The Banks Did It Neil Fligstein, 2021-06-08 A comprehensive account of the rise and fall of the mortgage securitization industry which explains the complex roots of the 2008 financial crisis More than a decade after the 2008 financial crisis plunged the world economy into recession we still lack an adequate explanation for why it happened Existing accounts

identify a number of culprits financial instruments traders regulators capital flows yet fail to grasp how the various puzzle pieces came together The key Neil Fligstein argues is the convergence of major US banks on an identical business model extracting money from the securitization of mortgages But how and why did this convergence come about The Banks Did It carefully takes the reader through the development of a banking industry dependent on mortgage securitization Fligstein documents how banks with help from the government created the market for mortgage securities The largest banks Countrywide Financial Bear Stearns Citibank and Washington Mutual soon came to participate in every aspect of this market Each firm originated mortgages issued mortgage backed securities sold those securities and in many cases acted as their own best customers by purchasing the same securities Entirely reliant on the throughput of mortgages these firms were unable to alter course even when it became clear that the market had turned on them in the mid 2000s With the structural features of the banking industry in view the rest of the story falls into place Fligstein explains how the crisis was produced where it spread why regulators missed the warning signs and how banks dependence on mortgage securitization resulted in predatory lending and securities fraud An illuminating account of the transformation of the American financial system The Banks Did It offers important lessons for anyone with a stake in avoiding the next crisis **Handbook of Financial Stress**

Testing J. Doyne Farmer, Alissa M. Kleinnijenhuis, Til Schuermann, Thom Wetzer, 2022-04-14 Discover current uses and future development of stress tests the most innovative regulatory tool to prevent and fight financial crises **Handbook of Financial Data and Risk Information I** Margarita S. Brose, Mark D. Flood, Dilip Krishna, Bill Nichols, 2014 Volume I examines the business and regulatory context that makes risk information so important A vast set of quantitative techniques internal risk measurement and governance processes and supervisory reporting rules have grown up over time all with important implications for modeling and managing risk information Without an understanding of the broader forces at work it is all too easy to get lost in the details Back cover *Innovative Experiences in Access to Finance* Augusto de la Torre, Juan Carlos Gozzi, Sergio L. Schmukler, 2017-06-23 Interest in access to finance and awareness of its importance have increased significantly since the early 2000s Growing evidence suggests that lack of access to credit prevents many households and firms from financing high return investment projects which has an adverse effect on growth and poverty alleviation Despite the increasing awareness of the importance of access to finance among both researchers and policymakers there are still some major gaps in our understanding of the main drivers of access as well as about the impact of different policies in this area This book aims to fill some of these gaps by discussing recent innovative experiences in broadening access to credit in Latin America These experiences are consistent with an emerging new view that while recognizing the central role of the public sector in improving the contractual and informational environment for financial markets also contends that there might be room for well designed restricted interventions in collaboration with the private sector to foster the development of financial markets and broaden access to them In particular the book analyzes among

other things some interesting experiences from Brazil Chile Colombia and Mexico that use different instruments to broaden access to credit in a sustainable way such as structured finance factoring credit guarantees and correspondent banking Most of these experiences have led to financial innovation by developing new financial products and coordinating different players in the financial and real sectors to overcome barriers to access to credit The book provides a first systematic analysis of these innovative experiences including an analytical framework to understand problems of access to finance and a discussion of the effects and optimal design of public interventions Finally the book discusses some open policy questions about the role of the private and public sectors including state owned banks in broadening access to finance in a sustainable and market friendly manner
