FROM RETROECONOMICS TO SANCTIONOMICS: ESSAYS ON UNCONVENTIONAL ECONOMICS Vladimer Papava, 2024-12-04 A wide ranging stimulating and unconventional set of essays on the state of economics and economic policy Everyone will find something of interest in these reflections DANI RODRIK Professor of International Political Economy Harvard's John F Kennedy School of Government Harvard University President of the International Economic Association USA A wide ranging group of essays on current issues of economic policy informed by theory and enlightened by the perspective of an astute observer in post Soviet Georgia with excellent views facing both East and West JAMES K GALBRAITH Lloyd M Bentsen Jr Chair in Government Business Relations and Professor of Government The University of Texas at Austin USA Professor Vladimer Papava has lived through major upheavals such as a post socialist transition and a global financial crisis keeping an eye on the developments

from his vantage point in Tbilisi Georgia The stimulating essays that have resulted from his observations collected in this volume share a heterodox stance one that showcases appreciation for and creative destruction of mainstream economics Economists and other social scientists will be introduced to novel promising approaches which themselves derive from an enviably wide ranging examination of the international literature Just as we learn in Professor Papava s essays how to avoid a post socialist necroeconomy where production of goods with no demand continues the volume itself helps protect us against a necroeconomic scientific discipline May the unconventional become conventional JAMES A LEITZEL Executive Director of Public Policy Studies Harris School of Public Policy University of Chicago USA A book to be read and studied as one digs through a mine in search of many gold veins in this case formed through the author s intellectual curiosity long standing scholarly work and experience SERGIO MARIOTTI Professor Emeritus Dept of Management Economics and Industrial Engineering Politecnico di Milano Italy

Beating the Global Odds Paul A. Laudicina, 2012-09-04 The Answer to Global Overload Contending with the 24 7 news cycle and an endless barrage of choices and information has stymied leadership and decision making strategies among those at the top But we all know this is not a just a problem for the elite The broad based reaction to this chaotic unmanageable assault has been to retrench and to focus on immediate controllable decisions In the process we lose sight of the horizon More dangerous still is the shift we ve seen from value creation to wealth creation where information technology 1 0 has enabled a transaction based society in which the deal is more important than the value it drives or the relationships it is based on On our current path the odds of a better future are slim What we need is a new value proposition Beating the Global Odds is the answer to the dangers of too much of a good thing There s no going back but there is the opportunity to set things right In this book Paul A Laudicina Managing Partner and Chairman of the Board of global consulting firm A T Kearney provides a fast paced and engaging tour of how we got to this point and what we can do about it Drawing on examples from everything from world history and current media to anecdotes from his vast network of CEOs and the world s most innovative thinkers Laudicina helps bring our world of seemingly fuzzy and disconnected pixels into sharp focus The result is a compelling case for change and call to action not only for global leaders but also for everyone who struggles with the question of how we can inspire and seize a better future how we can beat the global odds
