optimization and classification Global Initiatives to Secure Cyberspace Michael Portnoy, Seymour Goodman, 2008-11-09 As cyberspace continues to rapidly expand its infrastructure is now an integral part of the world's economy and social structure. Given this increasing interconnectivity and interdependence, what progress has been made in developing an ecosystem of safety and security? This study is the second phase of an initial attempt to survey and catalog the multitude of emerging organizations promoting global initiatives to secure cyberspace. The authors provide a breakdown and analysis of organizations by type, including international, regional, private, public, and non-governmental organizations. Concluding with a discussion of the progress made in recent years, the study explores current trends regarding the effectiveness and scope of coverage provided by these organizations and addresses several questions concerning the overall state of international cyber security. The authors would like to thank Mr. Anthony Rutkowski for generously providing his time, guidance, and support. The authors would also like to thank the International Telecommunication Union (ITU) Telecommunication Development Sector (ITU-D) and the United States National Science Foundation (NSF) Grant R3772 for partially supporting the research conducted in this study. In addition, the authors would like to thank the Georgia Institute of Technology's Center for International Strategy, Technology, and Policy (CISTP) for assistance in hosting the Cyber Security Organization Catalog and the Georgia Tech Information Security Center (GTISC) for cooperation and promotion of this study.
