Collecting East and West Andrea M. Gáldy, Adriana Turpin, 2013-09-11 If collecting the rare and valuable is an entirely normal trait of human behaviour amassing objects from far away places has also long played a role in the history of collecting East and West or North and South for that matter are of course entirely relative to one's particular geographical position Therefore it is interesting that collecting exotic objects is an endeavour that unites humanity over millennia and round the globe The ancient Assyrians did so as assiduously as eighteenth century collectors in Paris or London Chinese emperors collected Western art and artefacts at a time when Western collectors started to gather ceramics lacquered furniture or South East Asian prints Key factors were of course increasingly frequent contact and an ever growing knowledge about the other and about the other's artistic production Of particular interest to the mission of this working group is the fact that the building of collections was only part of the endeavour but that in many cases the objects imported at huge cost and logistic effort were meant to be displayed in surroundings reminiscent of their original habitat even though their exact original context may have been open to debate and their final exhibition surroundings may have been unrecognisable to anyone from their former home Western collectors built Chinese cabinets for their exotic treasures often complemented by depictions of Oriental tea parties Less familiar is perhaps the fact that from the seventeenth century onwards Chinese emperors displayed their European collectibles in palaces built for them for this purpose in Western architectural style The essays in the present volume therefore attempt to connect the collections of exotic objects with the forms of display adopted by collectors and institutions and thus chart the levels of increasingly informed and intimate encounters between East and West scholars and collectors art lovers and institutions from the early first millennium BC to the early twentieth century and from South East Asia to North Western Europe

Traveling Prehistoric Seas Alice Beck Kehoe, 2016-07-01 Until recently the theory that people could have traversed large expanses of

ocean in prehistoric times was considered pseudoscience But recent discoveries in places as disparate as Australia Labrador Crete California and Chile open the possibility that ancient oceans were highways not barriers and that ancient people possessed the means and motives to traverse them In this brief thought provoking but controversial book Alice Kehoe considers the existing evidence in her reassessment of ancient sailing Her book critically analyzes the growing body of evidence on prehistoric sailing to help scholars and students evaluate a highly controversial hypothesis examines evidence from archaeology anthropology botany art mythology linguistics maritime technology architecture paleopathology and other disciplines presents her evidence in student accessible language to allow instructors to use this work for teaching critical thinking skills

Traveling to Unknown Places Lloyd S. Kramer, 2024-09-24 Traveling to Unknown Places presents a compelling incisive analysis of how French and American writers reshaped their personal and collective identities as they traveled in foreign countries after the social upheavals of the eighteenth century Atlantic revolutions Delving into the experiences of renowned figures like Flora Tristan and Margaret Fuller alongside lesser known postrevolutionary travelers this book illuminates how cross cultural encounters pushed writers to redefine their views of nationality language race slavery gender religion science and political ideologies Lloyd Kramer deftly demonstrates how unsettling journeys challenged cultural preconceptions and fostered introspective writings that transcended geographical boundaries By interweaving the perspectives of women and men whose travels led them far beyond their youthful social origins Kramer unveils a rich tapestry of evolving selfhood ambition and political consciousness across the Atlantic world Each traveler s experience was unique but long journeys connected all these nineteenth century writers with others who had traveled before and trips into unknown distant cultures also carried travelers toward previously unknown places within themselves

Vision, Race, and Modernity Deborah Poole, 2021-08-10 Through an intensive examination of photographs and engravings from European Peruvian and U S archives Deborah Poole explores the role visual images and technologies have played in shaping modern understandings of race Vision Race and Modernity traces the subtle shifts that occurred in European and South American depictions of Andean Indians from the late eighteenth to the early twentieth centuries and explains how these shifts led to the modern concept of racial difference While Andean peoples were always thought of as different by their European describers it was not until the early nineteenth century that European artists and scientists became interested in developing a unique visual and typological language for describing their physical features Poole suggests that this scientific or biological discourse of race cannot be understood outside a modern visual economy Although the book specifically documents the depictions of Andean peoples Poole s findings apply to the entire colonized world of the nineteenth century Poole presents a wide range of images from operas scientific expeditions nationalist projects and picturesque artists that both effectively elucidate her argument and contribute to an impressive history of photography Vision Race and Modernity is a fascinating attempt to study the changing terrain of racial theory as part of a broader reorganization of vision in European society and

culture
