Transcendence Margaret S. Archer, Andrew Collier, Douglas V. Porpora, 2013-04-15 The book explores religious experience as a justifiable reason for religious belief demonstrating that the three pillars of Critical Realism ontological intransitivity epistemic relativity and judgemental rationality can be applied to religion

A Hospice in Change Martin Lipscomb, 2013-10-15 A Hospice in Change Applied Social Realist Theory reports upon a study into aspects of the ways in which structural and organisational developments professional cultures and bedside or patient focused clinical practice interact within a single UK institution While the findings of this study are time and context specific the events and social processes being described may nonetheless resonate closely with the experience of healthcare practitioners at other hospices both within and without the UK The work examines themes and ideas that hospice and palliative care practitioners as well as those involved or interested more broadly in end of life issues may find relevant It is argued that differential morphogenesis can be identified between structures social and cultural and agents individual and group at an independent healthcare charity in southern England A Hospice in Change connects theory and philosophy with concrete research practice to provide a worked example of Margaret Archer's realist social theory

Faithful Science Alistair J. McKitterick, 2022-03-17 This thesis studies the impact of teaching intelligent design to evangelical students Science is often presented as a reason why some find sharing their faith difficult in a secular culture teaching the science of intelligent design enables Christians to initiate conversations and overcome obstacles with those whose worldview is more Darwinian and materialist The professional doctoral research employs both action research and practical theology Lin Norton's pedagogical action research provides the structure for the qualitative research and thematic analysis showing that students find learning about intelligent design empowering for evangelism Richard Osmer's model of practical theology enables an interdisciplinary reflection on how intelligent design challenges Western secular culture Intelligent design is seen as the most integrative of all the different ways of relating science and theology Theologically teaching intelligent design is like teaching a modern parable to contemporary society and just like the Gospel parables some respond with faith and some reject it Evangelical students find learning about it both liberating and empowering in their ability to share their faith more confidently with others especially in schools and youth groups

Eurocentrism: a marxian critical realist critique Nick Hostettler, 2013-05-07 The political and social structures of modernity are dominated by really eurocentric forms and relations yet the theorisation of the eurocentricity of modernity remains barely developed At the same time modern political and social theory is fundamentally eurocentric yet the critique of eurocentrism remains marginal to marxian and critical realist theory Addressing the eurocentrism of both modernity and modern theory Eurocentrism A Marxian Critical Realist Critique discloses the deeply embedded constraints it imposes on historical and social reflexivity Building on the insights of post structuralism and post colonialism Eurocentrism shows how the powerful anti eurocentric tendencies of the marxian critique of civil society and the

critical realist critique of philosophy have been misunderstood or ignored It develops the latent potential of these traditions to develop a systematically anti eurocentric approach to understanding and explaining modernity

Explaining Global Poverty Branwen Gruffydd Jones,2007-01-24 Gruffydd Jones approach brings a book of real relevance for inequality in the modern world and gives an important platform from which to move forwards in the fight against poverty

Worship or Suicide Oleg Dik,2025-10-07 There is a growing unease about the perceived decay of Western civilization Intellectuals ruminate about a post liberal future and an atmosphere of dread permeates the public sphere One senses that the old is fading while the emerging order is not in sight Worship or Suicide offers both an account of how Western civilization came to flourish and an explanation as to why its decay was already present in its success Every civilization is rooted in foundational myths and rituals The removal of the Western roots from the Judeo Christian soil leads toward the withering of the social order Other gods move into the vacuum and transform the West into soft totalitarianism Thus the church both is responsible for social decay through its idolatry and also contains the potential for renewal Yet the solution does not lie in the instrumental use of religion Instead the church gives birth to a flourishing society paradoxically By excluding the immanent order and solely focusing upon the worship of the triune God the church unintentionally redeems society from its suicidal drive

The Politics of Method in the Human Sciences George Steinmetz,2005 Offers a comparative assessment of the variations of positivism alternative epistemologies in the contemporary human sciences Often declared obsolete positivism is alive well in a number of fields while in others its influence is significantly diminished

Handbook of Integrated Care Volker Amelung,Viktoria Stein,Esther Suter,Nicholas Goodwin,Ran Balicer,Anna-Sophia Beese,2025-11-03 This handbook shares profound insights into the main principles and concepts of integrated care It offers a multi disciplinary perspective with a focus on patient orientation efficiency and quality by applying widely recognized management approaches to the field of healthcare The handbook also highlights international best practices and shows how integrated care can work in various health systems In the majority of health systems around the world the delivery of healthcare and social care is characterised by fragmentation and complexity Consequently much of the recent international discussion in the fields of health policy and health management has focused on the topic of integrated care Integrated acknowledges the complexity of patients needs and aims to meet them by taking into account both health and social care aspects Changing and improving processes in a coordinated way is at the heart of this approach The third edition offers new chapters on people centredness complexity theories and evaluation methods additional management tools and a wealth of experiences from different countries and localities It is essential reading both for health policymakers seeking inspiration for legislation and for practitioners involved in the management of public health services who want to learn from good practice

Maurice Mandelbaum and American Critical Realism Ian F. Versteegen,2009-12-16 This is a unique and timely assessment of the work of American critical realist Maurice Mandelbaum and the relation of his thought to contemporary critical realism Particular attention is

paid to how his theories relate to those of Roy Bhaskar This is essential reading for any student with an interest in critical realism or the history of philosophy **Disability, Intersectional Agency, and Latinx Identity** Alexis Padilla, 2021-07-28

This interdisciplinary volume links disability and agency by exploring LatDisCrit's theory and activist emancipatory practice. It uses the author's experiential and analytical views as a blind brown Latinx engaged scholar and activist from the global south living and struggling in the highly racialized global north context of the United States. LatDisCrit integrates critically LatCrit and DisCrit which look at the interplay of race, ethnicity, diasporic cultures, historical sociopolitics, and disability within multiple Latinx identities in mostly global north contexts while incorporating global south epistemologies. Using intersectional analysis of key concepts through critical counterstories following critical race theory methodological traditions and engaging possible decoloniality treatments of material precarity and agency, this book emphasizes intersectionality's complex underpinnings within and beyond Latinidades. Through a careful interplay of disability, identity, and disability rights empowerment, the volume opens avenues for intersectional solidarity and spaces for radical transformational learning. This book will be of interest to all scholars and students working in disability studies, intersectional disability justice, activists, critical Latinx/Chicanx studies, critical geographies, intersectional political philosophy, and political and public sociology.
