Understanding Environmental Health: How We Live in the World Maxwell, 2008-08-25. This text takes a unique approach to presenting environmental health to students. Rather than being organized around the traditional regulatory fields (air pollution, hazardous wastes, etc.) this book is structured around the things we do as individuals and societies that result in environmental health hazards. The author details the hazards of energy production, industry, food production, and the modern lifestyle while exploring our place within the global community. The book is an excellent introduction to environmental health for students of public health and health science. For Instructors: Instructor's Manual, PowerPoint Presentations, TestBank, additional Teaching Tools, Companion Website (coming soon). For Students: Flashcards, Glossary, Weblinks, Companion Website (coming soon).

Understanding Environmental Health Nancy Irwin Maxwell, 2014. Rather than organizing topics around the traditional regulatory fields (air and water pollution, hazardous wastes, radiation, etc.) this book is structured around the choices we make as individuals and societies that result in environmental health hazards. The author details the hazards of energy production, industry, food production, and the modern lifestyle while exploring our place within the local and global community.

A Primer on Environmental Sciences Matthew N. O. Sadiku, Uwakwe C. Chukwu, Olaniyi D. Olaleye, 2022-02-09. In a modern society it is easy to forget that our society depends largely on the environmental processes

that govern our world Environment refers to an aggregate of surroundings in which living beings such as humans animals and plants live and non living things exist It includes air water land living organisms and materials surrounding us The environment is an important part of our daily lives Environmental issues are now part of every career path and employment area Environmental science is an interdisciplinary field that applies principles from all the known technologies and sciences to study the environment and provide solutions to environmental problems It is the study of how the earth works and how we can deal with the environmental issues we face There is an ever demanding need for experts in this field because the environment is responsible for making our world beautiful and habitable For this reason environmental science is now being taught at high schools and higher institutions of learning Education on environmental science will empower the youths to take an active role in the world in which they live
