Worst Cases Terror And Catastrophe In The Popular Imagination:

Worst Cases Lee Clarke, 2006 The author surveys the full range of possible catastrophes that animate and dominate the popular imagination from toxic spills and terrorism to plane crashes and pandemics Along the way he explores how the ubiquity of worst cases in everyday life has rendered them ordinary and mundane very real threats like a killer flu or an American Hiroshima have become so common that they have lost their ability to shock us Fear and dread Clarke argues are often completely sensible when the public has more substantial information and more credible warnings it will take worst cases as seriously as it should

Worst Cases Lee Ben Clarke, 2021 *Encyclopedia of Technological Hazards and Disasters in the Social Sciences* Duane A. Gill, Liesel A. Ritchie, Nnenia M. Campbell, 2024-11-08 The Encyclopedia of Technological Hazards and Disasters in the Social Sciences brings together an array of global experts to investigate explore and analyse human caused disaster events Providing insights into both the origins and aftermaths of disaster events it offers advanced understanding of a broad range of disaster events facing society during the Anthropocene

Politics of Catastrophe Claudia Aradau, Rens Van Munster, 2011-05-02 This book argues that catastrophe is a particular way of governing future events such as terrorism climate change or pandemics which we cannot predict but which may strike suddenly without warning and cause irreversible damage At a time where catastrophe increasingly functions as a signifier of our future imaginaries of pending doom have fostered new modes of anticipatory knowledge and redeployed existing ones Although it shares many similarities with crises disasters risks and other disruptive incidents this book claims that catastrophes also bring out the very limits of knowledge and management The politics of catastrophe is turned towards an unknown future which must be imagined and inhabited in order to be made palpable knowable and actionable Politics of Catastrophe critically assesses the effects of these new practices of knowing and governing catastrophes to come and challenges the reader to think about the possibility of an alternative politics of catastrophe This book will be of interest to students of critical security studies risk theory political theory and International Relations in general

The Cambridge Handbook of Social Problems: A. Javier Treviño, 2018-03-22 The introduction of the Affordable Care Act in the United States the increasing use of prescription drugs and the alleged abuse of racial profiling by police are just some of the factors contributing to twenty first century social problems The Cambridge Handbook of Social Problems offers a wide ranging roster of the social problems currently pressing for attention and amelioration Unlike other works in this area it also gives great consideration to theoretical and methodological discussions This Handbook will benefit both undergraduate and graduate students eager to understand the sociology of social problems It is suitable for classes in social problems current events and social theory Featuring the most current research the Handbook provides an especially useful resource for sociologists and graduate students conducting research

Framing Environmental Disaster Melissa K. Merry, 2013-12-04 The blowout of the Deepwater Horizon and subsequent underground oil spill in the Gulf of Mexico in 2010 is considered by

many to be the worst environmental disaster in U S history Interest groups public officials and media organizations have spent considerable time documenting the economic and ecological impacts of this spill as well as the causes of the spill ostensibly to prevent future disasters of this magnitude However rather than an unbiased search for answers such investigations involve strategic efforts by a variety of political actors to define the spill and its causes in ways that lead to their preferred policy solutions Framing Environmental Disaster evaluates the causal stories that environmental groups tell about the spill and develops theoretical propositions about the role of such stories in the policy process Which actors do groups hold responsible and how do groups use blame attributions to advance their policy agendas Constructing a creative methodological approach which includes content analysis drawn from blog posts emails press releases and testimony before Congress and insights and quotations drawn from interviews with environmental group representatives Melissa K Merry argues that interest groups construct causal explanations long before investigations of policy problems are complete and use focusing events to cast blame for a wide range of harms not directly tied to the events themselves In doing so groups seek to take full advantage of windows of opportunity resulting from crises An indispensable resource for scholars of public policy and environmental politics and policy this book sheds new light on the implications of the gulf disaster for energy politics and policies while advancing scholarly understandings of the role of framing and causal attribution in the policy process

Lessons of Disaster Thomas A. Birkland, 2006-11-07 Even before the wreckage of a disaster is cleared one question is foremost in the minds of the public What can be done to prevent this from happening again Today news media and policymakers often invoke the lessons of September 11 and the lessons of Hurricane Katrina Certainly these unexpected events heightened awareness about problems that might have contributed to or worsened the disasters particularly about gaps in preparation Inquiries and investigations are made that claim that lessons were learned from a disaster leading us to assume that we will be more ready the next time a similar threat looms and that our government will put in place measures to protect us In Lessons of Disaster Thomas Birkland takes a critical look at this assumption We know that disasters play a role in setting policy agendas in getting policymakers to think about problems but does our government always take the next step and enact new legislation or regulations To determine when and how a catastrophic event serves as a catalyst for true policy change the author examines four categories of disasters aviation security homeland security earthquakes and hurricanes He explores lessons learned from each focusing on three types of policy change change in the larger social construction of the issues surrounding the disaster instrumental change in which laws and regulations are made and political change in which alliances are created and shifted Birkland argues that the type of disaster affects the types of lessons learned from it and that certain conditions are necessary to translate awareness into new policy including media attention salience for a large portion of the public the existence of advocacy groups for the issue and the preexistence of policy ideas that can be drawn upon This timely study concludes with a discussion of the interplay of multiple disasters focusing on the

initial government response to Hurricane Katrina and the negative effect the September 11 catastrophe seems to have had on reaction to that tragedy Social Information Technology: Connecting Society and Cultural Issues Kidd, Terry T.,Chen, Irene,2008-04-30 This book provides a source for definitions antecedents and consequences of social informatics and the cultural aspect of technology It addresses cultural societal issues in social informatics technology and society the Digital Divide government and technology law information security and privacy cyber ethics technology ethics and the future of social informatics and technology Provided by publisher Fostering Community Resilience Tom Lansford,Jack Covarrubias,Justin Miller,2016-04-22 Using the Mississippi Gulf Coast as a case study this book focuses on the aftermath of Hurricane Katrina and develops the concept of resilience and how it applies to Homeland Security in the aftermath of the worst natural disaster to hit the United States Through the lens of the national response to Hurricane Katrina and the local lens of the recovery of the Mississippi Gulf Coast community this work elucidates the particular qualities that make a community and a nation more resilient discussing resilience as a concept and an application Additionally it explores in depth the interconnected fields that comprise resilience including economic social infrastructure and political domains By examining what went right what went wrong and what can be improved upon during the Mississippi Gulf Coast s recovery scholars and policymakers can better understand community resilience not just as a concept but also as a practice **The Book Review Digest** ,2006 Natural Disaster Analysis After Hurricane Katrina Harry Ward Richardson,Peter Gordon,James Elliott Moore,2008 Hurricane Katrina was a pivotal event in the history of disaster mismanagement whose impact will be felt well into the future The papers in this volume explore key policy implications arising from the storm and its aftermath New Left Review ,2006 **Invitation to Terror** Frank Furedi,2007-12-30 Frank Furedi s claim that the social attitude of the West inadvertently invites acts of terrorism is an unsettling thought but one that must be addressed in open discussion He argues that what we really need to worry about is not what terrorist do but our reaction to it **The European Union and Terrorism** David Spence,2007 The September 11 attacks in the USA lent huge impetus to efforts to coordinate and expand the EU s counter terrorism role bringing about far reaching cooperation and pushing the EU down the track of further European integration In setting out the EU s achievements in the fight against terrorism the chapters in this book explain how and why this has come about and the mechanisms involved They also critically assess the limits of such integration and explore the tensions between co operation and the issue of individual human rights A selection of key documents rounds out the book with a valuable reference dimension This book brings together key thinkers and is a welcome analysis of terrorism challenges **The Selendang Ayu Oil Spill** Reid Sinclair Brewer,2006 On December 8 2004 the Malaysian freighter Selendang Ayu went aground and broke in half at Skan Bay off Unalaska Island in the Aleutian chain The accident sent 336 000 gallons of oil and 66 000 tons of soybeans into the water and onto the shores of the island Six crew members died during a rescue attempt State and federal agencies immediately sprang into action to minimize the damage

and loss of life caused by the wreckage and the spill This book is the story of their efforts and the lessons everyone can learn from the disaster Thirteen articles are by presenters at the Aleutian Life Forum conference August 2005 representing the response groups and several essays are included by nonfiction writer Nancy Deschu **Understanding Policy Success** Allen McConnell,2010-08-11 Success and failure are key to any consideration of public policy but there have been remarkably few attempts to assess systematically the various dimensions and complex nature of policy success This important new text fills the gap by developing a systematic framework and offering an entirely new way of introducing students to policy analysis
