Traveling Prehistoric Seas Alice Beck Kehoe, 2016-07 Alice Kehoe uses critical analysis of large bodies of interdisciplinary evidence to help scholars and students reevaluate the highly controversial theory that people sailed large distances across oceans in ancient times

Traveling Prehistoric Seas Alice Beck Kehoe, 2016-07-01 Until recently the theory that people could have traversed large expanses of ocean in prehistoric times was considered pseudoscience But recent discoveries in places as disparate as Australia Labrador Crete California and Chile open the possibility that ancient oceans were highways not barriers and that ancient people possessed the means and motives to traverse them In this brief thought provoking but controversial book Alice Kehoe considers the existing evidence in her reassessment of ancient sailing Her book critically analyzes the growing body of evidence on prehistoric sailing to help scholars and students evaluate a highly controversial hypothesis examines evidence from archaeology anthropology botany art mythology linguistics maritime technology architecture paleopathology and other disciplines presents her evidence in student accessible language to allow instructors to use this work for teaching critical thinking skills

Ancient Ocean Crossings Stephen C. Jett, 2017-06-06 Paints a compelling picture of impressive pre Columbian cultures and Old World civilizations that contrary to many prevailing notions were not isolated from one another In *Ancient Ocean Crossings* Reconsidering the Case for Contacts with the Pre Columbian Americas Stephen Jett encourages readers to reevaluate the common belief that there was no significant interchange between the chiefdoms and civilizations of Eurasia and Africa and peoples who occupied the alleged terra incognita beyond the great oceans More than a hundred centuries separate the time that Ice Age hunters are conventionally thought to have crossed a land bridge from Asia into North America and the arrival of Columbus in the Bahamas in 1492 Traditional belief has long held that earth's two hemispheres were essentially cut off from one another as a result of the post Pleistocene meltwater fed rising oceans that covered that bridge The oceans along with arctic climates and daunting terrestrial distances formed impermeable barriers to interhemispheric communication This viewpoint implies that the cultures of the Old World and those of the Americas developed independently Drawing on abundant and concrete evidence to support his theory for significant pre Columbian contacts Jett suggests that many ancient peoples had both the seafaring capabilities and the motives to cross the oceans and in fact did so repeatedly and with great impact His deep and broad work synthesizes information and ideas from archaeology geography linguistics climatology oceanography ethnobotany genetics medicine and the history of navigation and seafaring making an innovative and persuasive multidisciplinary case for a new understanding of human societies and their diffuse but interconnected development

The Battle over America's Origin Story Brian Regal, 2022-05-06 This book examines the legends of who really discovered America It argues that histories of America's origins were always based less on empirical evidence and more on social political and cultural wish fulfillment Influenced by a complex interplay of Nativist hatred of immigrants and Aboriginal people as well as distrust of academic scholarship these

legends ebbed and flowed with changing conditions in wider American society The book focuses on the actions of a collection of quirky obsessed amateur investigators who spent their lives trying to prove their various theories by promoting Welsh princes Vikings Chinese admirals Neo lithic Europeans African explorers and others who they say arrived centuries before Columbus These myths acted as mitigating agencies for those who embraced them Along with recent scholarship this book makes extensive use of archival materials some of which have never been employed before It covers the period from the sixteenth century to the present It brings together separate historiographic ideas to create a unified history rather than focusing on one particular legend as most books on the subject do It shows how questions of who discovered America helped create the field of historical scholarship in this country This book does not attempt to prove who discovered America rather it tells the story of those who think they did *Truth and Power in American Archaeology* Alice Beck Kehoe, **The**

Prehistory of Rapa Nui (Easter Island) Valenti Rull, Christopher Stevenson, 2022-07-11 This book addresses the main enigmas of Easter Island s Rapa Nui in the Polynesian language prehistory from the time of initial settlement to European contact with a multidisciplinary perspective The main topics include i the time of first settlement and the origin of the first settlers ii the main features of prehistoric Rapanui culture and their changes iii the deforestation of the island and its timing and causes iv the extinction of the indigenous biota v the occurrence of climatic shifts and their potential effects on socioecological trends vi the evidence for a cultural and demographic collapse before European contact and vii the influence of Europeans on prehistoric Rapanui society The book is subdivided into thematic sections and each chapter is written by renowned specialists in disciplines such as archaeology anthropology paleoecology ethnography linguistics ethnobotany phylogenetics phylogeography and history Contributors have been invited to provide an open and objective vision that includes as many views as possible on the topics considered In this way the readers may be able to compare different of points of view and make their own interpretations on each of the subjects considered The book is intended for a wide audience including graduate students advanced undergraduate students university teachers and researchers interested in the subject Given its multidisciplinary character and the topics included the book is suitable for students and researchers from a wide range of disciplines and interests **North America before the European Invasions** Alice Beck

Kehoe, 2016-12-01 North America Before the European Invasions tells the histories of North American peoples from first migrations in the Late Glacial Age sixteen thousand years ago or more to the European invasions following Columbus s arrival Contrary to invaders propaganda North America was no wilderness and its peoples had developed a variety of sophisticated resource uses including intensive agriculture and cities in Mexico and the Midwest Written in an easy flowing style the book is a true history although based primarily on archeological material It reflects current emphasis within archaeology on rejecting the notion of pre history instead combining archaeology with post Columbian ethnographies and histories to present the long histories of North America s native peoples most of them still here and still part of the continent

s history *At Every Depth* Tessa Hill, Eric Simons, 2024-02-13 Winner 2024 Choice Outstanding Academic Title The world's oceans are changing at a drastic pace Beneath the waves and along the coasts climate change and environmental degradation have spurred the most radical transformations in human history In response the people who know the ocean most intimately are taking action for the sake of our shared future Community scientists track species in California tidepools Researchers dive into the waters around Sydney to replant kelp forests Scientists and First Nations communities collaborate to restore clam gardens in the Pacific Northwest In *At Every Depth* the oceanographer Tessa Hill and the science journalist Eric Simons profile these and other efforts to understand and protect marine environments taking readers to habitats from shallow tidepools to the deep sea They delve into the many human connections to the ocean how people live with and make their living from the waters journeying to places as far flung as coral reefs the Great Pacific Garbage Patch and the Arctic and Antarctic poles *At Every Depth* shares the stories of people from all walks of life including scientists coastal community members Indigenous people shellfish farmers and fisheries workers It brings together varied viewpoints showing how scientists research and local and Indigenous knowledge can complement each other to inform a more sustainable future Poignantly written and grounded in science this book offers a narrative perspective on the changing oceans letting us see how our relationships to the oceans are changing too *Cedar Forests, Cedar Ships* Sara A. Rich, 2017-04-19 It is commonly recognized that the Cedars of Lebanon were prized in the ancient world but how can the complex archaeological role of the *Cedrus* genus be articulated in terms that go beyond its interactions with humans alone *The Archaeology of Island Colonization* Matthew F. Napolitano, Jessica H. Stone, Robert J. DiNapoli, 2021-05-25 This volume details how new theories and methods have recently advanced the archaeological study of initial human colonization of islands around the world including in the southwest Pacific the Mediterranean the Caribbean and Southeast Asia This global perspective brings into comparison the wide variety of approaches used to study these early migrations and illuminates current debates in island archaeology Evidence of island colonization is often difficult to find especially in areas impacted by sea level rise and these essays demonstrate how researchers have tackled this and other issues Contributors show the potential of computer simulations of voyaging in determining the range of timing and origin points that were possible in the past They discuss how Bayesian modeling helps address uncertainties and controversies surrounding radiocarbon dating Additionally advances in biomolecular techniques such as ancient DNA aDNA paleoproteomics analysis of human microbiota and improved resolution in isotopic analyses are providing more refined information on the homelands of initial settlers on individual life courses and on population level migrations Islands offer rich opportunities to examine the exploratory nature of the human species providing insights into the evolution of watercraft technologies and wayfinding the impact of humans on their new environments and the motivations for their journeys *The Archaeology of Island Colonization* represents the innovative ways today's archaeologists are reconstructing these unique paleolandscapes Contributors Nasullah Aziz David Ball Todd J Braje
