The Tender Cut Inside The Hidden World Of Self Injury:

The Tender Cut Patricia A. Adler, Peter Adler, 2011 Cutting burning branding and bone breaking are all types of self injury or the deliberate non suicidal destruction of one's own body tissue a practice that emerged from obscurity in the 1990s and spread dramatically as a typical behavior among adolescents Long considered a suicidal gesture The Tender Cut argues instead that self injury is often a coping mechanism a form of teenage angst an expression of group membership and a type of rebellion converting unbearable emotional pain into manageable physical pain Based on the largest qualitative non clinical population of self injurers ever gathered noted ethnographers Patricia and Peter Adler draw on 150 interviews with self injurers from all over the world along with 30 000 40 000 internet posts in chat rooms and communications Their 10 year longitudinal research follows the practice of self injury from its early days when people engaged in it alone and did not know others to the present where a subculture has formed via cyberspace that shares similar norms values lore vocabulary and interests An important portrait of a troubling behavior The Tender Cut illuminates the meaning of self injury in the 21st century its effects on current and former users and its future as a practice for self discovery or a cry for help **Teen**

Sarah Chaney, 2017-03-15 It's a troubling phenomenon that many of us think of as a modern psychological epidemic a symptom of extreme emotional turmoil in young people especially young women cutting and self harm But few of us know

that it was 150 years ago with the introduction of institutional asylum psychiatry that self mutilation was first described as a category of behavior which psychiatrists and later psychologists and social workers attempted to understand With care and focus *Psyche on the Skin* tells the secret but necessary history of self harm from the 1860s to the present showing just how deeply entrenched this practice is in human culture Sarah Chaney looks at many different kinds of self injurious acts including sexual self mutilation and hysterical malingering in the late Victorian period self marking religious sects and self mutilation and self destruction in art music and popular culture As she shows while self harm is a widespread phenomenon found in many different contexts it doesn't necessarily have any kind of universal meaning it always has to be understood within the historical and cultural context that surrounds it Bravely sharing her own personal experiences with self harm and placing them within its wider history Chaney offers a sensitive but engaging account supported with powerful images that challenges the misconceptions and controversies that surround this often misunderstood phenomenon The result is crucial reading for therapists and other professionals in the field as well as those affected by this emotive challenging act
