Buddhism and International Humanitarian Law Andrew Bartles-Smith, Kate Crosby, Peter Harvey, Asanga Tilakaratne, Daniel Ratheiser, Noel Maurer Trew, Stefania Travagnin, Elizabeth J. Harris, Mahinda Deegalle, Christina A. Kilby, 2023-09-20 What guidance can Buddhism provide to those involved in armed conflict and to belligerents who must perhaps kill or be killed or defend their families communities or countries from attack How moreover does Buddhism compare with international humanitarian law IHL otherwise known as the law of armed conflict which protects non combatants and restricts the means and methods of warfare to limit the suffering it causes Despite the prevalence of armed conflict in parts of the Buddhist world few contemporary studies have addressed these questions While there is a wealth of material on Buddhist conflict prevention and resolution remarkably little attention has been paid to what Buddhism says about the actual conduct of war IHL is also still relatively little known in the Buddhist world and might not therefore influence the behaviour of belligerents who self identify as Buddhists and are perhaps more likely to be guided by Buddhist principles This ground breaking volume is part of an International Committee of the Red Cross project which seeks to fill this gap by exploring correspondences between Buddhist and IHL principles and by identifying Buddhist resources to improve compliance with IHL and equivalent Buddhist or humanitarian norms This book will be of much interest to students and researchers of International Law Buddhism Ethics as well as War and Conflict studies The chapters in this book were originally published as a special issue of Contemporary Buddhism The Open Access version of this book available at <https://www.taylorfrancis.com/books/oa-edit/10.4324/9781003439820/buddhism-international-humanitarian-law-andrew-bartles-smith-kate-crosby-peter-harvey-asanga-tilakaratne-daniel-ratheiser-noel-maurer-trew-stefania-travagnin-elizabeth-harris-mahinda-deegalle-christina-kilby> has been made available under a Creative Commons Attribution Non Commercial No

May I Kill? Jeffrey K. Mann, 2018-09-28 Today we live in a world where we are less exposed to violence than at any other time in history. However, we also know that violence can come knocking on our door at any moment. Preparing for this possibility means more than physical safety; it means being clear with ourselves about the ethics of violence. Can violence be justified? When should we fight? How should we fight? And in situations when things have gone badly, may we kill? These questions are not only for politicians, soldiers, and police officers but are also important considerations for civilians whose lives do not normally intersect with violence. Whether advocating for government policies, marching in the streets, or defending ourselves and loved ones, a coherent moral framework is essential to good decision making. *May I Kill?* examines the efficacy of different approaches to non-violence and Just War Theory. By scrutinizing these ethical theories, the reader is encouraged to critically examine occasions for the use of force from a moral perspective, whether nations at war or violent encounters in our own neighborhoods. We may then determine how best to develop ourselves, body, mind, and spirit, to respond effectively and make the world a safer place.

The Open Hand Barry M. Kroll, 2013-11-15 Based on five years of classroom experimentation, *The Open Hand* presents a highly practical yet transformational philosophy of teaching argumentative writing. In his course *Arguing as an Art of Peace*, Barry Kroll uses the open hand to represent an alternative approach to argument, asking students to argue in a way that promotes harmony rather than divisiveness and avoiding conventional conflict-based approaches. Kroll cultivates a bodily investigation of noncombative argument, offering direct pedagogical strategies anchored in three modalities of learning: conceptual, procedural, kinesthetic, and contemplative. Projects, activities, assignments, informal responses, and final papers for students. Kinesthetic exercises derived from martial arts and contemplative meditation and mindfulness practices are key to the approach with Kroll specifically using movement as a physical analogy for tactics of arguing. Collaboration, mediation, and empathy are important yet overlooked values in communicative exchange. This practical, engaging, and accessible guide for teachers contains clear examples and compelling discussions of pedagogical strategies that teach students not only how to write persuasively but also how to deal with personal conflict in their daily lives.

Widen the Window Elizabeth A. Stanley, PhD, 2019-09-24 I don't think I've ever read a book that paints such a complex and accurate landscape of what it is like to live with the legacy of trauma as this book does while offering a comprehensive approach to healing. From the foreword by Bessel van der Kolk, a pioneering researcher, we gain a new understanding of stress and trauma as well as the tools to heal and thrive. Stress is our internal response to an experience that our brain perceives as threatening or challenging. Trauma is our response to an experience in which we feel powerless or lacking agency. Until now, researchers have treated these conditions as different, but they actually lie along a continuum. Dr. Elizabeth Stanley explains the significance of this continuum, how it affects our resilience in the face of challenge, and why an event that is stressful for one person can be traumatizing for another. This

groundbreaking book examines the cultural norms that impede resilience in America especially our collective tendency to disconnect stress from its potentially extreme consequences and override our need to recover It explains the science of how to direct our attention to perform under stress and recover from trauma With training we can access agency even in extreme stress environments In fact any maladaptive behavior or response conditioned through stress or trauma can with intentionality and understanding be reconditioned and healed The key is to use strategies that access not just the thinking brain but also the survival brain By directing our attention in particular ways we can widen the window within which our thinking brain and survival brain work together cooperatively When we use awareness to regulate our biology this way we can access our best uniquely human qualities our compassion courage curiosity creativity and connection with others By building our resilience we can train ourselves to make wise decisions and access choice even during times of incredible stress uncertainty and change With stories from men and women Dr Stanley has trained in settings as varied as military bases healthcare facilities and Capitol Hill as well as her own striking experiences with stress and trauma she gives readers hands on strategies they can use themselves whether they want to perform under pressure or heal from traumatic experience while at the same time pointing our understanding in a new direction
