Supporting Children's Well-Being During Early Childhood

Transition to School Tatalović Vorkapić, Sanja, LoCasale-Crouch, Jennifer, 2020-10-23 Life transitions differ concerning the intensity of the change and the intensity of the child's reaction to that change. For most children the first and most significant transition is from the family home to an institution of early care and education which includes preschool. These transitions can also include children's passage from kindergarten to elementary school. However the intensity of the child's reaction is related to the size of the change that is happening and also to who or what is involved in that change and the importance a child attributes to that someone or something. *Supporting Children's Well-Being During Early Childhood Transition to School* is an essential scholarly publication that examines evidence-based practices and approaches that fully support a child's well-being during transition periods in early childhood. It serves as a resource to rethink contemporary transition theoretical models, research studies and applied practices. Featuring a wide range of topics such as emotional competency, language learners and professional development, this book is ideal for academicians, psychologists, early childhood educators, daycare centers, curriculum designers, policymakers, researchers, education professionals and students. *Advancing Knowledge and Building Capacity for Early Childhood Research* Sharon Ryan, M. Elizabeth Graue, Vivian L. Gadsden, Felice J.

Levine, 2021-01-20 This volume employs a multidisciplinary approach to research on a high profile topic very much on the agenda of state and national policy leaders: early childhood development and education. It aims to reflect how scholarly perspectives shape the contours of knowledge generation and to illuminate the gaps that prevent productive interchange among scholars who value equity in the opportunities available to young children, their families and teachers/caregivers. The editors and authors identify and prioritize critical research areas, assess the state of the field in terms of promising research designs and methodologies and identify capacity building needs and potential cross-group collaborations. *Quality Early Learning* Magdalena Bendini, Amanda Devercelli, 2022-05-11 In this volume leading researchers and implementation experts from an array of disciplines provide evidence-based, cost-effective and actionable strategies for delivering quality early childhood education (ECE) at scale in low and middle income countries (LMICS). Over the past decade, neuroscientists, developmental and cognitive psychologists, economists and education researchers have amassed evidence to inform ECE program design. Yet much of this evidence has not been readily accessible to policymakers and practitioners and potential synergies from cross-disciplinary considerations have not been realized. *Quality Early Learning: Nurturing Children's Potential* synthesizes the evidence across disciplines and charts a forward course for quality ECE. The volume includes: Overview: From Evidence to Effective Policies; How to Invest in Early Childhood Education to Nurture Children's Potential by Magdalena Bendini; Amanda E. Devercelli; Elaine Ding; Melissa Kelly and Adelle Pushparatnam; Chapter 1: Learning in the Early Years by Elizabeth Spelke and Kristin Shutts; Chapter 2: Pedagogy and Curricula: Content Building Foundational Skills and Knowledge by David Whitebread and Yasmin Sitabkhan; Chapter 3: Building an Effective Early Childhood Education Workforce by Nirmala

Rao Emma Pearson Benjamin Piper and Carrie LauChapter 4 Creating Early Childhood Education Environments That Promote Early Learning by Cynthia Adlerstein and Alejandra Cort zarChapter 5 The Role of Management Leadership and Monitoring in Producing Quality Learning Outcomes in Early Childhood Education by Iram Siraj Violeta Arancibia and Juan Bar nChapter 6 Toward Quality Early Learning Systems for Success by Sharon Lynn Kagan and Caitlin M DermodyIn the volume the authors provide the latest evidence on how young children learn most effectively and how ECE programs can foster children s natural ability and motivation to learn It offers guidance for policy makers on policy design and implementation including what elements of ECE to prioritize in resource and capacity constrained settings in LMICs
