Transboundary Water Resources Management A Multidisciplinary Approach:

Transboundary Water Resources Management Jacques Ganoulis,Alice Aureli,Jean Fried,2013-09-13 Based on an international symposium addressing a key issue in global development this reference includes both the latest methodologies for and practical examples of effective management of transboundary water resources Its multidisciplinary approach combines hydrology and environmental science with economic and political approaches in line with new UNESCO and EU recommendations which have been formulated and implemented with the active involvement of all three editors By providing a theoretical framework as well as abundant case studies from southern Europe Africa Asia and South America this handbook provides hydrologists geologists engineers and decision makers with all the knowledge they need for their daily work

Management Of Transboundary Water Resources Under Scarcity: A Multidisciplinary Approach Ariel

Dinar,Yacov Tsur,2017-03-17 Water scarcity due to climate change population growth and economic development is a critical issue in many semi arid and arid regions around the world Water scarcity is especially critical in regions where water is shared by several riparian states and used for competing purposes irrigation domestic industry environment and hydropower There is evidence that water scarcity may give rise to conflicts among the riparian states that share water basins At the same time there is evidence that proper arrangements among riparian states create a basis for cooperation which is a necessary condition for economic development food production environmental sustainability and poverty reduction This book presents a collection of work presented by a group of academics and policy experts dealing with the impact of water scarcity and variability on the ability to jointly manage shared water and the derived welfare of international states and nations sharing international river basins consisting of economics technology law and institutions geography and international relations The book covers theoretical aspects of management of transboundary water as well as case studies from hotspots around the world The unique aspect of this book is the multidisciplinary nature of the chapters reflecting a new field of research that will gain popularity as water scarcity will increase over time and across regions The chapters from the book were presented at the Management of Transboundary Water Resources under Scarcity Perspectives on Agriculture and Food Security workshop held at The Hebrew University of Jerusalem Israel from June 22 to 23 2015 *Transboundary Hydro-Governance* Jacques Ganoulis,Jean Fried,2018-06-06 Attending water security is an important challenge and a major systemic risk humanity faces in the years to come This is due to population increase over consumption of water especially in agriculture climate change and various forms of water pollution The issue becomes more complicated in transboundary water catchments that cover almost half of the world s land surface with about 60% of global river flow and 40% of the world s population Also in many parts of the planet like Saharan Africa population depends on groundwater resources located in transboundary aquifer systems These facts illustrate the importance of the book s subject which is the governance of transboundary waters both surface and groundwater The book is written by two distinguished scientists who having worked in various international

institutions like UNESCO GEF UNEP and at the European Commission have both an extended expertise on how to bridge the gap between science and political decision making which is the main factor for an effective governance of water resources. What is new in the book is the integrated analysis of transboundary governance of both surface water and groundwater as it occurs in reality. In current literature groundwater is still often missing for the benefit of surface water or on the contrary it is treated separately from surface water. The most important feature of the book is to distinguish between the real and a good or an effective transboundary water governance and to provide practical tools, methodologies and examples for its implementation in the field. Published timely during 2018, the book will contribute to address successfully practical problems of governance of transboundary waters that represent a very important part of our precious fresh water resources.

Handbook of Water Resources Management: Discourses, Concepts and Examples Janos J. Bogardi, Joyeeta Gupta, K. D. Wasantha Nandalal, Léna Salamé, Ronald R.P. van Nooijen, Navneet Kumar, Tawatchai Tingsanchali, Anik Bhaduri, Alla G. Kolechkina, 2021-06-12. This book provides an overview of facts, theories and methods from hydrology, geology, geophysics, law, ethics, economics, ecology, engineering, sociology, diplomacy and many other disciplines with relevance for concepts and practice of water resources management. It provides comprehensive but also critical reading material for all communities involved in the ongoing water discourses and debates. The book refers to case studies in the form of boxes, sections or as entire chapters. They illustrate success stories but also lessons to be remembered to avoid repeating the same mistakes. Based on consolidated state of the art knowledge, it has been conceived and written to attract a multidisciplinary audience. The aim of this handbook is to facilitate understanding between the participants of the international water discourse and multi-level decision making processes. Knowing more about water but also about concepts, methods and aspirations of different professional disciplinary communities and stakeholders professionalizes the debate and enhances the decision making.

Global Water R. Quentin Grafton, Paul Wyrwoll, Chris White, David Allendes, 2014-05-28. This book brings together some of the world's leading water researchers with an especially written collection of chapters on water, economics, transboundary water, water and development, water and energy and water concepts.

Transboundary Water Resources in the Balkans Jacques Ganoulis, I.L. Murphy, Mitja Brilly, 2012-12-06. A source of up to date information on current water resources, their quality and quantity in every country in the Balkans. Institutional structures, water management issues and water monitoring problems are analyzed with special reference to international waters using characteristic case studies including the Sava River, Lake Ohrid, The Nestos, Mesta River, the Neretva River estuary and coastal waters in Turkey. Contributions written by experts from France, the UK and the USA demonstrate state of the art electronic networking and the management of distributed water databases. The protection of water resources in the Balkans has become a high profile issue since the collapse of communism in the area, the break up of former Yugoslavia and ethnic tensions in Kosovo. Transboundary river pollution and the development of international water basins call demand urgent regional co-operation which will be

facilitated by the International Network of Water Environment Centres for the Balkans the initiation of which is described in the final conclusions of the book

Turkey's Water Diplomacy Aysegül Kibaroglu, 2021-02-15 Turkey's Water Diplomacy delineates the institutional and legal foundations of transboundary water policy making in Turkey paying special attention to the evolution of transboundary water politics in the Euphrates Tigris river basin The book also analyses how Turkey's harmonization with the European Union has impacted the transboundary water policy discourses and practices and how these changes have been reflected in its relations with its Middle Eastern neighbours Turkey was one of the three countries that rejected the UN Watercourses Convention in 1997 Yet since the voting of the convention there have been changes in Turkey's stance vis vis international water law which the book studies Turkey's water diplomacy embodies complex water management problems which can be best understood as a product of competition feedback and interconnection among natural and societal variables in a political context Hence the book adopts the Water Diplomacy Framework with its key elements in making policy relevant recommendations specifically for Turkey's water diplomacy

Integrated Water Resource Management Edson de Oliveira Vieira, Samuel Sandoval-Solis, Valmir de Albuquerque Pedrosa, J. Pablo Ortiz-Partida, 2019-06-12 This book presents case studies that share important experiences regarding Integrated Water Resource Management IWRM in various countries Following an introduction to theoretical concepts responsibilities and challenges the subsequent chapters address among other topics an analysis of policies and regulations for water management in Brazil the drivers that led California to adapt to the IWRM framework and the international regulations for water markets and water banking in Australia and Chile The implications of climate change for water resource systems in Mexico are discussed as well as management strategies from California that could potentially serve as IWRM adaptation schemes in Mexico Critical cases from Guanacaste Costa Rica and from Zayandehrud River Basin and Lake Urmia Iran are reviewed in terms of management practices and solutions The book also provides an overview of the current availability and use of water resources in South Korea and discusses the management of and international water law instruments for transboundary groundwater in Africa

River Basin Organizations in Water Diplomacy Anoulak Kittikhoun, Susanne Schmeier, 2020-11-19 Will tensions and disputes among states sharing international water courses and lakes turn into active conflicts Addressing this question the book shows that these concerns are more prominent due to the locations and underlying political dynamics of some of these large rivers and the strategic interests of major powers Written by a combination of leading practitioners and academics this book shows that states are more prone to cooperate and manage their transboundary issues over the use of their common water resources through peaceful means and the key institutions they employ are international river basin organizations RBOs Far from being mere technical institutions RBOs are key mechanisms of water diplomacy with capacity and effectiveness varying on four key interrelated factors their legal and institutional development and the influence of their technical and strategic resources The basins analyzed span all continents

from both developed and developing basins including the Columbia Great Lakes Colorado Senegal Niger Nile Congo Jordan Helmand Aral Sea Mekong Danube and Rhine Contributing to the academic discourse on transboundary water management and water conflict and cooperation the book provides insights to policy makers on which water diplomacy engagements can be successful the strengths to build on and the pitfalls to avoid so that shared water resources are managed in a cooperative sustainable and stable way

Free flow UNESCO,2013-10-17 Water is an essential resource for mankind and our ecosystems Free Flow is a fully illustrated book with over 100 authors work on water management and cooperation at international regional national municipal and local levels Their commentaries draw upon experiences around the world reflecting how people are changing their interaction with water to improve sustainable development The publication reflects progresses and challenges in these fields highlighting good practices in a wide variety of societies and disciplines The book strives to project experiences into future actions and encourages further institutional commitments to better understanding of and more effective management of water cooperation in order to achieve sustainable development
