Transport Geographies Mobilities Flows And Spaces:

Transport Geographies Richard Knowles, Jon Shaw, Iain Docherty, 2008 Brings together a range of expert insight to introduce the key ideas concepts and themes of transport geography This text explores the relationship between transport geography and geographical concerns as well as connections to other areas of study economics engineering environmental studies political science and spatial planning

Transport, Mobility, and the Production of Urban Space Julie Cidell, David Prytherch, 2015-05-01 The contemporary urban experience is defined by flow and structured by circulating people objects and energy Geographers have long provided key insights into transportation systems But today concerns for social justice and sustainability motivate new critical approaches to mobilities Reimagining the city prompts an important question How best to rethink urban geographies of transport and mobility This original book explores connections in theory and practice between transport geographies and new mobilities in the production of urban space It provides a broad introduction to intersecting perspectives of urban geography transport geography and mobilities studies on urban places of flows Diverse international and leading edge contributions reinterpret everyday intersections as nodes urban corridors as links cities and regions as networks and the discourses and imaginaries that frame the politics and experiences of mobility The chapters illuminate nearly all aspects of urban transport from street regulation and roadway planning intended and subversive practices of car and truck drivers planning and promotion of mass transit investments and the restructuring of freight and logistics networks Together these offer a unique and important contribution for social scientists planners and others interested in the politics of the city on the move

The Routledge Handbook of Mobilities Peter Adey, David Bissell, Kevin Hannam, Peter Merriman, Mimi Sheller, 2014-01-10 The 21st century seems to be on the move perhaps even more so than the last With cheap travel and more than two billion cars projected worldwide for 2030 And yet all this mobility is happening incredibly unevenly at different paces and intensities with varying impacts and consequences to the extent that life on the move might be actually quite difficult to sustain environmentally socially and ethically As a result mobility has become a keyword of the social sciences delineating a new domain of concepts approaches methodologies and techniques which seek to understand the character and quality of these trends This Handbook explores and critically evaluates the debates approaches controversies and methodologies inherent to this rapidly expanding discipline It brings together leading specialists from range of backgrounds and geographical regions to provide an authoritative and comprehensive overview of this field conveying cutting edge research in an accessible way whilst giving detailed grounding in the evolution of past debates on mobilities It illustrates disciplinary trends and pathways from migration studies and transport history to communications research featuring methodological innovations and developments and conceptual histories from feminist theory to tourist studies It explores the dominant figures of mobility from children to soldiers and the mobility impaired the disparate materialities of mobility such as flows of water and waste to the vectors of viruses key infrastructures such as

logistics systems to the informal services of megacity slums and the important mobility events around which our world turns from going on vacation to the commute to the catastrophic disruption of mobility systems The text is forward thinking projecting the future of mobilities as they might be lived transformed and studied and possibly brought to an end International in focus the book transcends disciplinary and national boundaries to explore mobilities as they are understood from different perspectives different fields countries and standpoints This is an invaluable resource for all those with an interest in mobility across disciplinary boundaries and areas of study International Handbook on Transport and Development R. Hickman, D. Bonilla, M. Givoni, D. Banister, 2015-08-28 In the last forty years or so the research field exploring the relationship and interaction between transport and development has developed rapidly While sophistication in analysis has increased understanding the effective integration of transport and development often remains poor in theory and in practice with sometimes devastating effects This Handbook provides a comprehensive analysis of both the current and emerging thinking in this field drawing on multidisciplinary thinking in transport planning transport urban and spatial economics and the wider social sciences With 45 chapters from leading international authors the book is organised around three main themes urban structure and travel transport and spatial impacts wider dimensions in transport and development The chapters each present commentary on key issues within these themes presenting the debate on the impacts of urban structure on travel the impacts of transport investment on development and social and cultural change on travel A multitude of competing inter disciplinary perspectives are considered leaving the reader with an invaluable comprehensive and critical understanding of the field This major Handbook will serve as a guide for undergraduates and graduate students researchers consultants and also practitioners and policy makers wishing to find a comprehensive and original reference to research on transport and development Contributors J A Annema F Avelino D Banister D Bonilla F Bruinsma C C Cantarelli X Jason Cao C L Chen G Cohen Blankshtain C Curtis G Dane J Dodson A Donald R Dowling M Echenique A El Geneidy R Ewing E Feitelson B Flyvbjerg N Garrick H Geerlings K Geurs M Givoni A R Goetz P Gordon A Grigolon D Halden P Hall I Hamiduddin S Handy P Headicar D A Hensher D Hidalgo R Hickman R Hjorthol M Hillman E Holden T Holvad H Holzapfel M Iacono O B Jensen P Jones J Kenworthy S Kenyon C A Klckner K J Krizek B Lee S Leleur D Levinson T Li Z Li K Linnerud S Marshall W Marshall E Matthies L Meija Dorantes R Meyfahrt P Mokhtarian J C Muoz P Naess P Newman S Nordbakke S Petheram S Rasouli P Rietveld O Rotem Mindali T Schwanen N Sipe D Stead P Stoker G Stokes H Timmermans B Van Wee R Wilson D Yang

Community-Owned Transport Leigh Glover, 2016-11-03 City and state governments around the world are struggling to achieve environmentally sustainable transport Economic technological city and transport planning and human behaviour solutions are often hampered by ineffective implementation So attention is now turning to institutional governmental and political barriers Approaches to these implementation problems assume that transport ownership can only be public owned by state entities or private corporate or personal Another option largely unexplored to date is communal ownership of transport Community Owned Transport proposes and develops the notion that communal ownership has a historical basis and provides unique opportunities for providing personal mobility It looks at the historical roots of modern urban transport's failings as those of technological change and the associated governing of transport systems particularly the role of public sector institutions Community ownership is explored through the new sharing economy developments car sharing ridesharing and bicycle share schemes and older social innovations in ecovillages and communal living Models and practices of community ownership of transport are provided and this study also discusses how community ownership might contribute to sustainable transport Drawing widely on different disciplines and fields of scholarship this book explores the conceptual and practical aspects of communal ownership of transport It will be a valuable resource for those seeking innovative approaches to addressing the pressing problems of transport including graduate and postgraduate students as

well as policymakers practitioners and community groups *International Maritime Transport Costs* Gordon Wilmsmeier, 2016-04-22 Based on in depth empirical research this book develops our understanding of maritime transport costs the maritime industry and the competitiveness of regions in a global market environment through a geographical lens Further the book uses a unique set of data that gives an extensive insight into Latin American international maritime transport costs and its determinants This is a clear call for policy makers and port authorities to strengthen transnational cooperation in order to improve the development of the whole system of maritime transport focusing on the causes that put regions at risk of becoming peripheral and uncompetitive Gridlock John Sutton, 2015-07-16 Cities across the world are

facing unprecedented challenges in traffic management and transit congestion while coping with growing populations and mobility aspirations existing policies that aim to tackle congestion and create more sustainable transport futures offer only weak remedies In *Gridlock* Congested Cities Contested Policies Unsustainable Mobility transport consultant John C Sutton explores how two competing discourses in transport policy and planning practice convivial and competitive ideologies lead to contradictory solutions and a gridlock in policy as well as on transport systems *Gridlock* examines current transport and mobility in a geographical social political economy and technological context The challenges of rising congestion are highlighted through case studies from the UK the USA and OECD countries Sutton offers readers a vision of a sustainable mobility future through the concept of mobility management combining mobile communication and information technology with logistics to match travel demand to the capacity of transport systems Essential reading for transport professionals and students of transportation planning and policy *Gridlock* offers a unique manifesto for sustainable mobility settlement addressing the pressing problems of growing populations and congestion while looking ahead to a more sustainable future

Communications and Mobility David Morley, 2017-04-26 *Communications and Mobility* is a unique interdisciplinary look at mobility territory communication and transport in the 21st century with extended case studies of three icons of this era the mobile phone the migrant and the container box Urges scholars in media and communication to return to broader conceptions of the field that include mobility of all kinds information people and commodities Embraces perspectives from media studies science and technology studies sociology media anthropology and cultural geography Discusses ideas of virtual and embodied mobility network geographies de territorialization sedentarism nomadology connectivity containment and exclusion Integrates the often neglected transport studies into contemporary communication studies and theories of globalization
