**Traumatic Brain Injury** Jennie Ponsford, Sue Sloan, Pamela Snow, 2012-10-12 Research into the rehabilitation of individuals following Traumatic Brain Injury TBI in the past 15 years has resulted in greater understanding of the condition. The second edition of this book provides an updated guide for health professionals working with individuals recovering from TBI. Its uniquely clinical focus provides both comprehensive background information and practical strategies for dealing with common problems with thinking, memory, communication, behaviour, and emotional adjustment in both adults and children. The book addresses a wide range of challenges from those which begin with impairment of consciousness to those occurring for many years after injury and presents strategies for maximising participation in all aspects of community life. **Christian and Faith-based Counseling for Brain Injury** Deana Adams, 2022-11-24 Christian and Faith based Counseling for Brain Injury is the first book of its kind to offer faith based therapy to address the emotional, cognitive, and mental health needs of individuals who have suffered a traumatic brain injury TBI. A highly researched piece of work, the book puts forth an innovative and effective method for not only addressing the challenges of a life changing injury but also for creating a sense of purpose. Through the nuances of faith based counselling, this book focuses on the spiritual and existential aspects of understanding the diagnosis and creating a purpose post injury. It examines how brain injury can affect an individual by exploring the deficits of brain injury, the impact of brain injury, and the challenges specific to damage to certain brain lobes. It also describes the mental health issues such as depression, anxiety, grief, anger, and posttraumatic stress that can affect both the survivor and their family members. Offering targeted counseling techniques and adaptive strategies, it shows how faith based counselors can effectively treat brain injury. This book is valuable reading for all individuals invested in providing support to the TBI community. It is aimed at counselors, lay counselors, healthcare professionals, social workers, psychotherapists, seminary students, and upper level graduate students. It will further be of use to clinicians working in the outpatient level of care and private practice settings. *Identity Transformation and Posttraumatic Growth Following Traumatic Brain Injury and Posttraumatic Stress Disorder* Dee Phyllis Genetti, 2023-03-24 Identity Transformation and Posttraumatic Growth Following Traumatic Brain Injury and Posttraumatic Stress Disorder provides an autoethnographic qualitative study that portrays the author's recovery from a devastating life changing event, a car crash resulting in the hybrid diagnosis of traumatic brain injury TBI and posttraumatic stress disorder PTSD, leading to posttraumatic growth PTG and identity transformation over a ten year recovery period. In so doing, the text offers a comprehensive literature review on TBI, PTSD, PTG, and disability culture. Throughout, the author explores whether growth, PTG, and distress, PTSD, and whether TBI and PTSD can co exist. Having lost her ability to read and write, the author had to learn how to learn, to heal, and to have faith again. As a licensed trauma therapist and researcher, she collected self

observational data by writing her actual behaviors thoughts and emotions in real time both in a field and a process journal even before she could write in full sentences The many symptoms and co morbidities of TBI and PTSD and the tenets of PTG are portrayed as they evolved in recovery showing the behaviors and characteristics of each The text refers to actual journal entries medical records and clinical notes from rehabilitation specialists alternating between her clinical analysis and interpretation The findings show that tragedy and suffering can lead to growth and positive change PTG after TBI even though the precipitating trauma and psychological distress PTSD may persist for years Changes are seen in self perception interpersonal relationships and philosophies of life This chronicled account of the author s emergent recovery from patient to doctor is intended to benefit neuro rehabilitation service providers neuropsychologists primary care physicians speech language pathologists and also mental health clinicians who can see the evolution of PTG for what is now the new next step for many in PTSD recovery
