Hostetter, 2023 *The Oxford Handbook of Peace History* uniquely explores the distinctive dynamics of peacemaking across time and place and analyzing how past and present societies have created diverse cultures of peace and applied strategies for peaceful change The analysis draws upon the expertise of many well respected and distinguished scholars from disciplines such as anthropology economics history international relations journalism peace studies sociology and theology This work is divided into six parts The first three sections address the chronological sweep of peace history from the Ancient Egyptians to the present while the last three cover biographical profiles of peace advocates key issues in peace history and the future of peace history A central

Students and scholars alike will appreciate that this work examines the field of peace history from an international perspective and expands analysis beyond traditional Eurocentric frameworks. This volume also goes far beyond previously published handbooks and anthologies in answering what are the strengths and limits of peace history as a discipline and what can it offer for the future. This book proposes a useful framework for all leaders including business, political leaders and peace developers on how to attain peace between people. The book is presented in four sections: 1 Peace leadership in perspective, Discussions on the nature and meaning of peace leadership, important building blocks for peace leadership, emotional, social and communal intelligence and a peace leadership in action model which forms the basis of the book; 2 Implementation strategies focus on lead self, lead with others and lead communities. Lead self includes leading peace through self, others and the community, the role of wisdom and spirituality in leading self and others and individual social and cultural inertia preventing humanity from attaining peace. Lead others includes leadership theories which support peace leadership, the improvement of cultural intelligence amongst peace leaders and women's role in peace building. Lead communities includes peace leadership in the public and private sectors, healthcare for the vulnerable and its meaning and contribution towards peace leadership and working from helplessness to serving the community; 3 Tools and initiatives to become a highly effective peace leader including information and communication technological innovations for peace leaders and sport as a tool for peace building; 4

Understanding War and Peace Dan Reiter,2023-07-20 Undergraduate multi author textbook by leading conflict scholars focusing on the roots of global conflicts and the various means used to resolve them **The Concept of Violence** Mark

Vorobej,2016-02-26 This study focuses on conceptual questions that arise when we explore the fundamental aspects of violence Mark Vorobej teases apart what is meant by the term violence showing that it is a surprisingly complex unwieldy and highly contested concept Rather than attempting to develop a fixed definition of violence Vorobej explores the varied dimensions of the phenomenon of violence and the questions they raise addressing the criteria of harm agency victimhood instrumentality and normativity Vorobej uses this multifaceted understanding of violence to engage with and complicate existing approaches to the essential nature of violence first Vorobej explores the liberal tradition that ties violence to the intentional infliction of harm and that grows out of a concern for protecting individual liberty or autonomy He goes on to explore a more progressive tradition one that is usually associated with the political left that ties violence to the bare occurrence of harm and that is more concerned with an equitable promotion of human welfare than with the protection of individual liberty Finally the book turns to a tradition that operates with a more robust normative characterization of violence as a morally flawed or forbidden response to the ontological fact of human vulnerability This nuanced and in depth study of the nature of violence will be especially relevant to researchers in applied ethics peace studies and political philosophy
