The Great Cauldron Marie-Janine Calic, 2019-06-10 We often think of the Balkans as a region beset by turmoil and backwardness but from late antiquity to the present it has been a dynamic meeting place of cultures and religions Marie Janine Calic invites us to reconsider the history of this intriguing diverse region as essential to the story of global Europe

Legalist Empire Benjamin Allen Coates, 2016 Legalist Empire explores the intimate connections between international law and empire in the United States from 1898 to 1919

The European Heritage Gerard Delanty, 2017-07-06 Gerard Delanty offers a critical interpretation of the European heritage today in light of recent developments in the human and social sciences and in view of a mood of crisis in Europe that compels us to re think the European past One of the main insights informing this book is that a transnational and global perspective on European history can reorient the European heritage in a direction that offers a more viable way for contemporary Europe to articulate an intercultural identity in keeping with the emerging shape of Europe and with its own often acknowledged past He argues that the European heritage is based less on a universalistic conception of culture than on a plurality of interconnecting narratives Such a perspective opens up new directions for scholarship and public debate on heritage that are guided by critical cosmopolitan considerations that highlight contention resistances competition and dissonance He argues that the specificity of the European dimension of culture is in the entanglement of many cultures rather than in an original culture The cultures of Europe are not separated but have been shaped in close interaction with each other and with the non European world Nations are not therefore unique exceptional or fundamentally different from each other The outcome of such intermingling is a multiplicity of ideas of Europe that serve as shared cultural reference

points **Esperanto and Languages of Internationalism in Revolutionary Russia** Brigid O'Keeffe, 2021-05-20 Winner of the 2022 Ab Imperio Award Hoping to unite all of humankind and revolutionize the world Ludwik Zamenhof launched a new international language called Esperanto from late imperial Russia in 1887 Ordinary men and women in Russia and all over the world soon transformed Esperanto into a global movement Esperanto and Languages of Internationalism in Revolutionary Russia traces the history and legacy of this effort from Esperanto's roots in the social turmoil of the pre-revolutionary Pale of Settlement to its links to socialist internationalism and Comintern bids for world revolution and finally to the demise of the Soviet Esperanto movement in the increasingly xenophobic Stalinist 1930s In doing so this book reveals how Esperanto and global language politics more broadly shaped revolutionary and early Soviet Russia Based on extensive archival materials Brigid O'Keeffe's book provides the first in depth exploration of Esperanto at grassroots level and sheds new light on a hitherto overlooked area of Russian history As such Esperanto and Languages of Internationalism in Revolutionary Russia will be of immense value to both historians of modern Russia and scholars of internationalism transnational networks and sociolinguistics Technological Internationalism and World Order Waqar H. Standardizing Empire Patrick Chung, 2026-02-03 Standardizing Empire traces the origins of today's United States led capitalist world economy. The nation's foreign policy during the Cold War saw two unprecedented developments: the continuous global deployment of US soldiers and the creation of a permanent worldwide military base network. In the process, the US military came to control the flow of billions of dollars large scale construction projects at home and abroad, the purchase of countless goods and services, and the employment of millions of soldiers and workers. In other words, the Cold War US military became the world's leading economic actor. To illuminate the political and economic consequences of the US military's globalization, Patrick Chung focuses on its activities in South Korea between the Korean and Vietnam Wars. Chung shows how the Korean War and the subsequent militarization of South Korea became an important site for the spread of a new economic system which he calls military industrial capitalism. Sustained by providing the infrastructure and materials for the US military's globalization, military industrial capitalism influenced the development of governments, corporations, and workers throughout the US led free world. As military industrial capitalism expanded, more of the world depended on the physical and administrative standards used by the US military. Ironically, the creation of a globalized economy facilitated both South Korea's economic miracle and the decline of US industrial might. To clarify how these broader developments transformed everyday life in South Korea and around the world, Standardizing Empire explores three of South Korea's leading multinational corporations: today's shipping company Hanjin, steelmaker POSCO, and car manufacturer Hyundai. These case studies not only trace the companies' early ties to the US military but also explain how they came to produce, sell, and employ workers worldwide, including in the United States.

The Nazi-Fascist New Order for European Culture Benjamin G. Martin, 2016-10-24 Following France's defeat, the Nazis moved forward with plans to reorganize a European continent now largely under Hitler's heel. Some Nazi elites argued for a pan-European cultural empire to crown Hitler's conquests. Benjamin Martin charts the rise and fall of Nazi fascist soft power and brings into focus a neglected aspect of Axis geopolitics.
