attempts to register the impossibility of saying very much but it insists on the right to say a little So what is essential is the voice itself its ways of knowing and unknowing **May We Be Forgiven** A.M. Homes, 2013-09-24 Winner of the Women's Prize and featured on Elin Hilderbrand's New York Times ballot for Best Books of the Century Harold Silver has spent a lifetime watching his younger brother George a taller smarter and more successful high flying TV executive acquire a covetable wife two kids and a beautiful home in the suburbs of New York City But Harry a historian and Nixon scholar also knows George has a murderous temper and when George loses control the result is an act of violence so shocking that both brothers are hurled into entirely new lives in which they both must seek absolution Harry finds himself suddenly playing parent to his brother's two adolescent children tumbling down the rabbit hole of Internet sex dealing with aging parents who move through time like travelers on a fantastic voyage As Harry builds a twenty first century family created by choice rather than biology we become all the more aware of the ways in which our history both personal and political can become our destiny and either compel us to repeat our errors or be the catalyst for change *May We Be Forgiven* is an unnerving funny tale of unexpected intimacies and of how one deeply fractured family might begin to put itself back together *My Life as an Artificial Creative Intelligence* Mark Amerika, 2022-05-10 A series of intellectual provocations that investigate the creative process across the human nonhuman spectrum Is it possible that creative artists have more in common with machines than we might think Employing an improvisational call and response writing performance coauthored with an AI text generator remix artist and scholar Mark Amerika interrogates how his own psychic automatism is itself a nonhuman function strategically designed to reveal the poetic attributes of programmable worlds still unimagined Through a series of intellectual provocations that investigate the creative process across the human nonhuman spectrum Amerika critically reflects on whether creativity itself is at root a nonhuman information behavior that emerges from an onto operational presence experiencing an otherworldly aesthetic sensibility Amerika engages with his cyberpunk imagination to simultaneously embrace and problematize human machine collaborations He draws from jazz performance beatnik poetry Buddhist thought and surrealism to suggest that his own artificial creative intelligence operates as a finely tuned remix engine continuously training itself to build on the history of avant garde art and writing Playful and provocative *My Life as an Artificial Creative Intelligence* flips the script on contemporary AI research that attempts to build systems that perform more like humans instead self reflexively making a very nontraditional argument about AI's impact on society and its relationship to the cosmos
