Traumatic Brain Injury From Concussion To Coma Nonfiction Young Adult:

Traumatic Brain Injury Connie Goldsmith, 2014-01-01 Two soccer players collide on the field A soldier in Afghanistan is thrown to the ground during a bomb explosion A teen has an accident while riding her bike and she isn't wearing her helmet Each of these incidents can produce a traumatic brain injury TBI Of the 17 million Americans officially diagnosed with TBI each year 52 000 die from their injuries And that doesn't count all the unreported TBIs which experts estimate range from about two to four million more incidents TBIs range from concussions to penetrating head injuries to life threatening brain swelling and coma And they have countless causes war sports car and motorcycle accidents falls and physical violence The aftereffects can be devastating including compromised memory and concentration loss of hearing physical disabilities depression brain disorders and in the worst case scenario death Find out about the different types of TBIs what causes them and how they are diagnosed and treated Along the way you'll learn about National Hockey League player Derek Boogaard and U S Representative Gabby Giffords both of whom sustained TBIs with dramatically different outcomes You'll also meet teens and young adults living with TBIs and the doctors who treat them And you'll learn about amazing medical technologies that help victims recover and promise hope for the future Fourth Down and Inches Carla Killough

McClafferty, 2013-09-01 When the 1905 football season ended nineteen players were dead and countless others were critically injured The public was outraged The game had reached a make or break moment fourth down and inches Coaches players fans and even the president of the United States had one last chance change football or leave the field Football's defenders managed to move the chains Rule changes and reforms after 1905 saved the game and cleared the way for it to become America's most popular sport But they didn't fix everything Today football faces a new injury crisis as dire as 1905's With increased awareness about brain injury reported concussions are on the rise among football players But experts fear concussions may only be the tip of the iceberg The injuries are almost invisible but the stakes couldn't be higher the brains of millions of young football players across the country Award winning author Carla Killough McClafferty takes readers on a bone crunching journey from football's origins to the latest research on concussion and traumatic brain injuries in the sport Fourth Down and Inches features exclusive photography and interviews with scientists players and the families of athletes who have literally given everything to the game It's fourth and inches Can football save itself again **Understanding**
