, service providers, and policy advocates representing a variety of fields and disciplines with distinct and varied frames of reference and theoretical underpinnings with regard to the commercial sex industry. In addition to addressing aspects of the CSI across the globe as impacted by geography and culture, authors have also provided a spectrum of implications of their work, ranging from continued scholarship and research to legislative maneuvers and policy change to suggestions for collaboration across NGOs, fieldworkers, clinicians, and service providers. Together, the 34 expertly crafted chapters provide a wealth of knowledge from which to more deeply appreciate and contemplate the global commercial sex industry. By uniting contributors from around the world, this book aims to build a relatively common knowledge base on global prostitution and sex trafficking.
