The Posthuman Body in Superhero Comics Scott Jeffery, 2016-10-11 This book examines the concepts of Post Humanism and Transhumanism as depicted in superhero comics Recent decades have seen mainstream audiences embrace the comic book Superhuman Meanwhile there has been increasing concern surrounding human enhancement technologies with the techno scientific movement of Transhumanism arguing that it is time humans took active control of their evolution Utilising Deleuze and Guattari's notion of the rhizome as a non hierarchical system of knowledge to conceptualize the superhero narrative in terms of its political social and aesthetic relations to the history of human technological enhancement this book draws upon a diverse range of texts to explore the way in which the posthuman has been represented in superhero comics while simultaneously highlighting its shared historical development with Post Humanist critical theory and the material techno scientific practices of Transhumanism

Human Purpose and Transhuman Potential Ted Chu, 2014-03-01 For millennia great thinkers have contemplated the meaning and purpose of human existence but while most assumed that humanity was the end point of creation or the pinnacle of evolution Ted Chu makes the provocative claim that the human race may in fact be a means rather than an end that humankind will give rise to evolutionary successors In this wide ranging and authoritative work Chu reexamines the question of human purpose in light of the extraordinary developments of science and technology Arguing that a deep understanding of our place in the universe is required to navigate the magnitude of the choices that lie ahead he surveys human wisdom from both East and West traces the evolutionary trajectory that has led to this point and explores the potentials emerging on the scientific frontier The book addresses the legitimate fears and concerns of playing God but embraces the possibility of transcending biological forms and becoming or creating entirely new life forms

Wells Meets Deleuze Michael Starr, 2017-05-21 The writings of H G Wells have had a profound influence on literary and cinematic depictions of the present and the possible future and modern science fiction continues to be indebted to his scientific romances such as The Time Machine The War of the Worlds and The Island of Doctor Moreau Interpreted and adapted for more than a century Wells's texts have resisted easy categorization and are perennial subjects for emerging critical and theoretical perspectives The author examines Wells's works through the post structuralist philosophy of Gilles Deleuze Via this critical perspective concepts now synonymous with science fiction such as time travel alien invasion and transhumanism demonstrate the intrinsic relevance of Wells to the genre and contemporary thought

Philosophies of the Future and the Non-Human Ivana Greguric, Nenad Vertovšek, 2023-06-30 This book examines philosophical aspects of the future of man and humanity focusing on questioning what is and what constitutes

being human in the face of scientific and technological developments and possible coexistence with machines and artificial intelligence In this sense the contribution of these authors is the establishment of a new discipline that analyses our technological future which may be populated by enhanced cyborgs avatars and autonomous robots This scientific technological future brings about practically inconceivable social and philosophical consequences Thus this book answers the questions What are the ethical and ontological issues and assumptions we make about humans and how will these change with time Moreover how should we think of human existence in this new and emerging world

The New Human in Literature Mads Rosendahl Thomsen, 2013-09-26 Twentieth century literature changed understandings of what it meant to be human Mads Rosendahl Thomsen in this historical overview presents a record of literature's changing ideas of mankind questioning the degree to which literature records and creates visions of the new human Grounded in the theory of Niklas Luhmann and drawing on canonical works Thomsen uses literary changes in the mind body and society to define the new human He begins with the modernist minds of Virginia Woolf Williams Carlos Williams and Louis Ferdinand Celine's discusses the society changing concepts envisioned by Chinua Achebe Mo Yan and Orhan Pamuk He concludes with science fiction discussing Don DeLillo and Michel Houellebecq's ideas of revolutionizing man through biotechnology This is a study about imagination aesthetics and ethics that demonstrates literature's capacity to not only imagine the future but portray the conflicting desires between individual and various collectives better than any other media A study that heightens reflections on human evolution and posthumanism

Posthuman Personhood Daryl J. Wennemann, 2013-05-02 Posthuman Personhood takes up the ethical challenge posed by Francis Fukuyama's work Our Posthuman Future Daryl J Wennemann argues that the traditional concept of personhood may be fruitfully applied to the ethical challenge we face in a posthuman age He draws upon Wilfrid Sellars treatment of the concept of a person within the manifest image of man in the world Sellars proposed that we develop a stereoscopic view of reality that includes both a scientific understanding of the world and a meaningful place for persons living and acting in the world Following Mary Anne Warren Wennemann develops a distinction between two meanings of the term human a biological meaning and a moral meaning and maintains that all biologically human beings are persons But it is not necessarily the case that all persons must be biologically human After drawing on a contemporary version of Kant's distinction between a theoretical possibility and a real possibility the book posits that biologically non

human persons like robots computers or aliens are a theoretical possibility but that we do not know if they are a real possibility Finally Wennemann describes an ethic of self limitation for the posthuman age

Posthumanism in the Age of Humanism Edgar Landgraf, Gabriel Trop, Leif Weatherby, 2018-10-04 The literary and scientific renaissance that struck Germany around 1800 is usually taken to be the cradle of contemporary humanism Posthumanism in the Age of Humanism shows how figures like Immanuel Kant and Johann Wolfgang Goethe as well as scientists specializing in the emerging modern life and cognitive sciences not only established but also transgressed the boundaries of the human This period so broadly painted as humanist by proponents and detractors alike also grappled with ways of challenging some of humanism's most cherished assumptions the dualisms for example between freedom and nature science and art matter and spirit mind and body and thereby also between the human and the nonhuman Posthumanism is older than we think and the so called humanists of the late Enlightenment have much to offer our contemporary re thinking of the human

Perfecting Human Futures J. Benjamin Hurlbut, Hava Tirosh-Samuelson, 2016-02-22 Humans have always imagined better futures From the desire to overcome death to the aspiration to dominion over the world imaginations of the technological future reveal the commitments values and norms of those who construct them Today the human future is thrown into question by emerging technologies that promise radical control over human life and elicit corollary imaginations of human perfectibility This interdisciplinary volume assembles scholars of science and technology studies sociology philosophy theology ethics and history to examine imaginations of technological progress that promises to transcend the constraints of human body and being Attending in particular to transhumanist and posthumanist visions the volume breaks new ground by exploring their utopian and eschatological dimensions and situating them within a broader context of ideas institutions and practices of innovation The volume invites specialists and general readers to explore the stakes of contemporary imaginations of technological innovation as a source of progress a force of social and historical transformation and as the defining essence of human life
