Whats Wrong With The Wto And How To Fix It:

What's Wrong with the WTO and How to Fix It Rorden Wilkinson, 2014-10-07 We need a world trade organization We just don't need the one that we have By pitching unequally matched states together in chaotic bouts of negotiating the global trade governance of today offers and has consistently offered developed countries more of the economic opportunities they already have and developing countries very little of what they desperately need This is an unsustainable state of affairs to which the blockages in the Doha round provide ample testimony So far only piecemeal solutions have been offered to refine this flawed system Radical proposals that seek to fundamentally alter trade governance or reorient its purposes around more socially progressive and egalitarian goals are thin on the ground Yet we eschew deeper reform at our peril In *What's Wrong with the World Trade Organization and How to Fix It* Rorden Wilkinson argues that without global institutions fit for purpose we cannot hope for the kind of fine global economic management that can put an end to major crises or promote development for all Charting a different path he shows how the WTO can be transformed into an institution and a form of trade governance that fulfils its real potential and serves the needs of all

Handbook of Global Economic Governance Manuela Moschella, Catherine Weaver, 2013-12-17 Since the summer of 2007 the world scenario has been dominated by the US sub prime mortgage crisis and its repercussions on global financial markets and economic growth As banks around the world wrote down their losses and governments intervened to rescue domestic financial institutions financial distress severely hit the real economy leading to what has been widely defined as the worst recession since the 1930s Under these conditions along with the immediate concern for stemming the effects of the crisis policy makers around the world have been debating the long term measures that have to be adopted in order to reduce the likelihood of future crises and to ensure stable economic growth Although this debate has not yet produced significant transformations it indicates a renewed concern about the institutional architecture that is meant to govern the global economic and financial system This book tackles the issue of what the governance of the global economic and financial system looks like and what the prospects for its reform are Specifically the book will address the following three main themes Governance What is governance in the international economic system What forms does it take How did it come about How can we study it Functions of governance What are the functions of global economic governance Who performs them What are the rules and mechanisms that make global governance possible Problems and prospects of governance What are the problems in global economic governance Is there a trade off between legitimacy and efficiency What are the prospects for reform of global economic governance in the aftermath of the global financial crisis This book will _ Provide a thorough

analysis of the issues at stake in designing international rules and institutions able to govern the global economy _ Illustrate and analyze virtually all the main institutions rules and arrangements that make up global economic governance inscribing them within the function these institutions rules and arrangements are meant to perform _ Discuss the problems that affect today s global economic governance and assess alternative proposals to reform the international financial architecture

Negotiations in the World Trade Organization Michal Parizek, 2019-10-10 This book examines the World Trade Organization WTO in the context of the global economy in the twenty first century arguing that many problems within the institution lie in the disparity between its design and the nature of its tasks Studying the global trade regime and the unsuccessful Doha round of trade liberalization negotiations this volume suggests that important institutional adjustments may be necessary for the WTO and other major international institutions to re gain their ability to manage global economy It uses extensive new qualitative and quantitative evidence to identify systematic dysfunctions in how the Doha negotiations have been conducted and links these dysfunctions to the exclusively inter governmental design of interest representation in the WTO Based on this the book argues that global economic institutions should consider allowing broader parliamentary and non state representation of their members Presenting findings which can also be applied to other global economic institutions *Negotiations in the World Trade Organization* will be useful to students and scholars of international trade global governance and international political economy *Global Political Economy* Nicola Phillips, 2023 With a unique emphasis on the big debates and questions that have the potential to affect all our lives a diverse range of viewpoints are presented to encourage and equip students to become active participants in the discussions that animate global political economy today

NGOs and Global Trade Erin Hannah, 2016-01-29 In a deeply iniquitous world where the gains from trade are distributed unevenly and where trade rules often militate against progressive social values human health and sustainable development NGOs are widely touted as our best hope for redressing these conditions As a critical voice of the poor and marginalized many are engaged in a global struggle for democratic norms and social justice Yet the potential for NGOs to bring about meaningful change is limited This book examines whether improvements in participatory opportunities for progressive NGOs results in substantive and normative policy change in one of the major trading powers the European Union Hannah advances a constructivist account of the role of NGOs in the EU s trade policymaking process She argues that NGOs have been instrumental in providing education raising awareness and giving a voice to broader societal concerns about proposed trade deals both when they take advantage of formal participatory opportunities and when they protest from the streets and in the media However the book also highlights how NGO inputs are mediated by the social structure of global trade governance Epistemes the background knowledge ideological and normative beliefs and shared assumptions about how the world works determine who has a voice in global trade governance Showing how NGOs succeed only when their advocacy conforms broadly to the dominant episteme this book will be of value to scholars and students with an interest in NGOs and

international trade negotiations It will also be of interest to policymakers national trade negotiators government departments and the trade policy community
