new world is increasingly being transformed in ways and by devices that seem to come out of the pages of science fiction even while the world itself is becoming a futuristic landscape The result is that science fiction provides the most useful social theory the only form that manages to be as radical as reality itself Connected looks at how our networked environment has manifested itself in the work of J G Ballard William S Burroughs Philip K Dick William Gibson K W Jeter and others Shaviro focuses on science fiction not only as a form of cultural commentary but also as a prescient forum in which to explore the forces that are morphing our world into a sort of virtual reality game Original and compelling Connected shows how the continual experimentation of science fiction like science and technology themselves conjures the invisible social and economic forces that surround us *Chasing Captain America* E. Paul Zehr,2018-04-17 Could we create a real life superhero by changing human biology itself The form and function of the human body once entirely delimited by nature are now fluid concepts thanks to recent advances in biomedical science and engineering Professor author and comic book enthusiast E Paul Zehr uses Marvel s Captain America an ordinary man turned into an extraordinary hero thanks to a military science experiment as an entry point to this brave new world of science no longer limited to the realm of fiction With our ever expanding scientific and technological prowess human biological adaptability is now in our fallible human hands Thanks to the convergence of biology engineering and technology we can now alter our abilities through surgery pharmaceutical enhancement technological fusion and genetic engineering Written in an accessible manner *Chasing Captain America* explores these areas and more asking what the real limits of being human are how far we should bend those limits and how we may be forced to reshape human biology if we are to colonize planets like Mars *The Publishers Weekly* ,2003
