Transboundary Governance Of Biodiversity Legal Aspects Of Sustainable Development:

Transboundary Governance of Biodiversity Louis J. Kotzé, Thilo Marauhn, 2014-06-26 Transboundary Governance of Biodiversity compiles critical analysis of the regulatory frameworks applicable to the transboundary governance of biodiversity by specialists from Europe and Africa Drawing on their vast experience as lawyers political scientists and natural resource management experts they provide a critique and contemporary perspectives on what has become one of the most challenging aspects of global environmental governance in the Anthropocene effective biodiversity conservation in times of unprecedented environmental crises With a unique North South focus and a legal focus infused by multi disciplinary regulatory dimensions this peer reviewed publication offers a comprehensive analysis of international and regional environmental law frameworks applicable to the transboundary governance of biodiversity *Legal Aspects of Sustainable Development* Volker Mauerhofer, 2015-11-26 This book addresses legal aspects of sustainable development and offers the latest thinking on a wide range of current themes By taking a cross cutting approach it adds considerably to the exploration of this emerging scientific field Twenty nine original contributions present innovative thoughts and replicable ideas from this exciting new area which will be of value to practitioners and researchers alike These contributions are allocated into a horizontal and sectorial part The section covering horizontal policies has five sub parts 1 general aspects 2 human and intellectual property rights 3 communication and social enterprise governance 4 public participation and 5 assessment tools The second part on sectorial policies also has five sub parts 1 forest and water management 2 renewable energy 3 cities waste and material management 4 biodiversity nature conservation oceans and spatial planning and 5 agriculture and rural policy It offers a multifaceted discussion of sustainable development and law by authors from five continents and from both the public and the private sectors This selection guarantees a broad view that presents the more theoretical arguments from the academic as well as the practical perspective Furthermore the authorship includes senior highly experienced academics and practitioners as well as those at the start of their career This ensures thoughtful expansions of established theories as well as the emergence of innovative ideas Moreover the ten sub parts bring together likeminded thoughts resulting in an exchange of different viewpoints on a similar theme This allows the readers to concentrate on individual chapters while at the same time discovering a variety of thoughts and ideas **International Governance of the Arctic Marine**

Environment Lilly Weidemann, 2014-04-09 The Arctic is particularly affected by climate change over the past few decades temperatures in this area have risen twice as fast as the mean global rate The most prominent effect of global climate change in the region is the melting sea ice in the Arctic Ocean which enables a multitude of ocean uses to be initiated and extended such as shipping fishing and oil and gas extraction Unlike in the Antarctic there is currently no single comprehensive legal regime for governance of the Arctic Instead the region is regulated by a patchwork of international treaties above all the United Nations Convention on the Law of the Sea UNCLOS various regional and sub regional agreements national laws and

soft law agreements This treatise provides an evaluation of the governance regime that regulates the use of the Arctic marine environment and its readiness to protect these fragile ecosystems in light of the consequences of climate change

Implementing International Watercourses Law through the WEF Nexus and SDGs Zeray Yihdego, Julie Gibson, 2020-11-16 Implementing International Watercourses Law through the WEF Nexus and SDGs An Integrated Approach Illustrated in the Zambezi River Basin offers an innovative approach to the implementation of international water law IWL through integration of the law the WEF Nexus and SDGs

Global Environmental Constitutionalism in the Anthropocene Louis J Kotzé, 2016-09-22 There is persuasive evidence suggesting we are on the brink of human induced ecological disaster that could change life on Earth as we know it There is also a general consensus among scientists about the pace and extent of global ecological decay including a realisation that humans are central to causing the global socio ecological crisis This new epoch has been called the Anthropocene Considering the many benefits that constitutional environmental protection holds out in domestic legal orders it is likely that a constitutionalised form of global environmental law and governance would be better able to counter the myriad exigencies of the Anthropocene This book seeks to answer this central question from the perspective of the Anthropocene what is environmental constitutionalism and how could it be extrapolated to formulate a global framework In answering this question this book offers the first systematic conceptual framework for global environmental constitutionalism in the epoch of the Anthropocene

Does the UN Model Still Work? Challenges and Prospects for the Future of Multilateralism, 2022-11-28 Composed of original articles from academics and policy notes from practitioners this book attempts to draw up the state of multilateralism through the UN model and identify potential ways to address its challenges and shortcomings The contributors question the role of multilateralism sometimes accused of being fragmented inefficient and unrepresentative and its impact on global governance democracy trade and investment the environment and human rights Since most of the authors are not from the UN system the content of the contributions provides an external and more neutral assessment of the UN s ability to continue to function today as a serious actor within a global movement in favor of a renewed form of multilateralism Does the UN Model Still Work Challenges and Prospects for the Future of Multilateralism is now available in paperback for individual customers

Legal Aspects of Implementing the Cartagena Protocol on Biosafety Marie-Claire Cordonier Segger, Frederic Perron-Welch, Christine Frison, 2013-01-28 This book the first in a series that focuses on treaty implementation for sustainable development examines key legal aspects of implementing the Cartagena Protocol on Biosafety to the UN Convention on Biological Diversity CBD at national and international levels The volume provides a serious contribution to the current legal and political academic debates on biosafety by discussing key issues under the Cartagena Protocol on Biosafety that affect the further design of national and international law on biosafety and analyzing progress in the development of domestic regulatory regimes for biosafety In the year of the fifth UN Meeting of the Parties to the Cartagena Protocol on Biosafety at the signature of a new

Nagoya Kuala Lumpur Protocol on Liability and Redress this timely book examines developments in biosafety law and policy

Groundwater and Climate Change Philippe Cullet, Raya Marina Stephan, 2018-08-30 This book undertakes a scholarly assessment of the state of the art of law and policy perspectives on groundwater and climate change at the international regional and national levels A particular focus is given to India which is the largest user of groundwater in the world and where groundwater is the primary source of water for domestic and agricultural uses The extremely rapid rise in groundwater use in many Indian states has led to a growing groundwater crisis that they must address The existing regulatory framework has not adapted to the challenges and fails to address any environmental concerns On climate change India has adopted a policy framework that makes the link with water but no legislation has followed up to make the link operational The subject matter of this book has been widely debated with regard to each of its main two components separately Bringing these two domains together is what makes this book unique The link between climate change and groundwater has been acknowledged to some extent and there is growing interest in studying the impacts of climate change on ground water Similarly in water and environmental law and policy increasing attention has been given to the study of climate change and groundwater legal and policy frameworks but generally separately This book contributes to filling this knowledge gap by drawing on contributions from leading experts in the field of environmental and water law and policy who have been involved in climate change and or groundwater research The chapters in this book were originally published in a special issue of *Water International* *Routledge Handbook of International Environmental Law* Shawkat Alam, 2013 This handbook is an advanced level reference guide which provides a comprehensive and contemporary overview of the corpus of international environmental law IEL

Transboundary Marine Spatial Planning and International Law Daud Hassan, Tuomas Kuokkanen, Niko Soininen, 2015-07-16 Marine Spatial Planning MSP is an integrated and comprehensive approach to ocean governance and is used to establish a rational use of marine space and reconcile conflicting interests of its users MSP allows both a high level of environmental protection and a wide range of human activities and emphasizes coordinated networks of national regional and global institutions This book focuses on the framework of international law behind MSP and especially on the transboundary aspects of MSP It first sets out a general framework for transboundary MSP and then moves on to compare and assess differences and similarities between different regions Specific detailed case studies include the EU with the focus on the Baltic Sea and North Sea the Bay of Bengal and Great Barrier Reef in Australia The authors examine the national and regional significance of MSP from an integrated and sustainable ocean governance point of view They also show how transboundary MSP can create opportunities and positive initiatives for cross border cooperation and contribute to the effective protection of the regional marine environment
