Understanding Construction Contracts Akhtar Surahyo, 2017-10-18 This book provides an overall understanding of construction contracts explaining a range of topics with in depth examples allowing engineers site managers architects contractors and other construction professionals in search of information on construction contracts to find it in one place The volume further serves as a learning tool and a reference guide for students and instructors Adopting a primarily Canadian perspective the book provides references from two Standard Contract Documents CCDC Canadian Construction Document Committee and FIDIC International Federation of Consulting Engineers and briefly describes other major contract documents used within USA and UK construction industries

Learner Corpora: Construction and Explorations in Chinese and Related Languages Howard Hao-Jan Chen, Keiko Mochizuki, Hongyin Tao, 2023-04-02 This edited book reflects the state of the art in learner corpus and related approaches to Chinese as a second language CSL CSL as a field has flourished in the past few decades due to the increasingly important role of the Chinese language at the world stage yet studies of Chinese as a second language based on learner corpora have been less well developed due to the limited availability of data and lack of theoretical insights This book represents the latest research in this area by 1 assembling a large group of active researchers from multiple international research communities USA China Hong Kong Macau Japan Taiwan and France 2 discussing the latest resources and technologies in Chinese and other Asian languages learner corpora and corpus building 3 basing Chinese as a second language studies on data from learners of Chinese with a wide range of first language backgrounds English Japanese Korean French among others and 4 integrating corpus methods with a wide range of related methods in allied fields language acquisition usage based linguistics psycholinguistics and neurolinguistics This comprehensive collection is indispensable for anyone who is interested in corpus approaches to CSL and Chinese applied language studies in general

Linguistic Knowledge and Language Use Benoît Leclercq, 2023-11-02 This pioneering book is the first to bring together insights from two usage based approaches Construction Grammar and Relevance Theory

Posthumanist World Englishes Lionel Wee, 2021-05-13 A posthumanist approach problematizes the separateness and centrality of humans in understanding the world around us Posthumanism does not deny the role of humans but questions the assumption that it is human activity and agency that should be given pride of place in any analysis of social activity This carries important and interesting implications for the study of World Englishes some of which are explored in this Element Sections 3 and 4 respectively explore posthumanism in relation to two specific topics in World Englishes creativity and language policy These topics have been chosen because they allow us to see the contributions that posthumanism can make to a micro level creativity as well as macro level language policy topic

Communication Theory Today David J. Crowley, David Mitchell (prof.), 1994 This state of the art overview reflects the rich variety of approaches and disciplines embraced by contemporary communication studies The book consists of thirteen original essays by some of the

most prominent communication scholars including Ien Ang Deidre Boden David Crowley James M Collins Klaus Krippendorff William Leiss Denis McQuail William Melody Joshua Meyrowitz David Mitchell Mark Poster Majid Tehranian John B Thompson and Teun A van Dijk *Frames of Understanding in Text and Discourse* Alexander Ziem, 2014-10-15 How do words mean What is the nature of meaning How can we grasp a word's meaning The frame semantic approach developed in this book offers some well founded answers to such long standing but still controversial issues Following Charles Fillmore's definition of frames as both organizers of experience and tools for understanding the monograph attempts to examine one of the most important concepts of Cognitive Linguistics in more detail The point of departure is Fillmore's conception of frames of understanding an approach to cognitive semantics that Fillmore developed from 1975 to 1985 The envisaged Understanding Semantics U Semantics is a semantic theory sui generis whose significance for linguistic research cannot be overestimated In addition to its crucial role in the development of the theoretical foundations of U semantics corpus based frame semantics can be applied fruitfully in the investigation of knowledge building processes in text and discourse

Mathematical Intuition R.L. Tieszen, 2012-12-06 Intuition has perhaps been the least understood and the most abused term in philosophy It is often the term used when one has no plausible explanation for the source of a given belief or opinion According to some sceptics it is understood only in terms of what it is not and it is not any of the better understood means for acquiring knowledge In mathematics the term has also unfortunately been used in this way Thus intuition is sometimes portrayed as if it were the Third Eye something only mathematical mystics like Ramanujan possess In mathematics the notion has also been used in a host of other senses by intuitive one might mean informal or non rigorous or visual or holistic or incomplete or perhaps even convincing in spite of lack of proof My aim in this book is to sweep all of this aside to argue that there is a perfectly coherent philosophically respectable notion of mathematical intuition according to which intuition is a condition necessary for mathematical knowledge I shall argue that mathematical intuition is not any special or mysterious kind of faculty and that it is possible to make progress in the philosophical analysis of this notion This kind of undertaking has a precedent in the philosophy of Kant While I shall be mostly developing ideas about intuition due to Edmund Husserl there will be a kind of Kantian argument underlying the entire book A New Universal, Technological, Etymological and Pronouncing Dictionary of the English Language, Embracing All the Terms Used in Art, Science and Literature John Craig (F.G.S. of Glasgow.), 1854 **Ubiquitous Computing and Ambient Intelligence** Carmelo R. Meaning in Mind and Society Peter Harder,2010-09-24 Meaning is embodied but it is also social If Cognitive Linguistics is to be a complete theory of language in use it must cover the whole spectrum from grounded cognition to discourse struggles and bullshit This book tries to show how Cognitive Linguistics knocked down the wall between language and the experiential content of the human mind Frame semantics embodiment conceptual construal figure ground organization metaphorical mapping and mental spaces are among the results of this breakthrough which at the same time provided cognitive science as a whole with an essential human dimension A new phase began when Cognitive Linguistics started to see itself as part of the wider movement of usage based linguistics Bringing about an alliance between mind and discourse it complemented the conceptual dimension that had been dominant until then with a use dimension thereby living up to the explicit experiential commitment of Cognitive Linguistics This outward expansion is continuing The focus on meaning construction which began with the theory of blending highlights emergent online effects rather than underlying mappings Cognitive Linguistics is integrating the evolutionary perspective which links up individual and population based features of language The empirical obligations incurred by this expansion have led to greatly increased attention to corpus and experimental methods especially in relation to sociolinguistic and language acquisition research The book describes this development and goes on to discuss the foundational challenge that it creates for Cognitive Linguistics as it begins to cover issues that are also central to types of discourse analysis focusing on social processes of determination The book argues for a synthesis based on a renewed Cognitive Linguistics which can accommodate everything from bodily grounding to deconstructible floating signifiers in an integrated complete picture which also covers the roles of arbitrariness and structure

verbal elements have posed a long standing challenge to linguistic analysis Most studies of verb serialisation have been confined to single languages rather than looking at crosslinguistic patterns This book provides the first in depth account into the areal characteristics of multi verb constructions MVCs in Eastern Indonesia By collating published data as well as corpus data from 32 Austronesian and Papuan languages the study traces commonalities as well as differences in MVC use across the area Analysis takes place on two levels first the morpho syntactic behaviour of MVCs is taken into account As this plane of analysis arguably does not provide any meaningful insights into why MVCs are construed and used the way they are a semantic account of MVCs is presented One of the main hypotheses advanced in this book is that the crucial driving force behind multi verb construals is semantic interaction between the verbs leading to four principal techniques of event formation merging staging modification and free juxtaposition The study aims at showing that while all four techniques are to varying degrees in use in Eastern Indonesian languages the morpho syntactic output does not necessarily mirror these underlying differences in event conception Applying insights from Davidsonian event semantics as well as from predicate decomposition the book provides a model of event interaction that helps to explain differences in MVC behaviour such as
