Translation And The Making Of Modern Russian Literature Literatures Cultures Translation:

Translation and the Making of Modern Russian Literature Brian James Baer, 2015-11-19 Explores the complex role played by translation in the development of modern Russian literature and Russian national identity *Translation and the Making of Modern Russian Literature* Brian James Baer, 2015-11-19 Brian James Baer explores the central role played by translation in the construction of modern Russian literature Peter I s policy of forced Westernization resulted in translation becoming a widely discussed and highly visible practice in Russia a multi lingual empire with a polyglot elite Yet Russia s accumulation of cultural capital through translation occurred at a time when the Romantic obsession with originality was marginalizing translation as mere imitation The awareness on the part of Russian writers that their literature and by extension their cultural identity were born in translation produced a sustained and sophisticated critique of Romantic authorship and national identity that has long been obscured by the nationalist focus of traditional literary studies By offering a re reading of seminal works of the Russian literary canon that thematize translation alongside studies of the circulation and reception of specific translated texts *Translation and the Making of Modern Russian Literature* models the long overdue integration of translation into literary and cultural studies

Sexology and Translation Heike Bauer, 2015-10 Examines the shape and shaping of sexual ideas and related scientific practices and cultural representations in parts of Europe Asia the Middle East and South America between the late 19th century and the years leading up to World War II offering insights on the intersections between sexuality and modernity in a range of disciplinary cultural and trans national contexts **The Routledge Handbook of Translation and Globalization** Esperança Bielsa, Dionysios Kapsaskis, 2020-12-30 This is the first handbook to provide a comprehensive coverage of the main approaches that theorize translation and globalization offering a wide ranging selection of chapters dealing with substantive areas of research The handbook investigates the many ways in which translation both enables globalization and is inevitably transformed by it Taking a genuinely interdisciplinary approach the authors are leading researchers drawn from the social sciences as well as from translation studies The chapters cover major areas of current interdisciplinary interest including climate change migration borders democracy and human rights as well as key topics in the discipline of translation studies This handbook also highlights the increasing significance of translation in the most pressing social economic and political issues of our time while accounting for the new technologies and practices that are currently deployed to cope with growing translation demands With five sections covering key concepts people culture economics and politics and a substantial introduction and conclusion this handbook is an indispensable resource for students and researchers of translation and globalization within translation and interpreting studies comparative literature sociology global studies cultural studies and related areas **Transgender, Translation,**

Translingual Address Douglas Robinson, 2019-01-24 Finalist for the 2020 Prose Awards Language and Linguistics Category The emergence of transgender communities into the public eye over the past few decades has brought some new

understanding but also renewed outbreaks of violent backlash In *Transgender Translation Translingual Address* Douglas Robinson seeks to understand the translational or translingual dialogues between cisgendered and transgendered people Drawing on a wide range of LGBT scholars philosophers sociologists sexologists and literary voices Robinson sets up cis trans dialogues on such issues as being born in the wrong body binary vs anti binary sex gender identities and the nature of transition and transformation Prominent voices in the book include Kate Bornstein C Jacob Hale and Sassafras Lowrey The theory of translation mobilized in the book is not the traditional equivalence based one but Callon and Latour s sociology of translation as speaking for someone else which grounds the study of translation in social pressures to conform to group norms In addition however Robinson translates a series of passages from Finnish trans novels into English and explores the translingual address that emerges when those English translations are put into dialogue with cis and trans scholars

Translation in Russian Contexts Brian James Baer, Susanna Witt, 2017-07-28 This volume represents the first large scale effort to address topics of translation in Russian contexts across the disciplinary boundaries of Slavic Studies and Translation Studies thus opening up new perspectives for both fields Leading scholars from Eastern and Western Europe offer a comprehensive overview of Russian translation history examining a variety of domains including literature philosophy and religion Divided into three parts this book highlights Russian contributions to translation theory and demonstrates how theoretical perspectives developed within the field help conceptualize relevant problems in cultural context in pre Soviet Soviet and post Soviet Russia This transdisciplinary volume is a valuable addition to an under researched area of translation studies and will appeal to a broad audience of scholars and students across the fields of Translation Studies Slavic Studies and Russian and Soviet history Chapter 1 of this book is freely available as a downloadable Open Access PDF under a Creative Commons Attribution Non Commercial No Derivatives 4.0 license available at <http://www.taylorfrancis.com/books/e/9781315305356>

Authorizing Translation Michelle Woods, 2016-10-04 groundbreaking research on literary translation by a new generation of Literature and Translation studies scholars Investigates and moves forward currents of thinking in the discipline

A World Atlas of Translation Yves Gambier, Ubaldo Stecconi, 2019-02-15 What do people think of translation in the different historical cultural and linguistic traditions of the world How many uses has translation been put to How distant from one another are the concepts of translation found in the different traditions These are some of the questions *A World Atlas of Translation* addresses Its twenty one reports give us pictures taken from the inside both from traditions that are well represented in the literature and from the many that for now are not But the Atlas is not content with documenting no map is this innocent In fact the wealth of information collected and made accessible by its reporters can be useful to gauge the dispersion of translation concepts across traditions As you read its reports the Atlas will keep asking How far apart do these concepts look to you Finally and more ambitiously the reports can help us test the hypothesis that a cross cultural notion of translation exists In this respect the Atlas is mostly a proof of concept It hopes to encourage further fact

based research in quest of a robust and compelling unifying notion of translation **Teaching Literature in Translation**

Brian James Baer, Michelle Woods, 2022-07-29 The teaching of texts in translation has become an increasingly common practice but so too has the teaching of texts from languages and cultures with which the instructor may have little or no familiarity The authors in this volume present a variety of pedagogical approaches to promote translation literacy and to address the distinct phenomenology of translated texts The approaches set forward in this volume address the nature of the translator's task and how texts travel across linguistic and cultural boundaries in translation including how they are packaged for new audiences with the aim of fostering critical reading practices that focus on translations as translations The organizing principle of the book is the specific pedagogical contexts in which translated texts are being used such as courses on a single work survey courses on a single national literature or a single author and courses on world literature Examples are provided from the widest possible variety of world languages and literary traditions as well as modes of writing prose poetry drama film and religious and historical texts with the aim that many of the pedagogical approaches and strategies can be easily adapted for use with other works and traditions An introductory section by the editors Brian James Baer and Michelle Woods sets the theoretical stage for the volume Written and edited by authorities in the field of literature and translation this book is an essential manual for all instructors and lecturers in world and comparative literature and literary translation The Fictions of Translation Judith Woodsworth, 2018-02-15 In The Fictions of Translation emerging and seasoned scholars from a range of cultures bring fresh perspectives to bear on the age old practice of translation The current movement of people knowledge and goods around the world has made intercultural communication both prevalent and indispensable Consequently the translator has become a more prominent figure and translation an increasingly present theme in works of literature Embedding translation in a fictional setting and considering its most extreme forms pseudotranslation or self translation for example are fruitful ways of conceptualizing the act of translating and extending the boundaries of translation studies Taken together the various translational fictions examined in this collection yield new insights into questions of displacement migration and hybridity all characteristic of the modern world The Fictions of Translation will thus be of interest to practising translators students and scholars of translation and literary studies as well as a more general readership
