Transnational Punk Communities in Poland Marta Marciniak, 2015-07-16 A Transnational History of Punk Communities in Poland is a multi regional study of the history and contemporary condition of two Polish punk communities the one in Warsaw and surrounding areas and the Upper Silesian region both rich in varied and sometimes conflicting punk traditions The author a self identified member of the punk subculture formerly living and active in Warsaw explores the various political economic and social dimensions of the development of these unique communities and the meaning of the punk ethos for people across different age groups genders and life experiences in relation to other subcultures especially skinheads and the broader society An additional dimension previously unexplored in scholarship are the ties between these Polish punk communities and their counterparts in the United States and Canada The personal connections between early bands and the long lasting transnational aspects of punk practices are shown to be an important factor in the shaping of punk attitudes across time and space The economics of everyday punk life are discussed referring to contemporary scholarship on the subject punk lyrics and ethnographies which throughout the book illustrate selected themes and problems This study includes insight about obscure yet foundational Silesian bands and their defiant sardonic humor about punk and anarchy punk versus communism and the political opposition in the 1980s punks attitudes toward the transformation of 1989 about being a punk girl on the streets of Warsaw or Wodzislaw Slaski Discover punk as an old subculture that cherishes its own past and remains an important alternative to mainstream cultural practices in a rapidly Westernizing and corporatizing country

Out of Nihilism to Nothing Outside Punk Marta Elzbieta Marciniak, 2014 The present study is an oral history and ethnography of four communities in Poland and the United States that define themselves as belonging to the punk subculture It is based on oral history interviews conducted by the author in Poland and the United States during the years 2012 2013 While a lot of attention is devoted to the philosophical roots of punk and their longevity and continuous relevance to subsequent generations of punks around the globe the most important findings of this study concern the process of the transnational development of the subculture in the context of the Cold War technological progress and the alternative economy and institutions developed by punks that undergird the everyday functioning of punk communities It is the argument of this work that punk is simultaneously a transnational and a local phenomenon and that the role of centers and peripheries in its cultural production is ambiguous if one observes closely the productivity and innovation emanating from the smaller and more provincial centers of punk activity such as northeast Ohio and Upper Silesia The methods and motivations behind establishing and maintaining transnational connections among specific punk communities across political economic and cultural barriers are explored with the findings indicating that before 1989 these connections were possible due to individuals contacting each other via the mail and utilizing do it yourself institutions like labels and fanzines It is also argued that performance is a crucial dimension in the understanding of punk and that punk performance extends far beyond the stage during a given concert This aspect of the subculture is connected with its political dimensions which are intertwined with but separate from mainstream and official politics of the state and societies in which punks live It is proposed that punk offers a viable alternative living space in which members of this subculture often successfully address and resolve the problems facing post modern societies functioning in postindustrial economies

Outside the "Comfort Zone" Tatiana Klepikova, Lukas Raabe, 2020-07-06 Traditionally privacy studies have focused on the liberal democratic societies of the global West whereas non democratic contexts have played a marginal role in the discussion of the private and public spheres not in the least because of the political stances of the Cold War era This volume offers explorations of highly diversified performances and discourses of privacy by various actors which were embedded into the culturally economically and politically specific constructions of late socialism in individual states of the Warsaw Pact While the experience of socialism varied across the Bloc there were also some reactions to socialism and some reverse responses of socialist regimes to these reactions that one can trace through all states Contributions to this volume take us across the Eastern Bloc and beyond it from the Soviet Union into late socialist Poland Romania and East and West Germany While looking at specific countries they provide a glimpse into a broader perspective that reaches beyond the borders of individual late socialist states Together these articles document a palette of

paradigms of the construction and transformation of the private spheres that overcame the national borders of individual states and left an imprint across the Eastern Bloc thereby contributing to rethinking Cold War rhetoric in regard to these states
