Transformation And Trouble Crime Justice And Participation In Democratic South Africa:

Transformation and Trouble Diana Gordon, 2009-09-23 Crime is one of the major challenges to any new democracy. Violence often increases after the lifting of authoritarian control or in the aftermath of regime change. But how can a fledgling democracy fight crime without violating the fragile rights of its citizens? In *Transformation and Trouble*, accomplished theorist and criminal justice scholar Diana Gordon critically examines South Africa's efforts to strike the perilous balance between democratic participation and social control. South Africa has made great progress in pursuing the Western ideals of participatory justice and due process. Yet Gordon finds that popular concerns about crime have fostered the growth of a punitive criminal justice system that undermines the country's rights-oriented political culture. *Transformation and Trouble* calls for South Africa to reaffirm its commitment to public empowerment by reforming its criminal justice system, an approach she argues that would strengthen the country's new democracy. An eloquent critical but ultimately optimistic analysis of the democratization of crime and justice in post-apartheid South Africa. Bill Dixon, School of Criminology, Education, Sociology, and Social Work, Keele University. A must read for understanding contemporary South Africa's agonizing dilemmas as it struggles to reconcile crime control with democratic values. Jerome H. Skolnick, New York University School of Law. Gordon's vast experience with criminal justice illuminates her cautionary tale of the search for a new way in South Africa. Paul Chevigny, New York University. Diana Gordon is Professor Emerita of Political Science and Senior Research Scholar, City University of New York.

Governing through Crime in South Africa Gail Super, 2016-04-22 This book deals with the historic transition to democracy in South Africa and its impact upon crime and punishment. It examines how the problem of crime has emerged as a major issue to be governed in post-apartheid South Africa. Having undergone a dramatic transition from authoritarianism to democracy, from a white minority to black majority government, South Africa provides rich material on the role that political authority and challenges to it play in the construction of crime and criminality. As such, the study is about the socio-cultural and political significance of crime and punishment in the context of a change of regime. The work uses the South African case study to examine a question of wider interest, namely the politics of punishment and race in neoliberalizing regimes. It provides interesting and illuminating empirical material to the broader debate on crime control in post-welfare neoliberalizing post-transition polities.

The Era of Transitional Justice Paul Gready, 2010-10-18 *The Era of Transitional Justice* explores a broad set of issues raised by political transition and transitional justice through the prism of the South African TRC. South Africa constitutes a powerful case study of the enduring structural legacies of a troubled past and of both the potential and limitations of transitional justice and human rights as agents of transformation in the contemporary era. South Africa's story has wider relevance because it helped to launch constitutional human rights and transitional justice as global discourses; as such, its own legacy is to some extent writ large in post-authoritarian and post-conflict contexts across the world. Based on a decade of research and in an analysis that is both comparative and

interdisciplinary Paul Gready maintains that transitional justice needs to do more to address structural violence and in particular poverty inequality and social and criminal violence as these have emerged as stubborn legacies from an oppressive or war torn past in many parts of the world Organised around four central themes new keyword conceptualisation truth justice reconciliation re imagining human rights engaging with the past and present remaking the public sphere it is an argument that will be of considerable relevance to those interested in the law and politics of transitional societies **World Criminal Justice Systems** Richard J. Terrill, 2013 Includes bibliographical references p 639 665 and indexes

Transnational Companies and Security Governance Jana Hönke, 2013-08-21 This book investigates governance practiced by non state actors It analyses how multinational mining companies protect their sites in fragile contexts and what that tells us about political ordering beyond the state Based on extensive primary research in the Democratic Republic of Congo South Africa Europe and North America the book compares companies political role in the 19th and 21st centuries It demonstrates that despite a number of disturbing parallels many contemporary practices are not a reversion to the past but unique to the present The book discloses hybrid security practices with highly ambiguous effects around the sites of contemporary companies that have committed to norms of corporate social and security responsibility Companies invest in local communities and offer human rights training to security forces alongside coercive techniques of fortress protection and stability oriented clientele practice and arrangements of indirect rule The book traces this hybridity back to contradictory collective meaning systems that cross borders and structure the perceptions and choices of company managers private security officers NGO collaborators and others practitioners The book argues that hybrid security practices are not the result of an encounter between a supposed local with the liberal global Instead this hybridity is inherent in the transnational and part and parcel of liberal transnational governance Therefore more critical reflection of global governance in practice is required These issues are sharply pertinent to liberal peacebuilding as well as global governance more broadly The book will be of interest to anyone interested in business politics and human rights critical security studies peacebuilding and statebuilding African politics and ethnographic and sociological approaches to global governance and international relations more generally **The South African State Transformed?** Louis A. Picard, Thomas M. Mogale, Caitlin C.

Corrigan, 2024-09-10 This book examines the nature of the 1994 political transition in South Africa and its impact on post apartheid South Africa Specifically it examines the failures of liberalism within the context of the transitional process that led to the institution if not the practice of a non racial state in 1994 The term liberal is an eclectic term defining a several of views political and economic We use the term here within context but essentially define it as a commitment to open views the willingness to consider change and to value basic human rights The nature of institutional change in South Africa as it moved towards a democratic state would influence whether South Africa would succeed as a newly industrializing pluralist democratic country or collapse into yet another African failed state As South Africa moves toward its fourth decade of

majority rule the view towards the future is much less promising than it was in 1994

Policing: Toward an Unknown Future John Crank, Colleen Kadleck, 2013-12-16 The enclosed papers are the culmination of a project Dr John Crank and Dr Colleen Kadleck carried out assessing issues facing the police into the early 21st century The papers are future oriented in the sense that they anticipate trends visible today Everywhere the contributing scholars found that the organizational concept practice and function of the police were undergoing transition Yet the seeming state level hardening of the police function was ubiquitous Two themes were noteworthy On the one hand in developing or second world countries police face endemic problems of corruption organized crime and drugs Police in response are undergoing centralization and intensification of law enforcement activities In countries with first world economies Canada the United States and Australia contributors discovered trends toward expansion of the police function a trend described by Brodeur as toward high policing It reflects the growing reliance on surveillance for crime control and for the tracking of minority indigenous and immigrant populations in crime prevention efforts The results suggest that governments sometimes encouraged by their citizenry seem increasingly to rely on the police to deal with a broad array of social as well as criminal problems This book was originally published as a special issue of *Police Practice and Research*

Transnational Organized Crime Jay Albanese, Philip Reichel, 2013-05-07 *Transnational Organized Crime An Overview from Six Continents* explores the expansive topic of transnational organized crime incorporating expert perspectives found throughout the world's six inhabited continents North America Central and South America Europe Africa Asia and Oceania Editors Jay S Albanese and Philip L Reichel gather the knowledge and expertise of numerous authors researchers and practitioners in this field who are either native to each world region have extensively travelled and worked there or are recognized scholars for those regions Through this unique text readers will begin to understand the geographic cultural and regional similarities and differences underlying the common threat of transnational organized crime as well as how to address the global expansion of organized crime today

Police in Africa Jan Beek, Mirco Göpfert, Olly Owen, Jonny Steinberg, 2017 State police forces in Africa are a curiously neglected subject of study even within the framework of security issues and African states This work brings together criminologists anthropologists sociologists historians political scientists and others who have engaged with police forces across the continent and the publics with whom they interact to provide street level perspectives from below and inside Africa's police forces

Murder and Politics in Mexico Sara Schatz, 2011-02-28 *Murder and Politics in Mexico* studies the causes of political killings in Mexico's liberalization democratization within the larger context of political repression Mexico's democratization process has entailed a little known but highly significant cost of human lives in pre and post election violence The majority of these crimes remain in a state of impunity in other words no person had been charged with the crime and or no investigation of it had occurred This has several consequences for Mexican politics when the level of violence is extreme and when political killings that are systematic and invasive are involved this could indicate a real fracture in the

democratic system This book analyzes several dimensions regarding impunity and political crime more specifically the political killings of members of the PRD in the post 1988 period in Mexico The main argument proposed in this book is that impunity for political killings is a structured system requiring one central precondition namely the failure of the legal system to function as a system of restraint for killings Dr Schatz s research finds that political assassinations are indeed rational targeted actions but they do not occur within an institutional vacuum Political assassinations are calculated strategies of action aimed at eliminating political rivals As a form of interpersonal violence political assassination involves direct or implied authorization from political leaders the availability of assassins for hire and the willingness of some political leaders to utilize them against political opponents and violent interactions between political parties combined with judicial system ineffectiveness A corrupt legal system facilitates the use of political assassination and explains the persistence of impunity for political murder over time To reduce political violence in the transition to electoral democracy specific institutional conditions namely a structured system of impunity for murder must be overcome
