Understanding and Teaching Reading Emerald V. Dechant, 1991 In the words of Aldous Huxley Every man who knows how to read has it in his power to magnify himself to multiply the ways in which he exists to make his life full significant and interesting Few people question the value of reading in fact most extol its virtues As our culture becomes more complex reading plays an

increasingly greater role in satisfying personal needs and in promoting social awareness and growth In the last 20 years the teaching of this invaluable skill has focused so intensely on comprehension and prediction from context that it has lost sight of the significance of automaticity and fluency in the word identification process Reading is a synthesis of word recognition and comprehension thus this text is about these basic processes and their integration A common plea from teachers today is that research and psychology be translated into teaching behavior Therefore the aim of this book is twofold one to identify report organize and discuss those bits of data research and theory that are most relevant to the teacher s understanding of the reading process and two to help educators to interpret and apply theory and research data to everyday classroom teaching as well as to the problems encountered frequently in developmental and remedial teaching *Reading Research Anthology* ,2001 Understanding Reading Frank Smith,2004-05-20 Understanding Reading revolutionized reading research and theory when the first edition appeared in 1971 and continues to be a leader in the field In the sixth edition of this classic text Smith s purpose remains the same to shed light on fundamental aspects of the complex human act of reading linguistic physiological psychological and social and on what is involved in learning to read The text critically examines current theories instructional practices and controversies covering a wide range of disciplines but always remaining accessible to students and classroom teachers Careful attention is given to the ideological clash that continues between whole language and direct instruction and currently permeates every aspect of theory and research into reading and reading instruction To aid readers in making up their own minds each chapter concludes with a brief statement of Issues Understanding Reading A Psycholinguistic Analysis of Reading and Learning to Read Sixth Edition is designed to serve as a handbook for language arts teachers a college text for basic courses on the psychology of reading a guide to relevant research on reading and an introduction to reading as an aspect of thinking and learning It is matchless in integrating a wide range of topics relative to reading while at the same time being highly readable and user friendly for instructors students and practitioners The Psychology of Science Text Comprehension José Otero,José A. León,Arthur C. Graesser,2014-04-04 This volume s goal is to provide readers with up to date information on the research and theory of scientific text comprehension It is widely acknowledged that the comprehension of science and technological artifacts is very difficult for both children and adults The material is conceptually complex there is very little background knowledge for most individuals and the materials are often poorly written Therefore it is no surprise that students are turned off from learning science and technology Given these challenges it is important to design scientific text in a fashion that fits the cognitive constraints of the learner The enterprise of textbook design needs to be effectively integrated with research in discourse processing educational technology and cognitive science This book takes a major step in promoting such an integration This volume provides an important integration of research and theory with theoretical methodological and educational applications includes a number of chapters that cover how science text information affects mental representations and strategies introduces important

suggestions about how text design and new technologies can be thought of as pedagogical features and establishes academic text taxonomies and a consensus of the criteria to organize inferences and other mental mechanisms **Motivating**
